Inleiding

De Authentage-collectie staat garant voor een tijdloze, sfeervolle verlichting in een klassevolle stijl. Onze verlichting is ambachtelijk gemaakt, maar is uitgerust met de meest hedendaagse technologie. De vormgeving verwijst dan weer naar strakke vormen of componenten uit het verleden.
Dankzij de diverse materialen, zoals verouderd messing, geborsteld nikkel of chroom, past onze collectie perfect in woningen met klassieke, landelijke, moderne of minimalistische stijl. Onze jarenlange ervaring met verlichting helpt ons om armaturen te creëren die verbluffende lichtresultaten opleveren in een zeer breed toepassingsgebied.
Deze catalogus biedt een goed beeld van onze waaier aan mogelijkheden en toepassingen. Geniet ervan en laat u inspireren door onze ontwerpen.

Introduction

La collection Authentage vous garantit un éclairage attrayant et intemporel, dans un style élégant. Notre éclairage, conçu artisanalement avec une technologie contemporaine, recourt à des formes et à des matériaux traditionnels.
La variété des matériaux utilisés, tels que le laiton vieilli, le nickel brossé ou le chrome, permet à notre collection de s'intégrer parfaitement dans les intérieurs classique, rustique, contemporain ou minimaliste. Nos années d'expérience en éclairage nous permettent de créer des soquets avec un large éventail d'applications, dont l'utilisation produit des résultats étonnants.
Ce catalogue présente une bonne image de l'étendue des possibilités et des applications que nous proposons. Profitez-en et laissez-vous inspirer par nos créations.

Introduction

The Authentage collection guarantees timeless, atmospheric lighting in a classy style. Our lighting is made according to traditional methods, but fitted with the most modern technology. In turn, the design reflects clean lines or components from the past.
Thanks to the various materials, such as aged brass, brushed nickel or chrome, our collection perfectly matches homes in classic, country, modern or minimalist style. Our experience with lighting over many years helps us to create fixtures that produce amazing lighting results in a very broad scope of applications. This catalogue provides a good illustration of our range of possibilities and applications. Enjoy them and be inspired by our designs.

Einleitung

Die Authentage-Kollektion garantiert zeitlose, stimmungsvolle Beleuchtung in einem klassischen Stil. Unsere Beleuchtung wird handwerklich hergestellt, verfügt jedoch über die modernste Technologie. Das Design verweist auf die geraden Linien oder Komponenten aus der Vergangenheit.
Dank der verschiedenen Materialien wie gealtertes Messing, gebürstetes Nickel oder Chrom passt unsere Kollektion perfekt in klassische, ländliche, moderne oder minimalistische Wohnungen. Dank unserer jahrelangen Erfahrung mit Beleuchtung können wir Armaturen schaffen, die verblüffende Lichtergebnisse in einem sehr breiten Anwendungsgebiet ergeben. In diesem Katalog bekommen Sie einen guten Eindruck von unseren vielfältigen Möglichkeiten und Anwendungen. Genießen Sie und lassen Sie sich von unseren Entwürfen inspirieren.

Bellefeu Suspension 140cm Bronze

Bellefeu

[NL]
De Bellefeu is een favoriet onder de romantici. Een absolute sfeermaker, gebaseerd op speciale LED-verlichting in echte wassen kaarshulzen. Bij de Dynamic-versie zijn de warme LED's voorzien van een geperfectioneerde sturing. Die zorgt voor flikkerend licht, identiek aan echte kaarsen. Bij de pendelversie zijn aan de onderzijde ultrawarme LED's gemonteerd. De superieure kleurweergave zorgt ervoor dat alles wat u verlicht er heerlijk smakelijk en kleurrijk uitziet. Dankzij twee schakelaars kunnen de onderste lichtlijn en de kaarsen boven de eettafel afzonderlijk branden, terwijl iedereen geniet van de gezellige sfeer. Bellefeu staat niet voor niets voor 'mooi vuur'. Deze verlichting evenaart het effect van een brandende open haard.

[FR]
Le Bellefeu est un de nos modèles favoris, parmi les romantiques. Un créateur d'atmosphère absolu, basé sur un éclairage LED particulier, placé dans des douilles de bougies en cire véritable. Dans sa version Dynamic, les LED chauffés ont un comportement sophistiqué, qui crée une lumière vacillante, identique à celle de vraies bougies. Dans sa version plafonnier, des LED ultra-chauds sont montés en fond, dans des incisions de couleur or. La grande variété des couleurs produites assure une illumination merveilleuse, chatoyante et irisée. Grâce à deux commutateurs, la ligne inférieure ou les bougies de dessus de table peuvent brûler séparément, tandis que chacun profite de l'ambiance chaleureuse. Bellefeu n'évoque pas en vain un «bon feu». Cet éclairage produit le même effet qu'une flambée dans la cheminée.

[EN]
The Bellefeu is a favourite with the romantics. An absolute mood creator, based on special LED lighting in candleholders made of real wax. In the Dynamic version, the warm LEDs have a perfected control. This provides a flickering light, identical to real candles. In the pendant version, the ultra-warm LEDs strips are attached underneath the lamp. The superior colour rendering ensures that everything you illuminate looks delightfully tasteful and colourful. Thanks to two switches, the bottom strip and the candles above the dining table can be lit separately, while everyone enjoys the cosy atmosphere. It is not a coincidence that Bellefeu means 'beautiful fire'. This lighting imitates the effect of a glowing fireplace.

[DE]
Bellefeu ist bei Romantikern besonders beliebt. Ein absoluter Stimmungsmacher, auf der Grundlage einer speziellen LED-Beleuchtung in echten Wachskerzenhüllen. Bei der Dynamic-Version sind die warmen LEDs mit einer perfektionierten Steuerung ausgestattet. Die sorgt für flackerndes Licht, wie bei echten Kerzen. Bei der Pendelversion wurden an der Unterseite ultrawarme LEDs montiert. Die herausragende Farbwiedergabe sorgt dafür, dass alles, was Sie beleuchten besonders schmackhaft und farbenfroh aussieht. Mit zwei Schaltern können die untere Lichtreihe und die Kerzen über dem Esstisch einzeln leuchten, während alle die gemütliche Stimmung genießen. Bellefeu bedeutet nicht umsonst 'schönes Feuer'. Diese Beleuchtung entspricht dem Effekt eines brennenden Kamins.

Vitrine

[NL]

Een stukje uniek vakmanschap met een knipoog naar vroeger. Dat is waar de ambachtelijk vervaardigde Vitrine-collectie voor staat. Dankzij de transparante constructie stralen de vitrines een zekere lichtheid uit. De kleine ongelijkheden en kleurschakeringen zorgen voor authenticiteit. Bij de wandarmaturen kan U de lamp makkelijk vervangen door de zijdelingse pinnen eruit te trekken. Ook de vitrineglazen kunnen op die manier snel en efficiënt worden gepoetst.

[FR]

Une pièce d'artisanat unique avec un clin d'œil au passé. Voilà ce que la collection fait-main Vitrine représente. La transparence de la structure met en valeur une certaine légèreté. Les petites inégalités et les nuances dans la couleur lui confèrent de l'authenticité. Les ampoules sont facilement remplaçables, en ôtant les broches latérales, près des fixations murales. Les vitres peuvent ainsi être nettoyées rapidement et efficacement.

[EN]

A unique piece of craftsmanship with a nod to the past. That is what the traditionally made Vitrine collection is all about. The luminaire's transparent structure radiates a certain light airy look. The tiny inconsistencies and different colour hues provide authenticity. In the wall fittings you can easily replace a lamp by pulling out the side pins. The luminaire's glass panels can also be cleaned in the same quick and easy way.

[DE]

Ein Stück Handwerk mit einem Hinweis auf früher. Das ist es, was die handwerklich hergestellte Vitrine-Kollektion symbolisiert. Dank der transparenten Konstruktion strahlen die Vitrinen eine gewisse Leichtigkeit aus. Die kleinen Ungleichheiten und Farbschattierungen sorgen für Authentizität. Bei den Wandarmaturen können Sie die Lampe einfach wechseln, indem Sie die seitlichen Stifte herausziehen. Auch die Vitrinengläser können so schnell und wirksam geputzt werden.

Vitrine Wall 1L Normal Chrome

Vitrine Petite Lantern 4L Bronze

Vitrine Petite

[NL]
De Vitrine Petite is een variant op de Vitrine. Alles is kleiner en schattiger. De grote lampen zijn vervangen door kleine koelkastlampjes, op 12V of 230V. Deze serie kleine lampjes zijn minder krachtig, waardoor ze gezellig en minder verblindend licht creëren. De mooie donkerbronzen schakeringen stralen hetzelfde nostalgische vakmanschap uit. Als tweelingbroertjes zijn Vitrine en Vitrine Petite heel mooi met elkaar te combineren.

[FR]
Vitrine Petite est une variante de la Vitrine. Tout est plus petit et plus mignon. Les grandes ampoules ont été remplacées par des lampes de frigo, de 12V ou 230V. Cette série de petites lampes est moins forte, ce qui rend leur lumière confortable et moins éblouissante. Les belles nuances de bronze foncé brillent du même éclat nostalgique. Vitrine et Vitrine Petite sont jumelles et très facile à combiner.

[EN]
De Vitrine Petite is another version of the Vitrine. Everything is smaller and prettier. The large lamps have been replaced with small 12V or 230V refrigerator lights. This series of small lights is less powerful, and thus creates warmer, less glaring light. The lovely dark-bronze hues radiate the same nostalgic craftsmanship. Like twin brothers, Vitrine and Vitrine Petite go together perfectly.

[DE]
Die Vitrine Petite ist eine Variante der Vitrine. Alles ist kleiner und niedlicher. Die großen Lampen wurden durch kleine Kühlschranklampen mit 12V oder 230V ersetzt. Diese Serie kleine Lampen sind weniger leistungsstark, sodass sie gemütliches und weniger blendendes Licht erzeugen. Die schönen dunkelbronzenen Farbtöne strahlen dasselbe nostalgische Handwerk aus. Vitrine und Vitrine Petite lassen sich wie Zwillingsbrüder schön miteinander kombinieren.

NEW

Prefora

[NL]
Verbluffende effecten en een betoverend lichtspektakel. Daarvoor staat onze gloednieuwe Prefora-collectie. Hoe werkt het? Een sterrenprojector mikt duizenden lichtpuntjes op uw muren en plafond, waardoor de hele omgeving er plots heel feeëriek uitziet. De Prefora schittert zowel binnen als buiten en is verkrijgbaar als grondverlichting, pendel of plafonnière. Op terrassen en tegen gevels levert hij prachtige effecten op. Hij kan tussen de beplanting worden geprikt, maar net zo goed in groep op verschillende hoogten worden geplaatst in een grote hal of salon. De verschillende diameters zorgen voor een variatie aan lichtsterretjes. Met een grote diameter krijgt u meer kleine sterretjes, een kleine diameter genereert minder, maar grotere sterren.

[FR]
Des effets époustouflants et un lightshow enchanteur. Voici notre nouvelle Collection Prefora. Comment ça marche? Un projecteur stellaire projette des milliers de points lumineux sur les murs et le plafond, et confère soudain à l'ambiance un aspect féerique. Le Prefora brille tant à l'intérieur qu'à l'extérieur et est disponible en éclairage de sol, applique ou plafonnier. En terrasse ou sur façade, il produit de superbes effets. Il peut être placé entre les plantes vertes, mais tout aussi bien en groupe, placé à différentes hauteurs dans une salle ou un salon. Les différents diamètres fournissent une variété de lumières d'étoile. Avec un grand diamètre vous obtenez plus de petites étoiles; un petit diamètre en génère moins, mais produit de plus grande étoile.

[EN]
Amazing effects and a magical light spectacle. That sums up our brand new Prefora collection. How does it work? A star projector focuses thousands of points of light onto your walls and ceiling, making the whole area suddenly look very magical. Prefora illuminates both indoors and outdoors and is available as ground lighting, pendant or ceiling light. It provides beautiful effects on terraces and against facades. It can be dotted among plants, but equally placed in a group at various heights in a large hall or lounge. The various diameters ensure a variation in starry lights. With a large diameter you get a larger amount of little stars, a small diameter generates fewer, but larger stars.

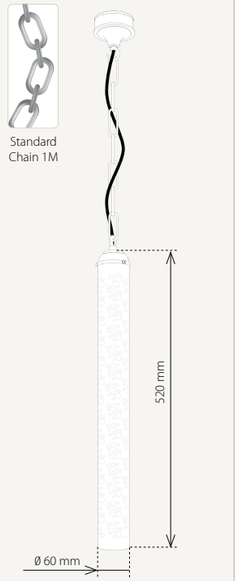

[DE]
Verblüffende Effekte und ein bezauberndes Lichtspektakel. Das symbolisiert unsere nagelneue Prefora-Kollektion. Wie funktioniert es? Ein Sternprojektor wirft Tausende Lichtpunkte auf Ihre Wände und Decke, sodass die ganze Umgebung plötzlich sehr märchenhaft aussieht. Der Prefora glänzt sowohl drinnen als draußen und ist als Bodenbeleuchtung, Pendel oder Deckenarmatur erhältlich. Auf Terrassen und gegen Fassaden ergibt er prächtige Effekte. Er kann zwischen die Bepflanzung gesteckt werden, aber auch in unterschiedlichen Höhen in einer großen Halle oder dem Wohnzimmer platziert werden. Die verschiedenen Durchmesser sorgen für viele Lichtsternchen. Mit einem großen Durchmesser erhalten Sie mehr kleine Sternchen, ein kleiner Durchmesser erzeugt weniger, aber größere Sterne.

Spot Centonze

[NL]
Met een mooie ringvorm op twee scharniertjes houdt de Centonze zijn lamp vast. En niet zomaar een lamp, maar een antiverblindende AR111-spot. De gestoffeerde getwiste kabel geeft het toestel extra uitstraling. De AR111-lampen zijn verkrijgbaar in vele verschillende wattages en lichtbundels, zowel in halogeen als in LED. Hoe gerichter de bundel, hoe intenser het licht en hoe mooier het contrast.

[FR]
Avec sa belle forme en anneau fixé sur deux charnières, Centonze tient fermement sa lampe. Et pas seulement une lampe, mais un éblouissant coup de projecteur AR111. Le câble torsadé rembourré lui donne une classe supplémentaire. Les lampes AR111 sont disponibles dans de nombreuses puissances et formes, tant halogènes que LED. Plus le faisceau est concentré, plus intense est la lumière et le contraste accentué.

[EN]
A nicely formed ring with two hinges holds the Centonze lamp securely. And not just an ordinary lamp, but an anti-glare AR111 spotlight. The twisty fabric cable gives the unit a classy look. The AR111 lamps are available in various wattages and beams, both halogen as well as LED. The more concentrated the light beam, the more intense the light and the better the contrast.

[DE]
Centonze hält mit der schönen Ringform an zwei Scharnieren die Lampe fest. Und nicht einfach eine Lampe, sondern einen nicht blendenden AR111-Spot. Das gepolsterte, gedrehte Kabel verleiht dem Gerät zusätzliche Ausstrahlung. Die AR111-Lampen sind in unterschiedlicher Wattleistung und Lichtbündelung, sowohl als Halogen und LED erhältlich. Je gerichteter das Bündel ist, desto intensiver ist das Licht und desto schöner ist der Kontrast.

HALOGEN Marron built-in rosas with springs

Spot Marron

[NL]

Dit is een cleane naakte spot met een technische uitstraling. Door het basic design is deze collectie de meest prijsgunstige in de categorie van de richtbare spots. De betrouwbare lamphouder BA15D en de metaalkleurige lamp worden zonder omhulsel volledig in het zicht geplaatst. De marron kan naar keuze worden uitgerust met een LED lamp AR70 of met een halogeenversie van 20 of 50 Watt. De bundel kan gekozen worden in 8° en 24° en heeft een antiverblindende afscherming. Dankzij de keuze in wattage en richting kan u het licht helemaal afstemmen voor elke toepassing apart en zo een optimale sfeer creëren.

[FR]

Voici un spot propre et net, à l'aspect résolument technique. Le design basique de cette collection en fait le moins cher des spots orientables. Le support de lampe fiable BA15D et son couvercle métallique en font un objet discret. Le Spot marron peut être équipé, au choix, d'une ampoule LED AR70 ou d'une version halogène de 20 ou 50 watts. Le faisceau peut être réglé à 8 et 24° et dispose d'un revêtement anti-éblouissement. Grâce au réglage de la puissance et de la direction de la lumière, chaque applique peut être personnalisée. On peut ainsi créer une atmosphère optimale.

[EN]

This is a clean, naked spotlight with a technical look. The simple design makes this collection the most attractively priced in the adjustable spotlight category. The reliable BA15D holder and the metal-coloured lamp without a cover are entirely visible. Marron can be optionally fitted with an LED AR70 lamp or with a halogen 20 or 50 Watt version. You can choose the 8° and 24° beam and it has anti-glare protection. Thanks to the choice of wattage and beam you can completely adjust the light for every use and thus create an optimal atmosphere.

[DE]

Das ist ein cleaner, bloßer Spot mit einer technischen Ausstrahlung. Aufgrund des Basic Design ist diese Kollektion die preisgünstigste in der Kategorie der richtbaren Spots. Der zuverlässige Lampenhalter BA15D und die metallfarbene Lampe werden ohne Hülle sichtbar aufgestellt. Die Marron kann nach Wahl mit einer LED-Lampe AR70 oder einer Halogenlampe mit 20 oder 50 Watt versehen werden. Das Bündel wählen Sie in 8° oder 24°. Es hat einen Blendschutz. Dank der unterschiedlichen Wattleistung und Richtung können Sie das Licht für jede Anwendung einzeln vollkommen anpassen und so eine optimale Stimmung erzeugen.

Spot Comète

[NL]
Deze komeetvormige spot voegt een speels tintje toe aan uw interieur. De Comète is een spot op een beugel met scharnieren, die de volledige lamp en lamphouder omhult. De BA15D lamphouder wordt gevoed door een gestoffeerde getwiste kabel. De AR70-spot sluit mooi aan in de Comète en heeft een antiverblindende afscherming voor de lichtbron. Dit type lamp zorgt ervoor dat het licht mooi accentueert met een minimum aan verblinding. Dankzij de keuze in wattage en bundelrichting kan u het licht helemaal afstemmen op de gewenste sfeer. De Comète is verkrijgbaar als 12V-lamp halogeen of als kleinere gewone GU10 LED op 220V.

[FR]
Ce spot en forme de comète ajoute une touche ludique à votre intérieur. La Comète est un spot placé sur un support articulé qui soutient l'entièreté de la lampe. La lampe BA15D est alimentée par un câble torsadé rembourré. L'ampoule AR70 convient bien au Spot Comète et elle dispose d'un écran anti-éblouissement. Ce type de lumière accentue bien la lumière, tout en réduisant l'éblouissement au minimum. Le réglage de la puissance et de la direction du faisceau lumineux permet d'obtenir aisément l'atmosphère souhaitée. La Comète est disponible en 12V halogène ou en LED GU10 pour le 220V.

[EN]
This comet-shaped spotlight adds a playful touch to your interior. Comète is a spotlight on an arm with hinges that covers the entire lamp and holder. The BA15D lampholder is fed by a fabric cable. The AR70 spot fits beautifully in the Comète and has an anti-glare shield for the light source. This type of lamp ensures that light is beautifully accentuated with minimum glare. Thanks to the optional wattage and beam you can completely adjust the light to the required atmosphere. Comète is available as 12V halogen lamp or as smaller normal GU10 LEDs at 220V.

[DE]
Dieser kometenförmige Spot verleiht Ihrer Einrichtung einen spielerischen Akzent. Der Comète ist ein Spot auf einem Bügel mit Scharnieren, der die gesamte Lampe und die Lampenhalterung umfasst. Der BA15D-Lampenhalter wird über ein gepolstertes, gedrehtes Kabel gespeist. Der AR70-Spot passt perfekt in den Comète und hat einen Blendschutz für die Lichtquelle. Dieser Lampentyp sorgt dafür, dass das Licht mit nur minimaler Blendung schön akzentuiert. Dank der unterschiedlichen Wattleistung und Bündelrichtung können Sie das Licht vollkommen auf die gewünschte Atmosphäre abstimmen. Comète ist als 12V-Lampe Halogen oder als kleinere normale GU10 LED mit 220V erhältlich.

Poire 3L on profile 50 cm Brushed Nickel

Spot Poire

[NL]

De Poire is een mooi afgewerkte, peervormige spot die de lamp en de lamphouder maximaal verhult. Hij is geplaatst op een zwaar, maar sierlijk scharnier. De AR70-spot heeft een antiverblindende afscherming voor de lichtbron. Dankzij de keuze in wattage en richting kan u het licht helemaal afstemmen voor elke gelegenheid en zo een optimale sfeer creëren. De Poire is verkrijgbaar als mooi aansluitende 12V AR70-lamp of als kleinere LED met Gu10-fitting op 220V.

[FR]

La Poire est un spot magnifiquement fini, en forme de poire, qui dissimule la lampe et son support au maximum. Il est placé sur une charnière robuste, mais gracieuse. Le spot AR70 dispose d'une protection anti-éblouissement. Grâce au choix de la puissance et de la direction de la lumière, vous pouvez en toute occasion créer une atmosphère optimale. La Poire est disponible en belle lampe d'appoint 12V AR70 ou dans une version LED, avec le GU10 pour 220V.

[EN]

Poire is a beautifully finished, pear-shaped spot with maximum cover of the lamp and lampholder. It is attached to a heavy, but ornate hinge. The AR70 spot has an anti-glare shield for the light source. Thanks to the optional wattage and beam you can completely tune the light to every occasion and thus create an optimum atmosphere. Poire is available as a beautifully matched 12V AR70 lamp or as smaller LEDs with GU10 fitting at 220V.

[DE]

Der Poire ist ein hübsch verarbeiteter, birnenförmiger Spot, der die Lampe und den Lampenhalter maximal verhüllt. Er ist an einem schweren, aber zierlichen Scharnier befestigt. Der AR70-Spot hat einen Blendschutz für die Lichtquelle. Dank der unterschiedlichen Wattleistung und Richtung können Sie das Licht für jede Gelegenheit anpassen und so eine optimale Stimmung erzeugen. Poire ist als schön anschließende 12V AR70-Lampe oder kleinere LED mit Gu10-Fassung für 220V erhältlich.

Fleure on profile 3L Bronze

Spot Fleure

[NL]

Dit fijne tulpvormige spotje is ideaal om meerdere kleine accentjes te leggen in uw interieur. Door de fijne lichtbundels verkrijgen we heel mooie contrasten tussen licht en donker. Deze contrasten zorgen voor de sterke sfeer, vergelijkbaar door te werken met vele kleine lampenkapjes of kaarsen. Het is wel aangewezen om voldoende spotjes te nemen, want 1 lampje van 20 Watt geeft 2,5 keer minder licht dan een standaard lampje van 50 Watt. De volledige Fleure-collectie kan optioneel worden uitgerust met de Narcisse-blaadjes. Ze dienen wel samen te worden besteld, omdat ze geplaatst worden bij de assemblage.

[FR]

Ce petit spot en forme de tulipe est idéal pour créer de petites touches lumineuses dans votre intérieur. Ses fins faisceaux de lumière produisent des contrastes très subtils entre la lumière et l'obscurité. Ces contrastes procurent une atmosphère forte, semblable à celle qu'on obtiendrait avec de nombreux petits abat-jour ou des bougies. Il est conseillé de prendre suffisamment de petits spots, car une ampoule de 20 watts fournit 2,5 fois moins de lumière qu'une ampoule standard de 50 watts. La collection complète Spot Fleur peut être agrémentée des feuilles Narcisse. Il convient alors de les commander ensemble, parce qu'elles sont placées lors de l'assemblage.

[EN]

This delicate tulip-shaped spot is perfect for the introduction of several little accents in your interior. The soft beams of light give a beautiful contrasts between light and shade. These contrasts provide an effective atmosphere, just like using lots of little lampshades or candles. It is advisable to order enough spotlights, because one 20 Watt lamp gives 2.5 times less light than a standard 50 Watt lamp. The entire Fleure collection can be optionally fitted with Narcissus leaves. These should be ordered at the same time, because they are fitted at the point of assembly.

[DE]

Dieser feine, tulpenförmige Spot ist ideal um in Ihrer Einrichtung mehrere kleine Akzente zu schaffen. Dank der Lichtbündel entstehen sehr schöne Kontraste zwischen hell und dunkel. Diese Kontraste sorgen für die starke Stimmung, vergleichbar mit vielen kleinen Lampenkappen oder Kerzen. Es wird jedoch empfohlen ausreichend Spots zu nehmen, denn 1 Lampe von 20 Watt erzeugt 2,5 mal weniger Licht als eine Standardlampe von 50 Watt. Die vollständige Fleur-Kollektion kann optional mit den Narcisse-Blättern ausgestattet werden. Sie müssen jedoch zusammen bestellt werden, da sie bei der Montage mit angebracht werden.

Fleure twin on Square Base Brushed Nickel

Spot Fleure Twin

[NL]

Tweelingbroers horen onafscheidelijk te zijn. Daarom worden er bij de Fleur Twin-collectie twee kleine tulpvormige Fleur-spots op scharnier samen op een Y-stukje geplaatst. Hierdoor kunnen we nog meer kleine accentjes werpen dan met de enkele fleur. Hoe meer we spelen met het contrast tussen licht en donker, hoe mooier en gezelliger het geheel zal worden. Nu nog eventjes zacht dimmen, en uw sfeer is onovertreffelijk.

[FR]

Les frères jumeaux sont dits inséparables. Par conséquent, dans la collection Fleur Twin, deux petits spots en forme de tulipe Fleur-spot sont placés ensemble sur une pièce en forme de Y.Cela produit encore plus de tonalités qu'une fleur unique. Plus nous jouons avec le contraste entre la lumière et l'obscurité, plus l'ensemble sera beau et amusant. Baissez encore l'intensité, et votre ambiance sera d'autant adoucie.

[EN]

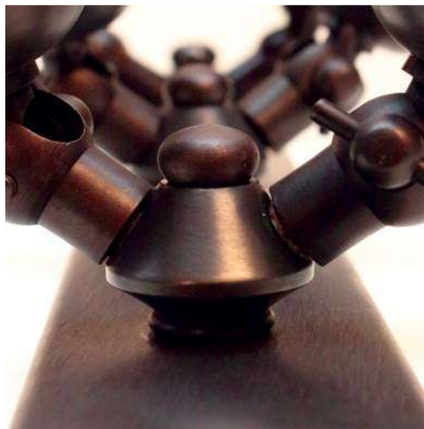

Twin brothers should be inseparable. That is why the Fleur Twin collection has two small tulip-formed Fleur spots hinged together on a Y piece. In this way we can throw in even more little accents than with the single Fleur. The more we play with the contrast between dark and light, the more beautiful and cosier everything will become. Now just gently dim and your atmosphere will be unbeatable.

[DE]

Zwillingsbrüder sollten unzertrennlich sein. Darum werden bei der Fleur Twin-Kollektion zwei kleinere tulpenförmige Fleur-Spots auf Scharnieren zusammen auf einem Y-Teil montiert. Dadurch können wir noch mehr kleine Akzente legen als mit der einfachen Fleur. Je mehr wir mit dem Kontrast zwischen hell und dunkel spielen, desto schöner und gemütlicher wird alles. Nun noch leicht dimmen und Ihre Stimmung ist nicht zu überbieten.

Fiston 12v on Round Driver Base Brushed N.

Fiston spot / Hi-spot

[NL]

Fiston

De Fiston-spot is een prachtig afgewerkte spot, waarin de lamphouder BA15D volledig in een gegoten kaarshouder is geplaatst. Deze gegoten lamphouder is zwaarder en mooier afgewerkt dan een geforceerde lamphouder. Samen met de grote sierscharnier zorgt hij voor een gaaf afgewerkt geheel. De 12V BA15D-fitting kan naar keuze worden uitgerust met een Halogeen 20 of 50W AR70 van 8° of 24°, of met onze AR70 LED

Fiston Hi-spot

De Fiston is ook verkrijgbaar als GU10 versie rechtstreeks op 220V met HI-spot of LED lamp. Let wel: de HI-spot heeft geen antiverblindende bescherming voor de lichtbron. Dit zal zorgen voor meer verblinding, maar ook voor een meer algemenere belichting met minder contrasten. In combinatie met LED-verlichting is deze toepassing de zuinigste, maar helaas een stukje minder aangenaam.

[FR]

Fiston

Le spot Fiston est un spot magnifiquement fini, sur lequel le soquet BA15D est entièrement placé dans un chandelier en fonte. Ce support de lampe moulé est plus résistant et mieux fini qu'un soquet renforcé. Avec sa grande charnière ornementale, il crée un ensemble parfaitement fini. Le branchement 12V BA15D peut être équipé au choix d'un AR70 de 20 ou 50W de 8 ou 24 °, ou encore notre lamp AR70 LED.

Fiston Hi-spot

Le Fiston est également disponible en version GU10, directement connectable au réseau 220V, en HI-spot ou en LED. Remarque: Le HI-spot ne dispose pas de protection contre l'éblouissement. Cela produira plus de luminosité, mais également un éclairage plus général, avec moins de contrastes. En combinaison avec un éclairage LED, cette solution est la plus économique, mais malheureusement un peu moins agréable.

[EN]

Fiston

The Fiston is a beautifully finished spot, in which the BA15D lampholder is placed entirely in a cast candleholder. This cast lampholder is heavier and more beautifully finished than a forced lampholder. Together with the large decorative hinge, it provides a cool, complete finish. The 12V BA15D fitting can be equipped with a 20 of 50W AR70 at 8° or 24°.

Fiston Hi-spot

The Fiston is also available as GU10 version directly at 220V with HI-spot or LED lamp. Remember: the HI-spot has no anti-glare protection for the light source. This will mean more glare, but also a more general lighting with fewer contrasts. In combination with LED lighting, this application is the most economical, but unfortunately a little less attractive.

[DE]

Fiston

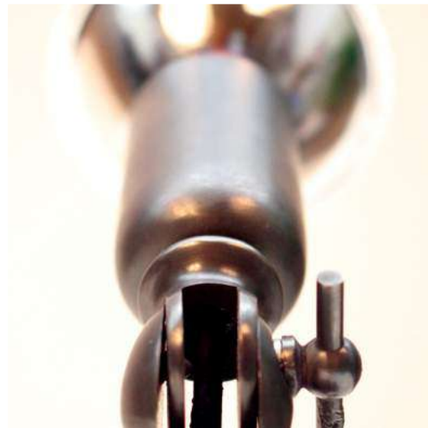

Der Fiston-Spot ist ein prächtig verarbeiteter Spot, bei dem der Lampenhalter BA15D vollkommen in einem gegossenen Kerzenhalter angebracht ist. Dieser gegossene Lampenhalter ist schwerer und besser verarbeitet als ein bewehrter Lampenhalter. Gemeinsam mit dem großen Zierscharnier sorgt er für eine tolle Einheit. Die 12V BA15D-Fassung kann nach Wahl mit einem 20 oder 50W AR70 von 8° oder 24° versehen werden.

Fiston Hi-spot

Der Fiston ist auch als GU10-Version direkt für 220V mit HI-Spot oder LED-Lampe erhältlich. Achtung: Der HI-Spot hat keinen Blendschutz für die Lichtquelle. Das sorgt für mehr Blendung, aber auch eine allgemeinere Beleuchtung mit weniger Kontrasten. In Kombination mit LED-Beleuchtung ist diese Anwendung die sparsamste, aber leider etwas weniger angenehm.

Aureole with option gold reflector and Kelvin Killer

Aureole

[NL]

Deze multifunctionele, makkelijk te plaatsen, full option inbouwspot is super interessant geprijsd. Hij is voorzien van een richtbare GU10-lamphouder voor zowel halogeen als LED.
De meegeleverde honingraat en de coverplaat met klein lichtgat zorgen voor een super gerichte en antiverblindende bundel, maar zijn eenvoudig te verwijderen indien deze niet gewenst zouden zijn. Met de bladveren is het kinderspel de Aureole in een betonboring van 80mm te monteren, maar het is even eenvoudig deze in gipsplaat vast te zetten dankzij de schroefbare montage pootjes. De Aureole is ontworpen om heel snel en eenvoudig aan te sluiten. Als extra optie kan u kiezen voor onze Kelvin Killer of de klassiekere goudkleurige reflector, die ook bij LED-verlichting voor een warme en aangename gloed zorgt.

[FR]

Cet spot multifonctions, facile à installer, full option inclus, a un prix particulièrement attractif. Il est équipé d'un support réglable GU10 qui convient tant pour l'halogène que le LED.
Le nid d'abeilles fourni et la plaque de couverture avec un petit orifice, qui assurent un faisceau très concentré et intense, sont faciles à enlever si on le souhaite. Avec son ressort à lame, l'Auréole est très facile à installer dans un trou foré de 80 mm, mais il est tout aussi facile à placer dans les cloisons de plâtre, avec une simple vis. L'auréole est conçue pour être branchée rapidement et facilement. En option, vous pouvez ajouter notre Kelvin Killer ou le classique réflecteur or, qui permet également l'éclairage LED, pour une lueur chaleureuse et accueillante.

[EN]

This multifunctional, easy to install, full option built-in spot has a highly interesting price tag. It has an adjustable GU10 lampholder for both halogen as well as LED.
The supplied honeycomb filter and cover with a small aperture provide a well-focused and anti-glare beam, but are easy to remove if they are not required. The Aureole is child's play to install in 80 mm concrete with leaf springs, but it is equally easy to secure these in plasterboard thanks to the screwable mounting feet. The Aureole is designed for fast and easy fitting. As extra option you can go for our Kelvin Killer or the more classic gold-coloured reflector, which gives a warm and pleasant glow also with LED lighting.

[DE]

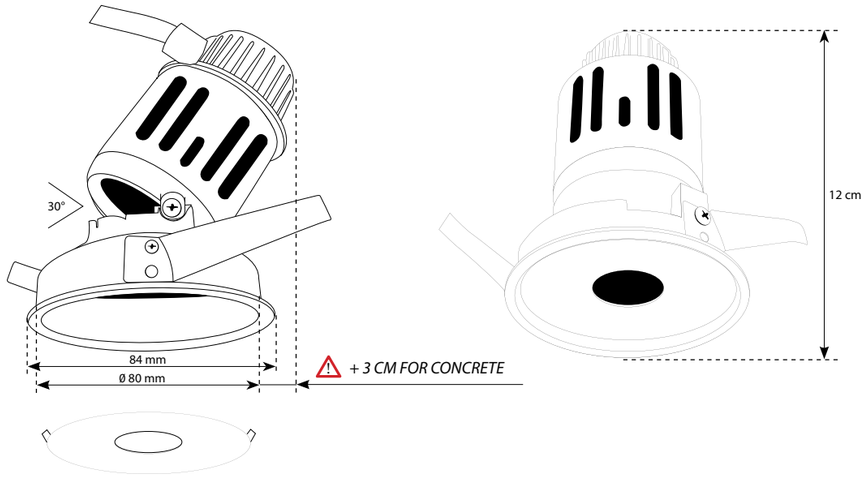

Dieser multifunktionelle, einfach zu montierende Full Option-Einbauspot hat einen besonders interessanten Preis. Er verfügt über einen richtbaren GU10-Lampenhalter für Halogen und LED. Die im Lieferumfang enthaltene Honigwaben und die Abdeckung mit kleiner Lichtöffnung sorgen für ein perfekt gerichtetes und nicht blendendes Lichtbündel, können aber bei Bedarf einfach entfernt werden. Mit den Blattfedern ist es ein Kinderspiel die Aureole in eine Betonbohrung von 80 mm zu montieren, aber es ist dank der schraubbaren Montagefüße auch einfach diese in Gipskarton zu befestigen. Die Aureole wurde so entworfen, dass sie schnell und einfach angeschlossen werden kann. Als Zusatzoption wählen Sie zwischen unserem Kelvin Killer oder dem klassischen goldfarbenen Reflektor, der auch bei LED-Beleuchtung für eine warme und angenehme Glut sorgt.

Wall

NEW

Bellefeu

Centonze

Comète

Spot

Phantôme Wall

[NL]
De Phantôme-collectie is ontworpen om onzichtbaar te zijn. De overschilderbare armaturen in plaaster vormen één geheel met de muur. Het licht komt als het ware uit het niets. Bij de randloze inbouwspots kan de lamp dieper in het armatuur worden geplaatst. Hierdoor is de lichtbundel kleiner en minder verblindend. De kleur van de frontplaat van de spot wordt gekozen in overeenstemming met accenten uit het interieur. Dit is een collectie die door zijn onopvallendheid zowel in moderne als klassieke interieurs tot zijn recht komt.
Nieuw: De Phantôme wall is nu ook verkrijgbaar met het extra gezellige licht van de Bellefeu-kaarsen, die mee in de muur worden geplaatst.

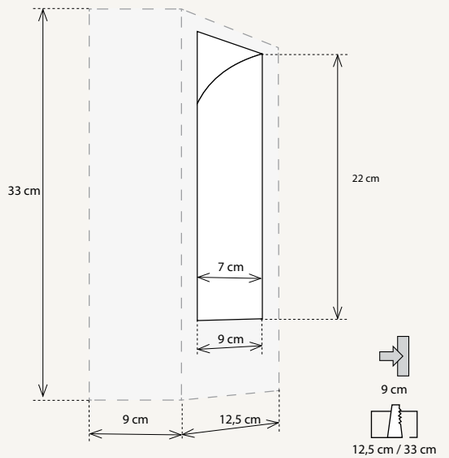

[FR]
La collection Phantôme est conçue pour être invisible. Les luminaires en plâtre à peindre se fondent dans le mur. La lumière vient, pour ainsi dire, de nulle part. Dans les plafonniers encastrés, la lampe peut être placé plus profondément dans le luminaire. Ainsi, le faisceau lumineux est plus petit et moins brillant. La couleur de la plaque frontale du spot est choisie en accord avec la finition de la décoration intérieure. Cette collection, par sa discrétion, convient particulièrement aux intérieurs modernes et classiques.
***Nouveau:** Le Phantôme wall est maintenant aussi disponible avec la lumière chaleureuse des bougies Bellefeu, qui peuvent également être encastrées.*

[EN]
The Phantôme collection is designed to be invisible. The paintable fixtures in plaster form an integral part of the wall. It seems as if the light is coming from nowhere. The borderless built-in spots allow the lamp to be mounted deeper in the fitting. Consequently the light beam is smaller and less glaring. The colour of the spot's front plate is chosen to complement the style of the interior. Thanks to the striking design, this collection fits perfectly both in modern as well as classic interiors.
New: The Phantôme wall is now also available with the additional cosy light of the Bellefeu candles, which are placed in the wall.

[DE]
Die Phantôme-Kollektion wurde entworfen um unsichtbar zu sein. Die überstreichbaren Armaturen im Putz bilden eine Einheit mit der Wand. Das Licht kommt sozusagen aus dem Nichts. Bei den randlosen Einbauspots kann die Lampe tiefer in die Armatur eingesetzt werden. Dadurch ist das Lichtbündel kleiner und blendet weniger. Die Farbe der Frontplatte des Spots wird entsprechend den Akzenten der Einrichtung gewählt. Das ist eine Kollektion, die durch ihre Unauffälligkeit sowohl in modernen als auch klassischen Interieurs zu ihrem Recht kommt.
***Neu:** Die Phantôme Wall ist jetzt auch mit dem besonders gemütlichen Licht der Bellefeu-Kerzen erhältlich, die mit in die Wand montiert werden.*

Phantôme Centonze

Phantôme Centonze 1L Chrome

[NL]

De Phantôme Centonze behoort tot de collectie van randloos ingewerkte minimalistische armaturen. In een overschilderbare hittebestendige inbouwbox wordt een plaat gemonteerd voorzien van de Centonze-spot. De box wordt onzichtbaar doordat deze kan geschilderd worden in dezelfde kleur als het plafond. Maar dankzij de knappe lamp, het mooie design van de ring en de authentieke vleugelvijsjes biedt hij toch een landelijk design.

[FR]

Le Phantôme Centonze appartient à la collection des luminaires minimalistes intégrés, sans fixation apparente. Dans une boîte intégrée résistante à la chaleur, qui peut être peinte, est montée une plaque équipée d'un spot Centonze. La boîte est invisible car elle peut être peinte de la même couleur que le plafond. Mais grâce à la lampe intelligente, au design attrayant de l'anneau et aux papillons de fixation, il présente encore un design authentique.

[EN]

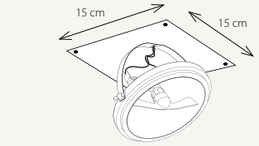

The Phantôme Centonze belongs to the collection of built-in, flush-mounted minimalist fixtures. The Centonze spot is fitted onto a plate mounted inside a paintable heat-resistant box. The box becomes invisible because it can be painted in the same colour as the ceiling. But it still provides a provincial look thanks to the handsome lamp, the ring's lovely design and the authentic wing screws.

[DE]

Phantôme Centonze gehört zur Kollektion der randlos integrierten minimalistischen Armaturen. In einer überstreichbaren, hitzebeständigen Einbaubox wird eine Platte montiert, die mit dem Centonze-Spot ausgestattet ist. Die Box wird unsichtbar, da sie in derselben Farbe wie die Decke gestrichen werden kann. Aber dank der tollen Lampe, dem hübschen Design des Rings und den authentischen Flügelmuttern bietet er doch ein ländliches Design.

Phantôme Comète

Phantôme Comète 2L Chrome

[NL]

Net zoals de Phantome Centonze maakt de Phantôme Comète deel uit van de collectie van randloze armaturen. De Comète-spot staat op een plaat die in een randloos afgewerkte en overschilderbare box wordt geplaatst. Door de relatief kleine lichtbron (type AR70) blijft de grootte van de box beperkt. Dit is strakke, discrete verlichting met een authentieke look.

[FR]

Comme le Phantôme Centonze, le Phantôme Comète fait partie de la collection d'appareils sans fixation apparente. Le spot Comète est fixé sur une plaque placée dans une boîte qui peut être repeinte autant de fois qu'on le souhaite. Son ampoule de relativement faible intensité (type AR70) permet de conserver un boîtier de petite taille. Un éclairage élégant, discret, avec un look authentique.

[EN]

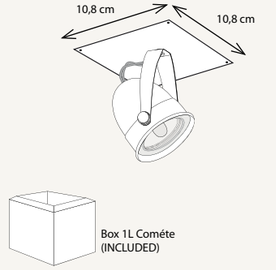

Just like the Phantome Centonze, the Phantôme Comète forms part of our collection of flush-mounted fittings. The Comète spotlight sits on a plate which is fixed in a flush-mounted and paintable box. The relatively small light source (type AR70) restricts the size of the box. This is clean, discrete lighting with an authentic look.

[DE]

Wie der Phantome Centonze gehört auch der Phantôme Comète zur Kollektion der randlosen Armaturen. Der Comète-Spot steht auf einer Platte, die in eine randlose und überstreichbare Box eingefügt wird. Dank der relativ kleinen Lichtquelle (Typ AR70) bleibt die Größe der Box beschränkt. Das ist geradlinige, diskrete Beleuchtung mit einem authentischen Look.

Phantôme Spot

Phantôme spot square

[NL]

De Phantôme collectie is ontworpen om onzichtbaar te zijn. De overschilderbare toestellen in plaaster vormen één geheel met de muur. Het licht komt als het ware uit het niets. Bij de randloze inbouwspots kan de lamp dieper in het armatuur geplaatst worden. Hierdoor is de lichtbundel kleiner en minder verblindend. De kleur van de frontplaat van de spot wordt gekozen in overeenstemming met accenten uit het interieur. Een collectie die door zijn onopvallendheid zowel in moderne als klassieke interieurs tot zijn recht komt.

[FR]

La collection Phantôme est conçue pour être invisible. Les boîtes en plâtre à peindre font intégralement partie de la paroi afin que la lumière brille comme si elle venait de nulle part. Avec les spots encastrés, la lampe peut être placée plus profondément dans l'appareil, ce qui rend le rayon lumineux plus petit et moins éblouissant. La couleur de la plaque faciale est choisie en accord avec le style de la pièce où elle est installée. C'est une collection qui s'adapte parfaitement dans des intérieurs modernes tout comme dans des intérieurs plus classiques.

[EN]

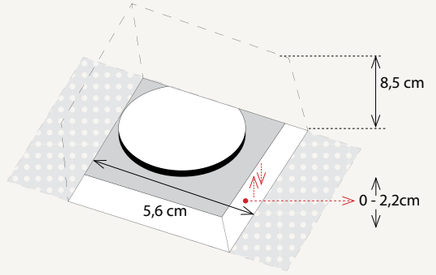

The Phantôme collection is designed to be invisible. The paintable boxes in plaster form an integral part of the wall so the light shines as it were coming from nowhere. With the recessed spots, the lamp can be placed deeper in the fixture, which makes the light beam smaller and less blinding. The colour of the front plate of the spot is chosen complement the style of the room where it is installed, and is a collection that fits perfectly both in modern as well as in classic interiors.

[DE]

Die Phantôme-Kollektion ist unsichtbar. Der lackierbare Einbau aus Gips wird zu einem Bestandteil der Wand, sodass das Licht aus dem Nichts zu kommen scheint. Dank der eingelassenen Strahler kann die Lampe tiefer in der Fassung befestigt werden. Der Lichtkegel wird so verkleinert und blendet weniger. Die Farbe der Frontplatte des Strahlers kann dem Stil des Raums angepasst werden, sodass die Kollektion sowohl zu einer modernen als auch zu einer klassischen Inneneinrichtung gut aussieht.

Lisible Floor Poire Bronze

Lisible

[NL]
Een lekker gezellig lichtje maakt lezen zó veel fijner. De elegante structuur maakt van de Lisible een heel discrete leeslamp. De flexibele arm zorgt ervoor dat de lamp perfect kan worden gericht. Alle halogeenvloerlampen zijn voorzien van een dimmer. De lichtbron is een spotje dat zorgt voor een mooie geconcentreerde lichtbundel.

[FR]
Une belle et douce lumière rend la lecture tellement plus agréable. Sa structure élégante fait de Lisible une lampe de lecture très discrète. Le bras flexible permet de l'orienter parfaitement. Tous les lampadaires halogènes sont équipés d'un modulateur. L'ampoule est un spot permettant un faisceau concentré.

[EN]
A nice, warm light makes reading so much more pleasant. The elegant structure makes Lisible a very discrete reading lamp. The flexible arm lets you direct the lamp perfectly. All halogen floor lamps have a dimmer. The light source is a spot that provides a beautifully concentrated beam.

[DE]
Ein gemütliches Licht macht Lesen gleich viel angenehmer. Die elegante Struktur macht das Lisible zu einer sehr diskreten Leselampe. Der flexible Arm sorgt dafür, dass die Lampe perfekt ausgerichtet werden kann. Alle Halogen-Fußbodenlampen sind mit einem Dimmer versehen. Die Lichtquelle ist ein Spot, der für ein schön konzentriertes Lichtbündel sorgt.

Monet & Matisse

[NL]
De schilders Monet en Matisse werden beschouwd als eigenwijze perfectionisten. Deze collectie van fijne lichtarmaturen is dat ook. Ze wil niet opvallen, waardoor de volledige aandacht gaat naar het schilderij. Door het unieke buissysteem zijn verschillende combinaties mogelijk. U kan zowel de lengte van het armatuur als de lichtintensiteit zelf bepalen. De Matisse is uitgevoerd met warme of ultrawarme Brilliant-LED's. Deze LED's garanderen een optimale kleurweergave van het portret dat ze verlichten. En zo zijn Monet & Matisse eeuwen later nog altijd dienaars van de schoonheid.

[FR]
Les peintres Monet et Matisse ont été considérés comme des perfectionnistes obstinés. Cette collection de luminaires également. Elle ne veut pas se mettre en avant, afin que toute l'attention aille à la peinture. Grâce à son système de tube unique, toutes les combinaisons sont possibles. Vous pouvez déterminer la longueur du luminaire ainsi que l'intensité lumineuse. Le Matisse est réalisée avec des LED ultra-brillants, chauds ou très chauds. Ces LED assurent une reproduction des couleurs optimale du tableau qu'ils éclairent. Ainsi, Monet & Matisse sont encore et toujours au service de la beauté.

[EN]
The impressionists Monet and Matisse were considered determined perfectionists. This collection of fine light fittings is the same. They do not want to stand out, allowing all the attention to be focussed on the painting. Thanks to the unique tube system, various combinations are possible. You can decide yourself what length of fitting or light intensity you wish. Matisse is equipped with warm or ultra-warm Brilliant LEDs. These LEDs guarantee an optimal colour rendering of the picture that they illuminate. So centuries later Monet & Matisse still serve splendour to mankind.

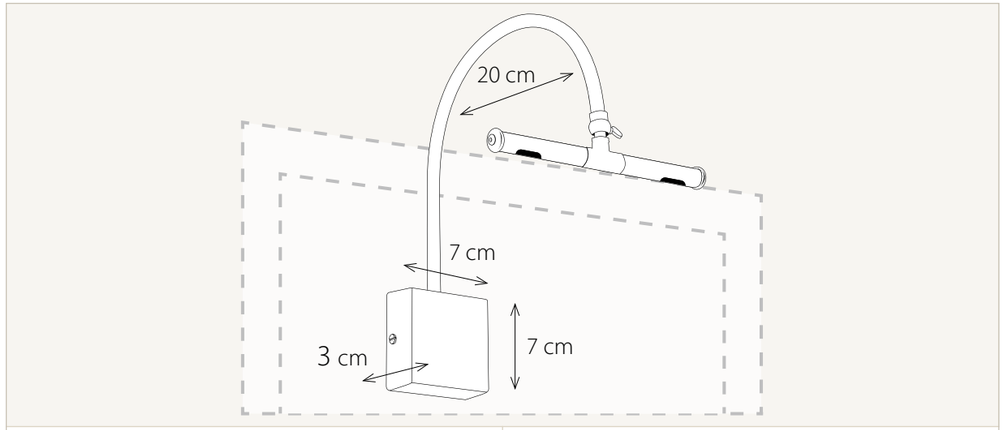

[DE]
Die Impressionisten Monet und Matisse wurden als eigensinnige Perfektionisten betrachtet. Diese Kollektion feiner Lichtarmaturen ist es auch. Sie möchte nicht auffallen, wodurch die gesamte Aufmerksamkeit dem Gemälde gewidmet wird. Aufgrund des einzigartigen Rohrsystems sind verschiedene Kombinationen möglich. Sie können sowohl die Länge der Armatur als auch die Lichtintensität selbst bestimmen. Matisse ist mit warmen oder ultrawarmen Brilliant-LEDs ausgestattet. Diese LEDs garantieren eine optimale Farbwiedergabe des Porträts, das sie beleuchten. Und so sind Monet & Matisse Jahrhunderte später noch immer Diener der Schönheit.

Rubens Table Bronze

Rubens

[NL]
De Antwerpse barokschilder Peter Paul Rubens stond vooral bekend om zijn schilderijen met volslanke figuren. Daarom is deze collectie voorzien van een slanke voet en een vollere lamphouder. Oorspronkelijk ging de lamphouder altijd gepaard met kaarsvormige gloeilampjes. Tegenwoordig is hij ook combineerbaar met indraaibare E14-LED's.

[FR]
Le peintre baroque anversois Pierre Paul Rubens était célèbre pour ses peintures de figures tout en volutes. C'est pourquoi cette collection est munie d'une tige très fine et d'un socle plus plein. À l'origine, le support de lampe était accompagné d'ampoules en forme de bougie. Aujourd'hui, il est également compatible avec les LED E14 à visser

[EN]
The baroque artist Peter Paul Rubens from Antwerp was especially renowned for his paintings of curvaceous figures. That is why this collection has a slender base and a larger lampholder. Originally the lampholder was designed to always have candle-shaped light bulbs. Nowadays it can be combined with screw E14 LEDs.

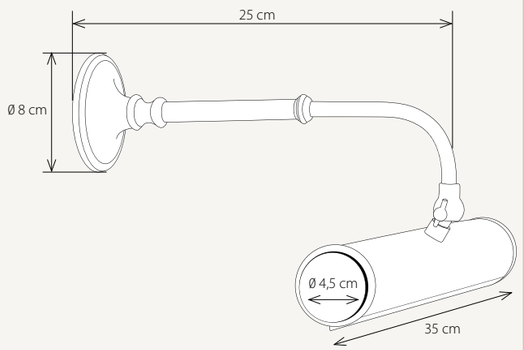

[DE]
Der Antwerpener Barockmaler Peter Paul Rubens war vor allem für seine Gemälde mit vollschlanken Figuren bekannt. Darum ist diese Kollektion mit einem schlanken Fuß und einem volleren Lampenhalter versehen. Ursprünglich wurde der Lampenhalter immer mit kerzenförmigen Glühlampen kombiniert. Nun kann er auch mit einschraubbaren E14-LEDs kombiniert werden.

Realisation Den Stal/ Dauby Bron: Wonen met stijl van Patrick Retour

MoeMoe

[NL]

Verse soep, heerlijk geurende taarten, zelfgebakken brood, stoemp met worst en… gezellige lampjes met kleine, authentieke glazen kapjes. Dát is de sfeer van grootmoeders keuken. Geen wonder dat die kleine, glazen lampenkapjes de basis vormen voor deze collectie. Elk detail van dit armatuur heeft veel aandacht gekregen: de fijne haakjes, de mooie draaiknopjes, de getorste stoffen draden. De Engelse fitting maakt dat deze collectie zowel met koelkastlampjes als met halogeenspots verkrijgbaar is.

[FR]

Soupe fraîche, tartes parfumées, pain maison, stoemp-saucisses et ... confortables lumières avec d'authentiques abat-jour de verre. Voilà l'atmosphère de la cuisine de grand-mère. Pas étonnant que les petits abat-jour de verre soient à la base de cette collection. Chaque détail de cette lampe a reçu les plus grands soins: les fins supports, les beaux interrupteurs, les fils torsadés. Le soquet anglais rend cette collection compatible tant pour des ampoules de frigo que pour des spots halogènes

[EN]

Fresh soup, deliciously smelling cakes, home-made bread, sausage with mash and… pretty lamps with little, authentic glass shades. That is the atmosphere in grandmother's kitchen. No wonder that these little, glass lamp shades are the theme for this collection. A great deal of attention has been paid to every detail of this fixture: the slender hooks, the beautiful rotary knobs, the twisted fabric cables. The bayonet fitting means that this collection is available both with refrigerator lights as well as halogen spots.

[DE]

Frische Suppe, herrlich duftende Torten, selbstgebackenes Brot, Kartoffelbrei mit Bratwurst und gemütliche Lampen mit kleinen, authentischen Glaskappen. Das ist Großmutters Küche. Kein Wunder, dass die kleinen Glaslampenkappen die Grundlage dieser Kollektion formen. Jedem Detail dieser Armatur wurde viel Aufmerksamkeit geschenkt: die dünnen Haken, die hübschen Drehschalter, die gedrehten Stoff-kabel. Die englische Fassung sorgt dafür, dass diese Kollektion sowohl mit Kühlschranklampen als auch mit Halogenspots erhältlich ist.

Bompa

[NL]
De Bompa-collectie is geheel volgens de wetten van de logica verwant aan de collectie Moemoe. Al hebben de wand- en plafondarmaturen van Bompa allemaal een vaste arm. De collectie bevat mooie glazen kapjes en fijne staafjes met veel detail. U kan kiezen uit ronde of vierkante voetjes. Deze schattige lampjes vinden hun plaats in menig landelijk interieur.

[FR]
La collection Bompa est entièrement conforme aux logiques qui ont présidé à la conception de la collection Moemoe. Les luminaires de mur et de plafond Bompa ont tous un bras fixe. La collection comprend de beaux abat-jour de verre et des bras délicats très détaillés. Vous pouvez choisir les socles ronds ou carrés. Ces luminaires adorables trouveront leur place dans de nombreux intérieurs ruraux.

[EN]
The Bompa collection is according to the laws of logic related to the Moemoe collection. Although the Bompa wall and ceiling fixtures all have a fixed arm. The collection contains beautiful glass shades and fine, greatly detailed rods. You can opt for a circular or rectangular base. These pretty lamps look at home in any rustic interior.

[DE]
Die Bompa-Kollektion entspricht den Gesetzen der Logik, ähnlich der Kollektion Moemoe. Nur haben die Wand- und Deckenarmaturen von Bompa alle einen festen Arm. Die Kollektion umfasst schöne Glaskappen und dünne Stäbe mit viel Details. Sie können aus runden oder quadratischen Füßen wählen. Diese niedlichen Lämpchen finden ihren Platz in den meisten ländlichen Einrichtungen.

Bainwat

[NL]
Dankzij de champagnevormige opalen glaasjes zorgt deze schitterende collectie van badkamerverlichting voor een goed verdeeld diffuus licht. Deze verlichting maakt de Bainwat-collectie ideaal om naast of boven spiegels te hangen. De smalle, glazen kapjes verbergen de dieperliggende lichtbron. Daardoor is verblinding haast uitgesloten, maar tegelijk werpt deze verlichting een goed verdeeld licht op het gelaat en de omgeving. De Bainwat-collectie heeft een ietwat Engelse landelijke sfeer. Het chroom, dat vaak wordt gekozen, sluit het best aan bij het in badkamers veel voorkomende kraanwerk.

[FR]
Grâce à son verre opalin en forme de verre de champagne, cette belle collection de luminaires de salle de bain procure une lumière diffuse bien répartie. Son éclairage rend la collection Bainwat idéale pour être placée à côté ou au-dessus des miroirs. Les fines nuances du verre masquent l'origine de la lumière. L'éblouissement est ainsi pratiquement impossible et cet éclairage diffuse une bonne lumière bien répartie sur le visage et l'environnement. La Collection Bainwat a quelque chose du style anglais rural. Le chrome, qui est souvent choisi, convient le mieux pour l'équipement des salles de bains.

[EN]
The champagne-glass shape of these opaque glasses gives this beautiful collection of bathroom lighting an evenly spread diffused light. This lighting makes the Bainwat collection ideal to hang alongside or above mirrors. The narrow, glass shades hide the underlying light source. Thus glare is almost impossible, but at the same time this lighting spreads light evenly on your face and on the surroundings. The Bainwat collection has a somewhat English country feel. Chrome, the most popular choice, matches perfectly the taps used in many bathrooms.

[DE]
Dank den champagnerförmigen Opalgläsern sorgt diese prächtige Badezimmerbeleuchtungs-Kollektion für ein gut verteiltes diffuses Licht. Dieses Licht sorgt dafür, dass die Bainwat-Kollektion neben oder über Spiegeln ideal ist. Die schmalen Glaskappen verbergen die tieferliegende Lichtquelle. Dadurch ist Blendung quasi ausgeschlossen, aber wirft die Beleuchtung ein gut verteiltes Licht auf das Gesicht und die Umgebung. Die Bainwat-Kollektion bietet eine etwas englische ländliche Atmosphäre. Der häufig gewählte Chrom passt am besten zu den Armaturen des Badezimmers.

Barron

[NL]
De Barron-collectie is verlichting op zijn puurst. De basis is niets minder dan een naakte Engelse fitting. De fijne details geven dit compacte en transparante armatuur een technische uitstraling en een ferme snuif authenticiteit. In de meerdere fittingen passen de schattige koelkastlampjes die zorgen voor een algemeen omgevingslicht. Door de verscheidene kleine lampjes naast elkaar te plaatsen, komt het licht heel verspreid over.

[FR]
La collection Barron, c'est la lumière à l'état pur. La base n'est rien de plus qu'un soquet anglais nu. Les petits détails confèrent à ce dispositif compact et transparent un aspect tech et une authenticité affirmée. Les mignonnes lampes de frigo trouvent leur place dans les soquets et procurent un éclairage général ambiant. Les multiples petites lumières placées côte à côte produisent une lumière englobante.

[EN]
The Barron collection is lighting in its purest form. The base is nothing less than a bare bayonet fitting. The fine details give this compact and transparent fitting a technical look and a real sense of authenticity. The numerous fittings match the pretty refrigerator lights which provide a general ambient light. Placing various little lamps next to each other, gives a very scattered, diffused light.

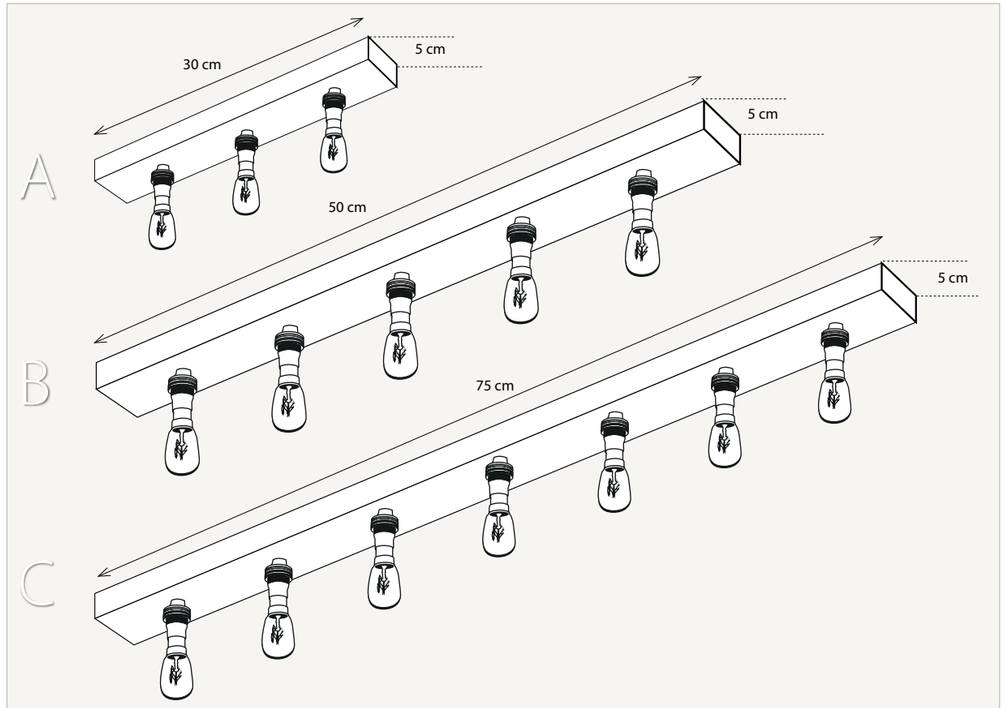

[DE]
Die Barron-Kollektion ist reine Beleuchtung. Die Basis ist nichts weniger als eine nackte englische Fassung. Die dezenten Details verleihen dieser kompakten und transparenten Armatur eine technische Ausstrahlung und einen ordentlichen Hauch Authentizität. In die Mehrfachfassungen passen die niedlichen Kühlschranklampen, die für ein allgemeines Umgebungslicht sorgen. Wenn man die verschiedenen kleinen Lampen nebeneinander anordnet, erscheint das Licht sehr verteilt.

Barron 9L on Square Base Bronze

Filou

[NL]
De Filou is de meest eenvoudige collectie. Een klassieke draaifitting op een standaard voetje, hierin passen alle navolgelingen van de Edison-lamp. Puur en overal toepasbaar. Deze collectie werd recent uitgebreid met enkele nieuwe modellen, op armen, als tafellamp, hangend aan een kabel en als lichtpaal(tje) voor buiten.

[FR]
Le Filou est la plus simple des collections. Un pivot classique monté sur un pied standard, il convient pour tous les adeptes de la lampe Edison. Pur et applicable partout. Cette collection a été récemment élargie par de nouveaux modèles, sur bras comme lampe de table, suspendu à un câble ou sur un pieu de lumière, à l'extérieur.

[EN]
Filou is the simplest collection. A classic screw fitting on a standard base: all the successors of the Edison lamp fit. Pure and useable everywhere. This collection was recently extended with a few new models: on arms as a table lamp, hanging from a cable and as vitrine pole(s) for outdoors.

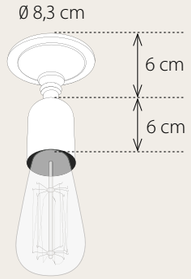

[DE]
Filou ist die einfachste Kollektion. Eine klassische Drehfassung auf einem Standardständer nimmt alle Nachfolger der Edison-Lampe auf. Pur und überall anwendbar. Diese Kollektion wurde kürzlich um einige neue Modelle ergänzt: auf Armen als Tischlampe, hängend an einem Kabel und als Lichtpfahl für draußen.

Sévère Capuche & Fiston Capuche

[NL]
De collectie Capuche bevat armaturen met stoffen kapjes. Langwerpig, rechthoekig of conisch. De voet is lang en slank, of breed en stevig. In combinatie met de lichtdoorlatende kapjes zijn deze armaturen bijzonder sfeervol.(Indien gewenst kunnen ze lampen optimaal verhullen.)

[FR]
La collection Capuche propose des abat-jour recouverts de tissu, allongés, rectangulaires ou coniques. Le pied est long et mince, ou large et robuste. En combinaison avec les abat-jour translucides, ce sont des abat-jour particulièrement atmosphériques. (Si vous le souhaitez, ils peuvent cacher des lampes de manière optimale.)

[EN]
The Capuche collection includes fittings with fabric shades. Oblong, rectangular or conical. The base is long and slender, or broad and solid. In combination with the translucent shades, these fixtures create a special atmosphere. (If required, they can optimally conceal lamps.)

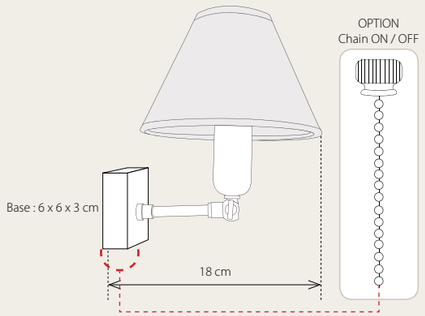

[DE]
Die Kollektion Capuche umfasst Armaturen mit Stoffkappen. Länglich, rechteckig oder konisch. Der Fuß ist lang und schlank oder breit und stabil. In Kombination mit den lichtdurchlässigen Kappen sind diese Armaturen besonders stimmungsvoll. (Wenn gewünscht können sie die Lampen optimal verhüllen).

Project hotel : MANOIR DE SURVILLE NORMANDIE

Q-Bri Pendant Chrome Linestra

Q-Bri

[NL]

De Q-Bri is een strakke minimalistische Up & Down-lighter met een strakke licht aftekening op de muur of tafel. De ondiepe wandversie is ideaal langs een smalle gang of nauwe trap. Verkrijgbaar in pendel, tafelmodel of in verschillende lengtes als wandmodel. U heeft keuze uit een halogeen of Superior² LED's. Met de dubbele LED versie kunt u zelf bepalen welke lichtsterkte of Kelvin-temperatuur u wenst. Optioneel kunnen we met een Kelvin Killer-filter zelfs de kleurtemperatuur laten dalen tot 1800 Kelvin, wat een bijzonder aangenaam warm effect geeft.

Nieuw: Nu ook beschikbaar als opbouw en semi opbouw richtbare spot.

De Q-Bri spot is een combinatie van fuctioneel en/of supergezellig zacht licht. U kan kiezen uit de zuinige en zeer warme indirecte LED kring, en/of de krachtige gerichte halogeen kring. 1 Toestel maar 3 totaal verschillende licht sferen ! De suspension lantern creëert een veelzijdige variatie in licht, omdat hij zowel naar boven als naar onderen apart bedienbaar is, met keuze uit warme of koude sfeer.

[FR]

Le Q-Bri est un élégant luminaire minimaliste Up & Down avec une lumière franche, pour un mur ou sur une table. La version murale est idéale le long d'un étroit corridor ou d'un escalier étroit. Disponible en suspension, de table ou en différentes longueurs en version murale. Vous pouvez choisir entre un halogène ou un LED Superior². Dans sa version à double LED, vous pouvez même décider de l'intensité de l'éclairage ou de la température Kelvin que vous désirez. En option, nous pouvons encore baisser la température de couleur avec un Killer-filtre, jusqu'à 1800° Kelvin, ce qui procure un effet chaleureux très agréable.

***Nouveau:** maintenant également disponible en assemblage ou semi-assemblage de spots orientables. Le spot Q-Bri offre une combinaison de douce lumière fonctionnelle et / ou ultra-confortable. Vous pouvez choisir la série de LED indirects économiques et très chaud, ou la série de puissants halogène orientés. Un seul dispositif, mais troix atmosphères lumineuses totalement différentes! Le plafonnier propose une gamme de lumières polyvalente, parce qu'il peut être utilisé séparément, vers le haut ou vers le bas, avec au choix une atmosphère chaude ou froide.*

[EN]

The straight, minimalist Up & Down lighter Q-Bri gives a straight, outlined light on the wall or table. The thinner wall version is ideal for a narrow corridor or staircase. Available in pendant, table version or in various lengths as wall version. You can opt for a halogen or Superior² LEDs. With the dual LED version you can choose which light strength or Kelvin temperature you wish. With a Kelvin Killer filter we even have the option to lower the colour temperature to 1,800 Kelvin, which gives a truly nice warm effect.

New: Now also available as assembled and semi-assembled adjustable spotlight.

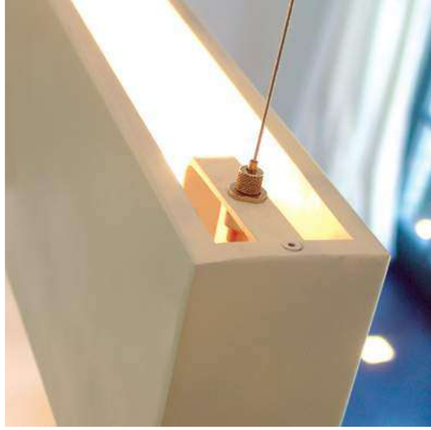

The Q-Bri spot is a combination of functional and/or very cosy soft light. You can opt for the economical and very warm indirect LED ring, or the powerfully directed halogen ring. 1 unit but 2 totally different light atmospheres! The suspension lantern creates a versatile variation of light, because it can be operated separately from above or below, with the option of a warm or cool atmosphere.

[DE]

Q-Bri ist ein geradliniger, minimalistischer Up & Down-Lighter mit einem geraden Lichtabdruck an Wand oder Tisch. Die untiefe Wandversion ist ideal an einem schmalen Flur oder einer engen Treppe. Erhältlich als Pendel, Tischmodell oder in verschiedenen Längen als Wandmodell. Sie können aus Halogen oder Superior² LEDs wählen. Mit der doppelten LED-Version können Sie selbst bestimmen, welche Lichtstärke oder Kelvin-Temperatur Sie wünschen. Optional können wir mit einem Kelvin Killer-Filter die Farbtemperatur sogar auf 1800 Kelvin senken, was einen besonders angenehmen und warmen Effekt ergibt.

***Neu:** Jetzt auch als richtbarer Aufbau- und Semi-Aufbau-Spot erhältlich.*

Der Q-Bri-Spot ist eine Kombination aus funktionellem und/oder besonders gemütlichem, weichem Licht. Sie wählen aus dem sparsamen LED-Kreis oder dem leistungsstarken, gerichteten Halogenkreis. Ein Gerät, aber zwei vollkommen unterschiedliche Lichtstimmungen. Die Suspension Lantern schafft eine vielseitige Lichtvariation, da sie – nach Wahl mit kalter oder warmer Stimmung – sowohl nach oben als auch unten einzeln zu bedienen ist.

[NL]
In de buik van dit strakke toestel zit een dubbele Superior² LED-strip verborgen. Het diffuus licht is naar beneden gericht en ideaal als werkverlichting op een bureau, keuken of aanrecht. Dankzij onze moderne LED-technologie kunt U de verlichting dimmen, waardoor de Kelvin-kleurtemperatuur warmer zal worden. Men kan de strakke vormgeving van het minimalistische profiel combineren met een fijne stalen ophangkabel of juist contrasteren met een brute ketting die zorgt voor een bijzondergeheel.Erzijnookverbindingsstukkenbeschikbaarwaarmeewedetoestellen eindeloos kunnen koppelen.

[FR]
Dans le ventre de cet appareil élégant est caché une double bande de LED Superior². La lumière diffusée est dirigée vers le bas et est idéale comme lampe de travail sur un bureau ou sur un plan de travail dans une cuisine. Grâce à notre technologie LED moderne, vous pouvez réduire l'intensité lumineuse, de sorte que la température de couleur Kelvin sera plus chaude. On peut combiner le design élégant et minimaliste avec un fin câble de suspension en acier ou le contraster avec une chaîne brute qui crée une combinaison étonnante. Les éléments qui le composent peuvent encore être modulés et combinés à l'infini.

[EN]
There is a dual Superior² LED strip hidden in the centre of this sleek unit. The diffused light is directed downwards and is ideal lighting for a worktop, desk or kitchen. Thanks to our modern LED technology, you can dim the lighting, which makes the Kelvin colour temperature warmer. You can combine the sleek design of the minimalist profile with a thin steel suspension cable or go for contrast with a rustic chain that creates a special combination. There are also connection pieces available so that we can endlessly combine components.

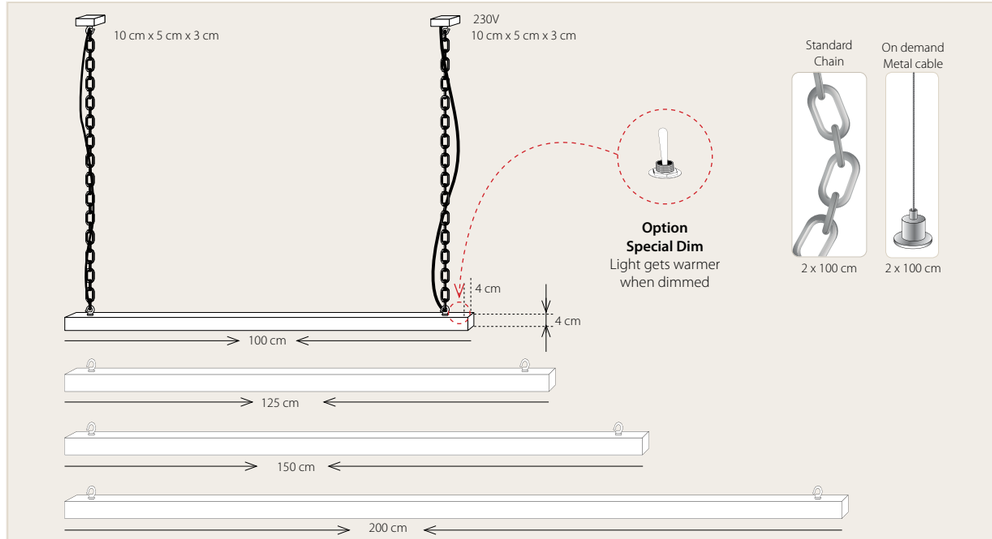

[DE]
Im Bauch dieses geradlinigen Geräts ist ein doppelter Superior² LED-Strip verborgen. Das diffuse Licht ist nach unten gerichtet und ideal als Arbeitsbeleuchtung auf einem Schreibtisch, in der Küche oder an der Spüle. Dank unserer modernen LED-Technologie können Sie die Beleuchtung dimmen, sodass die Kelvin-Farbtemperatur wärmer wird. Man kann das geradlinige Design des minimalistischen Profils mit einem dünnen Stahlkabel zum Aufhängen kombinieren oder mit einer groben Kette einen Kontrast herstellen, der für einen besonderen Eindruck sorgt. Es gibt auch Verbindungsstücke, mit denen man die Geräte endlos verbinden kann.

Pipilier 70cm LED

Pipilier

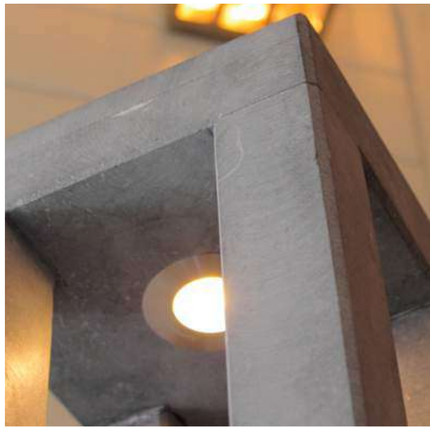

[NL]
Is dit verlichting of een kunstwerk? Door zijn strakke vorm lijkt de Pipillier misschien eerder op het tweede. Toch gaat het om een verrassende en stijlvolle lichtarmatuur, waarin het licht bovenaan verscholen zit, tussen de 4 steunpilaren. Het spreekt voor zich dat deze constructie een uiterst sfeervolle, indirecte belichting oplevert. Het toestel is vervaardigd uit Belgische blauwe hardsteen en past perfect aan de rand van een terras, pad of zwembad.

[FR]
Est-ce un luminaire ou une œuvre d'art? Par l'élégance de sa forme, le Pipillier semble plutôt être une œuvre d'art. Il n'en est pas moins un luminaire surprenant et élégant, au sommet duquel se cache la lumière, entre quatre piliers de pierre. Il va sans dire que cette construction procure un éclairage extrêmement attrayant et indirect. Le dispositif est constitué de pierre bleue de Belgique et convient à la perfection aux bords d'une terrasse, d'un sentier ou de la piscine.

[EN]
Is this lighting or an art object? With its sleek shape, the Pipillier perhaps looks more like the latter. Yet this is a surprising and stylish light fixture, in which the light is hidden in the top, between the 4 pillars. It goes without saying that this construction provides extremely atmospheric, indirect lighting. The unit is made from Belgian bluestone and is a perfect match along the edge of a terrace, path or swimming pool.

[DE]
Ist es Beleuchtung oder ein Kunstwerk? Aufgrund der geradlinigen Form scheint Pipillier eher das zweite zu sein. Und doch handelt es sich um eine erstaunliche und stilvolle Lichtarmatur, worin das Licht oben, zwischen den 4 Stützpfeilern verborgen ist. Selbstverständlich ergibt diese Konstruktion eine besonders stimmungsvolle, indirekte Beleuchtung. Das Gerät besteht aus belgischem Blaustein und passt perfekt an den Rand einer Terrasse, eines Wegs oder Swimmingpools.

Beautique

[NL]
Welkom aan boord! De Beautique-reeks behoort tot de maritieme collectie van Authentage. Het ontwerp van de ingebouwde versie verwijst naar de stoere uitlaat van een motorjacht. De verborgen spot gooit zijn licht indirect naar boven of beneden. De opbouwversie is afgeleid van de typische vorm van de grote luchthappers die vroeger op het dek van stoomschepen werden geplaatst. De dieperliggende, indirecte verlichting zorgt voor een aparte, maritieme sfeer, alsof je echt op de golven kabbelt. Beautique is een geknipte sfeermaker voor mensen met een passie voor varen of houden van de zeesfeer.
Nieuw: De Beautique-deck is nu ook verkrijgbaar op pen en kan zo perfect dienen als verlichting over een pad of tussen begroeiing. Optioneel kan het ook met het vuureffect van onze Bellefeu-collectie.

[FR]
Bienvenue à bord! La série Beautique fait partie de la collection maritime d'Authentage. Le design de la version d'intérieur fait référence aux hublots d'un yacht. Les spots caché projettent leur lumière indirecte vers le haut ou vers le bas. La version sur pied est dérivée de la forme typique des prises d'air qui étaient placées sur le pont des navires à vapeur. L'éclairage indirect profond crée une sensation particulière, maritime, comme si vous étiez vraiment bercés par le clapotis des vagues. Beautique est un générateur de bonne humeur, pour tous ceux qui ont une passion pour la voile ou la mer.
***Nouveau:** Le pont Beautique est maintenant disponible en version d'extérieur et convient aussi parfaitement pour éclairer un sentier ou éclairer un parterre. En option, il peut aussi fonctionner avec l'effet d'âtre de notre collection Bellefeu.*

[EN]
Welcome on board! The Beautique series belongs to the Authentage maritime collection. The design of the built-in version relates to the robust exhaust on a motor yacht. The hidden spot throws its light indirectly upwards or downwards. The built-in version is based on the typical shape of the large air scoops that were mounted on the deck of steamships in olden days. The deeper built-in, indirect lighting provides a distinct, maritime atmosphere, as if you are really rippling on the waves. Beautique is a perfect mood creator for people who are passionate about sailing or love the sea atmosphere.
New: The Beautique deck is now also available as pole and can be the perfect lighting over a path or between shrubs. The fire effect is another option in our Bellefeu collection.

[DE]
Willkommen an Bord! Die Beautique-Serie gehört zur maritimen Kollektion von Authentage. Das Design der Einbauversion bezieht sich auf den coolen Auspuff einer Motorjacht. Der verborgene Spot wirft sein Licht indirekt nach oben oder unten. Die Aufbauversion ist von der typischen Form der großen Lufteinlässe abgeleitet, die früher auf dem Deck von Dampfern vorhanden waren. Die tieferliegende, indirekte Beleuchtung sorgt für eine spezielle, maritime Stimmung, als ob man wirklich auf den Wellen schippert. Beautique ist der geeignete Stimmungsmacher für Menschen, die Schiffe oder Meeresstimmung lieben.
***Neu:** Das Beautique-Deck ist jetzt auch auf einem Stab erhältlich und kann somit als Beleuchtung eines Weges oder zwischen Bepflanzung dienen. Optional kann es auch mit dem Feuereffekt unserer Bellefeu-Kollektion*

Balume Balume Up & Down Bronze

Galed 90° Bronze

Galed

[NL]
Hij lijkt misschien op een mini-UFO of een prachtig blinkende rivierkei, maar de Galed is een discreet buitenarmatuur. Het fraaie design van de platte ronde schijf is uitgerust met heel diepgelegen warme LED's. Deze zorgen voor een minimum aan verblinding en een maximum aan zichtbaar scheerlicht. Perfect voor het aanlichten van een tuinpad, oprit, traptrede of terras. De Galed is ook erg geschikt om zowel binnen als buiten tegen wanden of plafonds te worden gemonteerd.
Nieuw: In plaats van als platte, ronde schijf is deze bijzondere verlichting ook verkrijgbaar als Galed Pole: een zandlopervormig paaltje van 25 of 50 centimeter waarin de LED's verwerkt zitten.

[FR]
Il ressemble peut-être à un bel Ovni ou à une jolie bitte d'amarrage scintillante, mais le Galed est un luminaire extérieur discret. Le beau design du disque est équipé de LED chauds et profonds. Ceux-ci prévoient un minimum d'éblouissement et un maximum de lumière oblique visible. Parfait pour éclairer une allée de jardin, un chemin, un patio ou les marches d'un escalier. Le Galed convient à la fois pour l'intérieur et pour l'extérieur. Il peut être installé sur les murs ou les plafonds.
Nouveau: *À la place du disque plat, cet éclairage très particulier est également disponible en Galed Pole: un pied en forme de sablier de 25 ou 50 centimètres dans lequel sont placés des LED.*

[EN]
It perhaps reminds you of a mini UFO or a beautifully shining pebble, but the Galed is a discrete outdoor fixture. The lovely design of the flat, circular disk is fitted with very deeply built-in warm LEDs. These ensure minimum glare and maximum visible ambient light. Perfect for lighting up a garden path, driveway, steps or terrace. The Galed is also very suitable both indoors as well as outdoors mounted on walls or ceilings.
New: Instead of flat, circular disks, this special lighting is also available as Galed Pole: an hour-glass shaped 25 or 50 centimetre pole with LEDs incorporated.

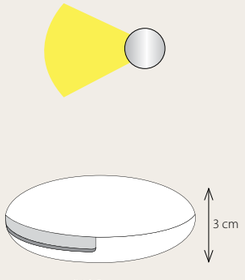

[DE]
Er ähnelt vielleicht einem Mini-UFO oder einem prächtig glänzenden Flusskiesel, aber der Galed ist eine diskrete Außenarmatur. Das tolle Design der flachen runden Scheibe ist mit sehr tief liegenden, warmen LEDs ausgestattet. Diese sorgen für minimale Blendung und maximal sichtbares Streulicht. Perfekt für die Beleuchtung eines Gartenwegs, einer Zufahrt, einer Stufe oder einer Terrasse. Galed eignet sich auch um sowohl drinnen als draußen an Wänden oder Decken montiert zu werden.
***Neu:** Anstatt als flache, runde Scheibe ist diese besondere Beleuchtung auch als Galed Pole erhältlich: Ein sanduhrförmiger Pfahl von 25 bzw. 50 cm, in dem die LEDs verarbeitet sind.*

Subtile

[NL]
Dit is het neusje van de zalm in de categorie 'Hoe geef ik een subliem accent aan muren of badranden'. De Subtile is een mooi afgewerkte grondspot die in diverse afwerkingen mogelijk is: brons, chroom en geborsteld nikkel. De standaardversie kan worden gebruikt met MR16 halogeen- of LED-lampen (12V), of met onze speciale dubbele gekleurde LED-unitmodule op 24V. Die kan indien gewenst worden gecombineerd met onze Dynamic flame dim-unit, waarmee het vlammende licht zal worden geprojecteerd tegen uw muren of objecten. Onze speciale Dim of Entrance Fade dim-unit is ook combineerbaar (vraag gerust meer informatie). De kleine Subtile-versie is voor MR11 halogeen of MR11 LED-lamp (12V). Subtile is verkrijgbaar met helder glas of met het speciale Kelvin Killer-glas. Hiermee kunnen we u het warmst mogelijke LED-licht aanbieden.

[FR]
Voici la crème de la crème dans la catégorie: «Comment donner un accent sublime aux murs de votre habitation ou aux bords de la piscine?». Le Subtile est un éclairage au sol magnifiquement fini, disponible en différentes finitions: bronze, chrome et nickel brossé. La version standard peut être utilisée avec des halogènes MR16 ou des lampes à LED (12V), ou avec notre module bicolore spécial LED à 24V. Ils peuvent être combinés également avec notre moduleur Dynamic flame, grâce auquel la lumière flamboyante sera projetée sur vos murs ou vos objets. Notre Dim of entrance Fade dim-unit est également compatible (n'hésitez pas à demander plus de détails).
La petite version Subtile est conçue pour des lampes MR11 halogène ou pour des LED MR11 (12V). Subtile est disponible avec des verres transparents ou en verre spécial Kelvin Killer. Cela nous permet de vous offrir la plus chaude des lumières LED.

[EN]
This is the crème de la crème in the category 'How do I add a brilliant touch to walls or edges of baths'. The Subtile is a beautifully made ground spot which is available in various finishes: bronze, chrome and brushed nickel. The standard version can be used with MR16 halogen or LED lamps (12V), or with our special dual coloured LED 24V unit module. If required, this can be combined with our Dynamic flame dim unit, which projects the flaming light against your walls or objects. Our special Dim or Entrance Fade dim-unit can also be combined (please ask for more information). The small Subtile version is for a MR11 halogen (12V) or MR11 LED lamp (12V). Subtile is available with clear glass or special Kelvin Killer glass. This is the warmest possible LED light we can offer you.

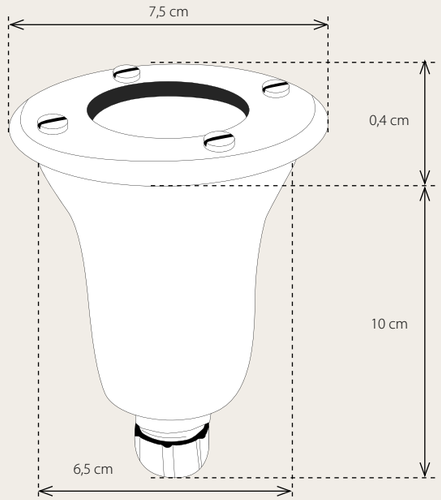

[DE]
Das ist das Beste vom Besten in der Kategorie 'Wie verleihe ich Wänden oder Badrändern dezente Akzente'. Subtile ist ein hübsch verarbeiteter Bodenspot, der in verschiedenen Materialien erhältlich ist: Bronze, Chrom und gebürsteter Nickel. Die Standardversion kann mit MR16 Halogen- oder LED-Lampen (12V) oder mit unseren speziellen, doppelfarbigen LED-Unitmodulen mit 24V verwendet werden. Die kann bei Bedarf mit unserer Dynamic Flame Dim-Unit kombiniert werden, womit das flammende Licht auf Ihre Wände oder Objekte projektiert wird. Unsere spezielle Dim oder Entrance Fade Dim-Unit kann auch kombiniert werden (fordern Sie weitere Informationen an). Die kleine Subtile-Version gibt es für MR11 Halogen (12V) oder MR11 LED-Lampe (12V). Subtile ist mit durchsichtigem Glas oder mit dem speziellen Kelvin Killer-Glas erhältlich. Damit können wir Ihnen das wärmste mögliche.

Charmond

[NL]
De collectie Charmond is speciaal ontworpen voor het accentueren van trapjes, opritten of tuinpaden. De vaste, naar beneden gerichte kop zorgt voor een gerichte indirecte lichtbundel. Onze Superior² LED-unit met warme en ultrawarme LED's geeft op een mooie sfeer in zijn directe omgeving. Door middel van een bijkomende bewegingsdetector en entrance fade dimmer, kan je met de Charmond ook van een warme zacht gedimde sfeer naar een krachtigere aanwezigheids verlichting veranderen en weer terug. We kunnen met trots stellen dat onze LED het al aangename karakter van halogeenverlichting absoluut overtreft. Deze collectie is perfect combineerbaar met onze collecties Micro, Macro, Balume en Galed.

[FR]
La collection Charmond est spécifiquement conçue pour mettre en évidence les escaliers, les allées et les sentiers du jardin. Sa tête fixe dirigée vers le bas fournit un faisceau focalisé de lumière indirecte. Notre unité Superior² LED, avec ses LED chauds et ultra-chauds, donne à pleine puissance une atmosphère agréable dans son voisinage immédiat. Grâce à un détecteur de mouvement supplémentaire et à un entrance fade dimmer, vous pouvez aussi faire passer la Charmond d'une atmosphère douce et chaleureuse à un éclairage puissant, et réciproquement. Nous pouvons dire avec fierté que notre LED surpasse le caractère agréable de l'éclairage halogène. Cette collection est parfaitement compatible avec nos collections Micro, Macro, Balume et Galed

[EN]
The Charmond collection is specially designed to accentuate steps, driveways or garden paths. The fixed, downward facing head provides an indirect beam of light. Our Superior² LED unit with warm and ultra-warm LEDs at full power creates a lovely atmosphere in the direct surroundings. With the Charmond you can also change from a warm, softly-dimmed atmosphere to more powerful full-on lighting and back again by adding a motion detector and entrance fade dimmer. We can proudly say that our LED definitely surpasses the already pleasant features of halogen lighting. This collection can be perfectly combined with our Micro, Macro, Balume and Galed ranges..

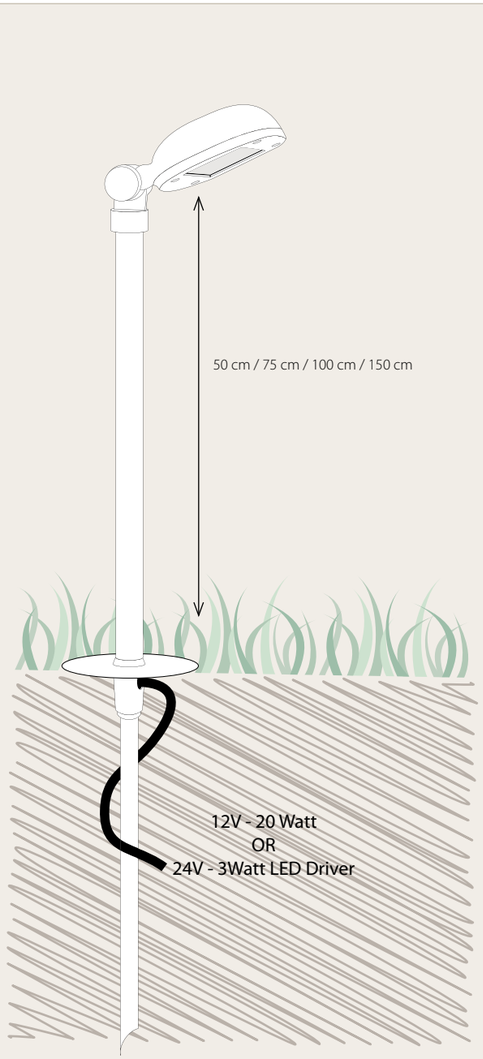

[DE]
Die Kollektion Charmond wurde speziell für die Akzentuierung von Treppen, Zufahrten oder Gartenwegen entworfen. Der feste, nach unten gerichtete Kopf sorgt für ein gerichtetes, indirektes Lichtbündel. Unsere Superior² LED-Unit mit warmen und ultrawarmen LEDs taucht ihre direkte Umgebung in eine schöne Stimmung. Anhand eines zusätzlichen Bewegungsmelders und Entrance Fade Dimmer können Sie mit dem Charmond auch von einer warmen, leicht gedimmten Stimmung in eine stärkere Anwesenheitsbeleuchtung wechseln und umgekehrt. Wir können mit Stolz sagen, dass unsere LEDs den schon angenehmen Charakter von Halogenbeleuchtung noch übertreffen. Diese Kollektion lässt sich perfekt mit unseren Kollektionen Micro, Macro, Balume und Galed kombinieren.

Micro

[NL]
De Micro is een buitenspot die een hele waaier van toepassingen kent. De pin-versie kan gemakkelijk in de tuin worden verplaatst en is ideaal voor het aanlichten van bloemenperkjes, beelden of andere objecten. Hij kan als het ware meegroeien met de beplanting en de variëteit die de seizoenen met zich meebrengen. Door de verplaatsbare terrasversie en de verscheidene wandversies is deze collectie uiterst compleet. De diepergelegen LED of halogeenlamp maakt de verblinding van deze spot uiterst miniem. Als u de LED-verlichting combineert met ons speciaal ontworpen Kelvin Killer-glaasje bekomt u met gemak dezelfde warme kleur als bij halogeenverlichting.
Nieuw: Onze publicity-versie is speciaal ontworpen voor het uitlichten van publiciteitspanelen.

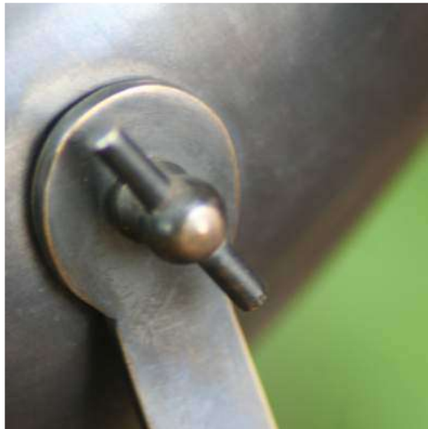

[FR]
Le Micro est une lampe de plein air avec une large gamme d'applications. La version Pin peut être déplacée facilement dans le jardin et est idéale pour l'éclairage des parterres de fleurs, des statues ou d'autres objets. Il peut vraiment évoluer en même temps que le jardin et le passage des saisons. Avec la version terrasse amovible et les diverses version murales, cette collection est très complète. Les LED profonds ou les ampoules halogène permettent de limiter fortement l'éblouissement. Si vous combinez l'éclairage LED avec notre verre Kelvin Killer spécialement conçu, vous pouvez aisément obtenir la même couleur chaude qu'avec un éclairage halogène.
***Nouveau:** Notre version publicity est spécialement conçue pour l'éclairage des panneaux publicitaires.*

[EN]
The Micro is an outdoor spot with a wide range of applications. The pin version is easy to place in the garden and is ideal for illuminating flower beds, statues or other objects. It is as if it can grow with the plants and the variety that the seasons bring. Thanks to the moveable terrace version and the various wall versions this collection is truly complete. The deeper lying LED or halogen lamp reduces the glare from this spot to an absolute minimum. If you combine the LED lighting with our specially designed Kelvin Killer glass, you can easily get the same warm colour as with halogen lighting.
New: Our publicity version is specially designed to illuminate publicity boards.

[DE]
Der Micro ist ein Außenspot mit vielen Anwendungsmöglichkeiten. Die Pin-Version kann einfach im Garten aufgestellt werden und ist ideal zum Beleuchten von Blumenbeeten, Skulpturen oder anderen Objekten. Sie kann sozusagen mit der Bepflanzung und der Abwechslung, die die Jahreszeiten mit sich bringen, mitwachsen. Dank der mobilen Terrassenversion und den verschiedenen Wandversionen ist diese Kollektion absolut vollständig. Die tieferliegende LED oder Halogenlampe reduziert die Blendung durch diese Spots extrem. Wenn Sie die LED-Beleuchtung mit unserem speziell entworfenen Kelvin Killer-Glas kombinieren, erhalten Sie problemlos dieselbe warme Farbe wie bei Halogenbeleuchtung.
***Neu:** Unsere Publicity-Version wurde speziell für die Beleuchtung von Werbeschildern entworfen.*

Macro

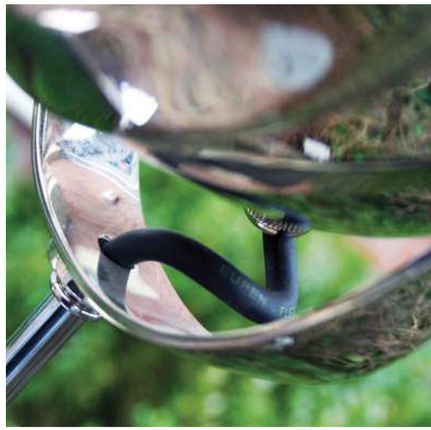

[NL]
De Macro is de grote broer van de zeer gewaardeerde Micro-collectie. Ook hij beschikt over de vele voordelen van de Micro, zoals de makkelijk bereikbare, diepergelegen lichtbron met minimale verblinding. Dankzij de vele mogelijkheden van bundels en lichtsterkten kunt u uw tuin- of terrasverlichting perfect afstellen op uw wensen. Zelf gebruiken wij graag de AR111-lamp van 50 Watt en 4°-bundel. Die zorgt voor een spectaculair contrast van uw mooiste nabije of vergelegen objecten, planten of tafels. De Powerprojector maakt de Macro zelfs geschikt voor het aanlichten van grote bomen en muren. Fantastisch mooi, en 's avonds perfect zichtbaar vanuit uw woning. De Macro-collectie verandert uw tuin in een decor van 1001 nacht.

[FR]
Macro est le grand frère de la très appréciée collection Micro. Il présente les nombreux avantages de la Micro, tels que la facilité d'emploi et la modularité ou encore la source de lumière profonde évitant l'éblouissement. Grâce à la grande variété d'ampoules et d'intensités disponibles, vous pouvez régler l'éclairage de votre jardin ou de votre terrasse selon vos désirs. Pour notre part, nous aimons utiliser l'ampoule AR111 de 50 Watt et 4 °, qui crée un contraste étonnant entre les objets proches ou lointains, plantes ou mobilier. Le Powerprojector rend même Macro approprié pour éclairer de grands arbres et des murs. Fantastiquement belle, la soirée est parfaitement visible de votre domicile. La collection Macro transforme votre jardin en décor des 1001 nuit

[EN]
The Macro is the big brother of the highly valued Micro collection. It too has the many advantages of the Micro, such as the easy to reach, deeper placed light source with minimum glare. Thanks to the many beam and light intensity options, you can adjust your garden or terrace lighting perfectly to suit your wishes. We ourselves like using the AR111 50 Watt and 4° beam lamp. This provides a spectacular contrast for your most beautiful nearby or distant objects, plants or tables. Thanks to the Power projector the Macro suitable for even illuminating large trees and walls. Splendidly beautiful and perfectly visible from your house in the evening. The Macro collection transforms your garden into a setting for 1001 nights.

[DE]
Macro ist der große Bruder der sehr geschätzten Micro-Kollektion. Er verfügt auch über die vielen Vorteile des Micro, wie die einfach erreichbare, tiefliegende Lichtquelle mit minimaler Blendung. Dank der vielen Möglichkeiten von Bündeln und Lichtstärken können Sie Ihre Garten- oder Terrassenbeleuchtung perfekt auf Ihre Wünsche abstimmen. Wir selbst bevorzugen die AR111-Lampe mit 50 Watt und 4°-Bündel. Sie sorgt für einen spektakulären Kontrast Ihrer schönsten nahe oder weiter entfernten Objekte, Pflanzen oder Tische. Mit dem Powerprojektor ist der Macro selbst für die Beleuchtung von großen Bäumen und Wänden geeignet. Phantastisch schön und abends aus Ihrem Haus perfekt sichtbar. Die Macro-Kollektion verändert Ihren Garten in ein Dekor aus 1001 Nacht.

Elébase

[NL]
De Elébase heeft een puur design: de mooi afgewerkte stang, met aansluitend een zacht gebogen schotel en een glazen stulp. De collectie is bij voorkeur te voorzien van een authentieke kooldraadlamp. Maar ook onze nieuwste LED-lampen in kooldraadvorm passen er perfect bij. Als binnenarmatuur kan de Elébase perfect worden gebruikt boven een tafel of keukenaanrecht. Als buitenarmatuur staat ze heel mooi naast of boven een inkomdeur, zodat ze de toegang tot de woning kan verlichten.

[FR]
L'Elébase a un design pur, la tige joliment finie, une belle courbe qui se prolonge d'une coupe doucement arrondie et d'un globe de verre. La collection est de préférence munie d'une authentique lampe à filament de carbone. Mais nos dernières lampes à LED en forme de filament de carbone conviennent aussi parfaitement. Comme lampe d'intérieur, Elébase peut s'adapter parfaitement à une table ou un comptoir de cuisine. En luminaire extérieur, elle est très jolie à côté ou au-dessus d'une porte d'entrée, pour faciliter l'accès à la maison.

[EN]
The Elébase is an authentic design: the beautifully finished rod, connected to a softly curved bowl and a glass hood. The collection goes best with an authentic carbon filament lamp. But our latest LED lamps in carbon filament form are a perfect match. As indoor fixture, the Elébase can look perfect above a table or kitchen worktop. As outdoor fixture it looks great next to or above a main door, so that it can light up the entrance to the house.

[DE]
Elébase hat ein reines Design: die perfekt verarbeitete Stange mit anschließend einer weich gebogenen Schale und einer Glasglocke. Die Kollektion ist vorzugsweise mit einer authentischen Kohlenfadenlampe zu versehen. Aber auch unsere neusten LED-Lampen in Kohlefadenform passen perfekt dazu. Als Innenarmatur passt Elébase perfekt über einen Tisch oder die Küchenanrichte. Als Außenarmatur kommt sie neben oder über einer Eingangstür voll zur Geltung. Hier kann sie den Zugang zum Haus beleuchten.

Elégance petite Bronze

Project Construmax

Elégance

[NL]
Elégance combineert de sierlijkheid van de dunne arm met de stoere authenticiteit van de ambachtelijke vervaardigde kelkvorm. Deze kelkvorm schermt de lichtbron maximaal af, waardoor het ondergelegen verlichte geheel het best tot zijn recht komt. De elegante boogvorm van de arm maakt het toestel erg decoratief boven een voordeur of poort.

[FR]
Élégance allie la grâce de son bras mince avec l'authenticité de son abat-jour artisanal robuste en forme de calice. Ce calice protège la source de lumière et donne l'impression que c'est de lui que jaillit la lumière. La forme courbée élégante du bras rend le dispositif très décoratif au dessus d'une porte ou d'un portail.

[EN]
Elégance combines the decoration of the thin arm with the robust authenticity of the traditionally made bell shape. This bell shape provides maximum protection of the light source, which results in the perfect downward light. The elegant curved arc of the arm makes this lamp very decorative above a front door or gate.

[DE]
Elégance kombiniert die Zierlichkeit des dünnen Arms mit der robusten Authentizität der handwerklich hergestellten Kelchform. Diese Kelchform schirmt die Lichtquelle maximal ab, sodass der darunter liegende beleuchtete Teil perfekt zur Geltung kommt. Dank der eleganten Bogenform des Arms ist das Gerät über einer Eingangstür oder einem Tor sehr dekorativ.

Project : Warshaw Poland

Gracieuze

[NL]
Een klasieke lantaarn, volledig met de hand gevormd in ambachtelijk bewerkte messing. Old style van vormgeving, maar nieuw van techniek.
De gracieuze heeft optioneel de mogelijkheid om met een 2e circuit, in de hemel van het armatuur ingebouwde LED's te gebruiken. Deze kunnen dan worden gecombineerd met de mooie kooldraadlampen. Door de verscheidenheid van types kan de Gracieuze op zo goed als alle plaatsen toegepast worden: tegen de wand, op het terras, op poortpaal en op lantaarnpaal.

[FR]
Une lanterne classiques de style, entièrement façonnée en laiton sculpté à la main. Old style de conception, mais contemporaine de technologie.
La Gracieuze peut être dotée, en option, d'un 2ème circuit de LED intégré dans le ciel de l'appareil. Ceux-ci peuvent alors être combinés avec les belle lampes à filament de carbone. La diversité des modèles de Gracieuze en font une lampe qu'on peut placer en tous lieux: sur un mur, sur la terrasse, sur un portail ou en lampadaire.

[EN]
A classic lantern, entirely handmade in traditionally worked brass. Old-fashioned design, but a new technique. The Gracieuze gives you the option of a second circuit, to use the LEDs built into the roof of the fixture.
These can then be combined with the beautiful carbon filament lamps. Because of the variety of types, the Gracieuze can be placed nearly everywhere: on the wall, on the terrace, on a gate pole and on a lantern pole.

[DE]
Eine klassische Laterne, vollkommen manuell aus handwerklich bearbeitetem Messing geformt. Old Style gestalterisch, aber neue Technik.
Die Gracieuze hat optional die Möglichkeit mit einem zweiten Kreislauf im Himmel der Armatur eingebaute LEDs zu nutzen. Diese können dann mit schönen Kohlenfadenlampen kombiniert werden. Wegen der unterschiedlichen Typen kann die Gracieuze quasi überall angewendet werden: an der Wand, auf der Terrasse, am Torpfosten und am Laternenpfahl.

Control Gear

Remote receiver
4 cm x 5,5 cm x 12,6 cm

Remote transmitter

ON / OFF

Dynamic Dim
4,4 cm x 4,4 cm x 2,5 cm

Special Dim
4,4 cm x 4,4 cm x 2,5 cm

Entrance Fade Dim
4,4 cm x 4,4 cm x 2,5 cm

4 CHANNEL REMOTE CONTROL and seperate TRANSMITTER. Suitable for Vitrine suspension LED, Bellefeu Dynamic, Bellefeu Vitrine suspension, etc. Ask us for different possibilities

DYNAMIC FLAME DIMMER use to create flickering flame effect in different projects. atmosphere in seperate projects. Ask us for different possibilities.

SPECIAL DIM for dimming the Superieur² LED strips, or all other LED units like Charmond, Pipilier,... The coldest colour gets dimmed first, so the colour gets warmer when dimmed.

With the ENTRANCE FADE DIMMER, the 'warmest' LED from the double LED's from Charmond, Pipilier, LED strip Superior², etc. will light very smoothly. When a normally open contact sensor is used (for example a separate movement detector) the 'warmest' LED will rise from 40% output to 100% output and the 'cooler' LED will rise from 0% output to 100% output in 2 seconds. This means the light becomes stronger and brighter as someone arrives, and returns to a warm, dimmed energy saving output when there is no movement.

ON / OFF SWITCH Suitable for some collections like Monet, Matisse, Vitrine, Lisible, Qubri, Severe, etc. A different normally open, toggle switch is used to control Dynamic LED and Special dim LED, Always ask for different combinations and possibilities.

REMREC4CH	Remote Receiver 12/24V 4 x 1A channel	**140,14 €**

Lighting

Explanation

[NL]
De prioriteit bij Authentage is om u het mooiste licht aan te bieden, in combinatie met een knap armatuur. Licht maakt of kraakt de sfeer. Omdat we het uitermate belangrijk vinden dat onze klanten onze verlichting met de nodige knowhow kunnen aanbieden, geven we op volgende bladzijde een beknopte cursus verlichtingstechniek. Zo kan u indien gewenst, beter het verschil begrijpen en uitleggen aan uw klanten.

[FR]
Notre priorité, chez Authentage, est de vous offrir la plus belle lumière possible, en combinaison avec un joli appareillage. La lumière construit ou détruit l'ambiance. Parce que nous trouvons très important que nos clients puissent jouir de notre éclairage avec le savoir-faire nécessaire, nous offrons ci-après un petit cours sur la technologie de l'éclairage. Vous pourrez ainsi, si vous le souhaitez, mieux comprendre la différence et l'expliquer à vos clients.

[EN]
Our priority at Authentage is to offer you the most beautiful light, combined with an excellent fitting. Light makes or breaks the atmosphere. Because we think it is extremely important to be able to offer our customers the necessary know-how with our lighting, on the next page we present a summarised course in lighting technology. So you can better understand and explain the difference to your customers, if desired.

[DE]
Es ist die oberste Priorität von Authentage Ihnen das schönste Licht in Kombination mit einer hübschen Armatur zu bieten. Licht macht oder stört die Stimmung. Da wir es besonders wichtig finden, dass unsere Kunden unsere Beleuchtung mit dem nötigen Knowhow anbieten können, bieten wir auf der folgenden Seite einen kurzen Kurs über Beleuchtungstechnik. So können Sie – wenn Sie möchten – den Unterschied besser verstehen und Ihren Kunden erklären.

Ambiance Inside

Ambiance AMB -/10

[NL]

Let op onze sfeerscores…

Vaak wordt er over verlichting alleen nog gepraat in termen van energiezuinigheid. Er lijkt een wedloop aan de gang voor het hoogst mogelijk rendement en zo weinig mogelijk verbruik. Dat is best lovenswaardig, maar bij Authentage willen we de belangrijkste factor echter niet uit het oog verliezen namelijk: DE SFEER!

Verlichting kan de sfeer maken of kraken. Daarom specialiseert Authentage zich in sfeervolle verlichting die altijd voor de juiste ambiance zorgt. Als extra geven we al onze producten een score voor de sfeer die ze creëren. Zuinige toestellen die een hard en minder aangenaam licht afgeven, krijgen een lage AMB-waarde. Toestellen die voor een ongelofelijk warme en aangename sfeer zorgen, hebben een hoge AMB-waarde.

Sfeer en verbruik zijn niet aan elkaar gekoppeld. Daarom is het mogelijk dat een harde, ongezellige verlichting een slechter rendement haalt dan een verlichting met hoge AMB-waarde. Let dus bij de keuze van uw verlichting op onze AMB-waarde, om tot de juiste sfeer te komen. U zal merken dat LED-verlichting in sommige gevallen een hogere sfeerscore krijgt dan halogeen lampen (zoals bijvoorbeeld bij de Charmond collectie). Dit is een gevolg van onze permanent zoektocht naar de betere LED-technologie, waardoor deze LED's samen met onze Kelvinkiller filters een aangenamer licht genereren dan halogeen.

[FR]

Notez nos scores d'ambiance...

Souvent, il n'est question d'éclairage qu'en termes d'efficacité énergétique. Il semble qu'une compétition soit en cours, pour le plus haut rendement et la plus basse consommation. C'est tout à fait louable, mais à Authentage nous ne voulons pas perdre de vue le plus important.Á savoir: l'atmosphère!

L'éclairage peut faire ou défaire l'atmosphère. C'est pourquoi Authentage est spécialisé dans l'éclairage ambiant qui procure toujours l'atmosphère adéquate. En outre, nous donnons à tous nos produits un score, pour l'ambiance qu'ils créent. Les dispositifs efficaces qui émettent une lumière forte et moins agréable ont un faible score d'AMB. Les dispositifs produisant une atmosphère incroyablement chaleureuse et agréable ont un grand score d'AMB.

Atmosphère et consommation d'énergie ne sont pas liés. Par conséquent, il est possible qu'une lumière dure et peu engageante ait un rendement plus mauvais qu'un éclairage ayant un score AMB élevé. Soyez sûr que vous choisissez votre éclairage dans notre tableau d'AMB, afin de parvenir à la bonne atmosphère. Vous remarquerez que l'éclairage LED obtient, dans certains cas, un score plus élevé que les lampes halogènes (par exemple dans la collection Charmond). C'est le résultat de notre recherche permanente d'une meilleure technologie LED, ce qui permet, grâce à nos filtres Kelvin killer, de créer une lumière plus agréable encore que l'halogène.

[EN]

Look at our atmosphere scores…

Lighting is often only discussed in terms of energy-saving. There seems to an ongoing race for the highest possible efficiency and the lowest possible consumption. Although this is of course praiseworthy, at Authentage we do not want to lose sight of the most important factor, namely: ATMOSPHERE!

Lighting can make or break the atmosphere. That is why Authentage specialises in atmospheric lighting which always provides the right ambiance. In addition we give all our products a score for the atmosphere they create. Economical units which give off a harder and less pleasant light, score a low AMB value. Units that provide an unbelievably warm and pleasant atmosphere, have a high AMB value.

Atmosphere and consumption are not linked. That is why it is possible that hard, cold lighting achieves a poorer efficiency than lighting with a high AMB value. So when choosing your lighting, pay attention to our AMB value, in order to achieve the right atmosphere. You will notice that in some cases LED lighting scores higher for atmosphere than halogen lamps (for example with the Charmond collection). This is a result of our continuous search for improved LED technology, so that these LEDs together with our Kelvin Killer filters generate a more pleasant light than halogen.

[DE]

Achten Sie auf unsere Stimmungswerte…

Über Beleuchtung wird häufig nur noch in Begriffen der Energiesparsamkeit gesprochen. Es scheint ein Wettlauf um die höchstmögliche Rendite und den geringsten Verbrauch stattzufinden. Das ist natürlich lobenswert, aber bei Authentage möchten wir den wichtigsten Faktor nicht aus dem Auge verlieren: DIE STIMMUNG!

Beleuchtung macht oder stört die Stimmung. Darum spezialisiert sich Authentage auf stimmungsvolle Beleuchtung, die immer für das richtige Ambiente sorgt. Zusätzlich geben wir all unseren Produkten eine Bewertung für die Stimmung, die sie schaffen. Sparsame Geräte, die ein hartes und weniger angenehmes Licht erzeugen, bekommen einen niedrigen AMB-Wert. Geräte, die für eine unglaublich warme und angenehme Stimmung sorgen, haben einen hohen AMB-Wert.

Stimmung und Verbrauch hängen nicht immer miteinander zusammen. Darum ist es möglich, dass eine harte, ungemütliche Beleuchtung eine schlechtere Rendite hat als eine Beleuchtung mit einem hohen AMB-Wert. Beachten Sie bei der Auswahl Ihrer Beleuchtung also unseren AMB-Wert um die richtige Stimmung zu erhalten. Sie werden feststellen, dass LED-Beleuchtung in einigen Fällen einen höheren Stimmungswert als Halogenlampen erhält (beispielsweise bei der Charmond-Kollektion). Das ist eine Folge unserer ständigen Suche nach besserer LED-Technologie, wodurch diese LEDs zusammen mit unseren Kelvinkiller-Filtern ein angenehmeres Licht erzeugen als Halogen.

Ambiance Outside

Functionality

Fct
-

[NL]

…en op de functionaliteit

Naast een sfeerscore vindt u bij onze producten ook een score voor functionaliteit. Deze quoteert het effectief resultaat van licht op bepaalde plekken. De functionaliteit hangt uiteraard af van het type verlichting: een schilderijverlichting heeft een hogere functionaliteit als het dat schilderij mooi aanlicht (en niet noodzakelijk de vloer of de rest van de omgeving). Als dit het enige armatuur is dat in die omgeving licht gaat geven, dan raden we toestellen aan met een gepaste lichtbron en een hoge functionaliteit. Komen er in de omgeving andere verlichtingstoestellen, dan kan een lagere FCT worden toegepast.

[FR]

… Et de la fonctionnalité

Outre un score d'ambiance, vous pourrez trouver sur tous nos produits un score de fonctionnalité. Il mesure l'efficacité de l'éclairage en fonction de l'effet désiré. La fonctionnalité dépend évidemment du type d'éclairage: un éclairage de tableau a une fonctionnalité supérieure s'il éclaire convenablement un tableau (et pas nécessairement le sol ou le reste de la pièce). S'il s'agit du seul dispositif qui donne de la lumière dans cet environnement, nous recommandons des appareils avec une source de lumière appropriée et un haut indice

[EN]

…and for functionality

Alongside an atmosphere score, you can also see a functionality score for our products. This quotes the effective result of light on certain areas. The functionality depends of course on the type of lighting: lighting for a painting has a greater functionality if it lights up that painting beautifully (and not necessarily the floor or the rest of the area). If this is the only fitting that will provide light in that area, then we recommend units with a suitable light source and a high functionality. If other lighting units are placed in the area, a lower functionality (FCT) can be applied.

[DE]

… und auf die Funktionalität.

Neben einem Stimmungswert finden Sie bei unseren Produkten auch eine Bewertung der Funktionalität. Diese bewertet die effektive Wirkung von Licht an bestimmten Stellen. Die Funktionalität hängt selbstverständlich von der Art der Beleuchtung ab: eine Gemäldebeleuchtung hat eine höhere Funktionalität, wenn sie das Gemälde schön ausleuchtet (und nicht unbedingt den Fußboden oder die restliche Umgebung). Wenn es die einzige Armatur ist, die in dieser Umgebung für Licht sorgt, empfehlen wir Geräte mit einer geeigneten Lichtquelle und einer hohen Funktionalität. Kommen andere Beleuchtungsgeräte in die Umgebung, kann ein niedrigerer FCT angewendet werden.

CRI (Colour rendering Index)

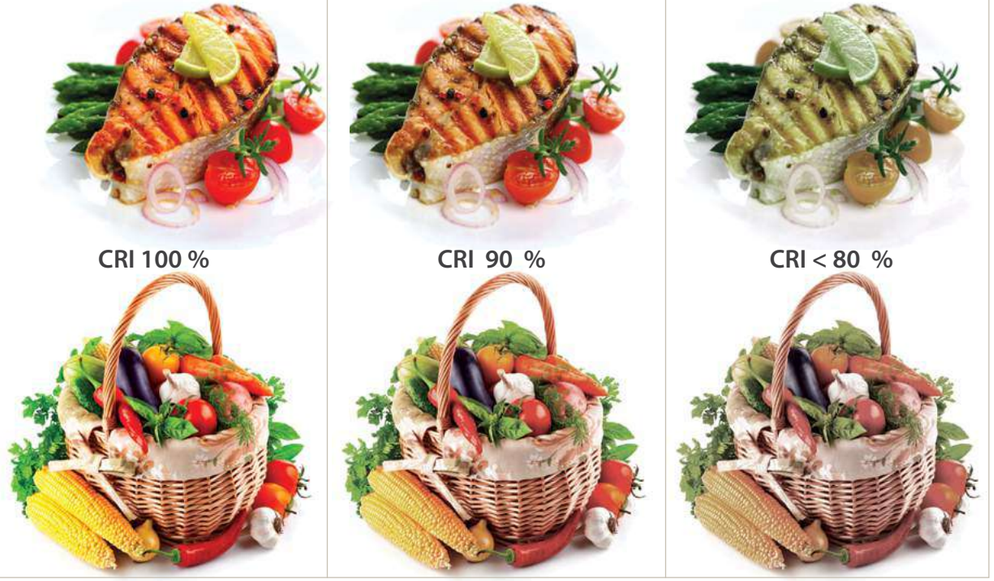

De kleurweergave-index (CRI) is de meetbare maat voor de kwaliteit van kleurweergave van de objecten die door de lichtbron worden belicht. Het is de mogelijkheid van een lichtbron om de kleuren uit het kleurenspectrum van dat object te kunnen weergeven, in vergelijking met een ideale lichtbron zoals de zon (die een CRI van 100% heeft).

L'indice de rendu des couleurs (Colour Rendering Index, CRI) est l'indice mesurable de la qualité de reproduction des couleurs des objets qui sont éclairés par une source de lumière. C'est la possibilité qu'une source de lumière révèle les couleurs du spectre d'un objet, par rapport à une source de lumière idéale telle que le soleil (qui a un CRI de 100%).

The colour rendering index (CRI) is the measurement of the quality of colour rendering of the objects that are lit by the light source. It is the ability of a light source to reproduce the colours from the colour spectrum of that object, in comparison with an ideal light source such as the sun (which has a CRI of 100%).

Der Farbwiedergabe-Index (CRI) ist das messbare Maß für die Qualität der Farbwiedergabe der Objekte, die von der Lichtquelle beleuchtet werden. Es gibt die Möglichkeit einer Lichtquelle um die Farben aus dem Farbspektrum dieses Objekts wiederzugeben im Vergleich zu einer idealen Lichtquelle wie der Sonne (die einen CRI von 100 % hat).

CRI : 100 % :	👍👍👍 = ☀
CRI : 90 - 100 % :	👍👍
CRI : 85 - 90 % :	👍 *ok*
CRI : 80 - 85 % :	👎
CRI : - 80 % :	👎👎

Kelvin

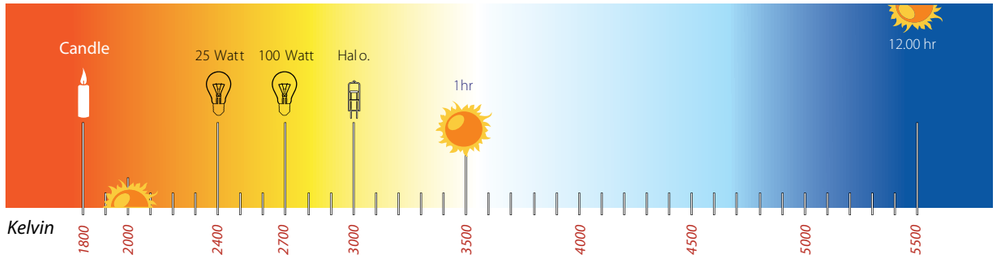

Kelvin is de gradatie van de kleurtemperatuur van een lichtbron. Dit staat volledig los van de kleurweergave. In de natuur veranderen de kleurtemperaturen van onze omgeving constant. De mens is daar sinds de oertijd volledig vertrouwd mee. Een opkomende zon heeft een kleurtemperatuur van +- 2000 Kelvin. Naargelang de zon hoger aan de hemel komt, zal de kleurtemperatuur hoger en koeler worden en gemakkelijk 6000 Kelvin bereiken. 's Avonds schenkt de ondergaande zon en het warme, gezellige licht van haardvuur +-1800 Kelvin ons opnieuw meer rust. Wij raden onze klanten aan om de lichtkleur te volgen die past bij het verloop van de dag, en vooral s'avonds te kiezen voor warmere lichtsferen.

Kelvin est la mesure de la température de couleur d'une source lumineuse. Ceci, indépendamment de la qualité de la reproduction des couleurs. Dans la nature, la température de couleur de notre environnement change constamment. L'homme y est cependant en confiance absolue, depuis l'origine. Un soleil levant a une température de couleur de + - 2000° Kelvin. Plus le soleil est haut dans le ciel, plus la température de couleur monte et se refroidit, jusqu'à atteindre 6000° Kelvin. Dans la soirée, le soleil couchant et sa douce lumière chaude et accueillante de feu de bois, de + -1800° Kelvin, nous apaise. Nous encourageons nos clients à suivre la couleur de la lumière qui correspond au déroulement de la journée, et de choisir des lumières chaudes en soirée.

Kelvin is the degree of the colour temperature of a light source. It is completely independent of colour rendition. In nature, the colour temperatures of our environment are constantly changing. Man has been aware of this since prehistoric times. The rising sun has a colour temperature of +- 2,000 Kelvin. As the sun rises higher in the sky, the colour temperature becomes higher and looks cooler, easily reaching 6,000 Kelvin. In the evening, the setting sun and the warm, cosy light from a fireplace at about 1,800 Kelvin make us relaxed again. We advise our customers to track the light colour that matches as the day goes on, and to choose warm atmospheric lighting especially for the evenings.

Kelvin ist die Gradierung der Farbtemperatur einer Lichtquelle. Das ist unabhängig von der Farbwiedergabe. In der Natur verändern sich die Farbtemperaturen unserer Umgebung ständig. Der Mensch ist seit der Urzeit vertraut damit. Eine aufgehende Sonne hat eine Farbtemperatur von +/- 2000 Kelvin. Wenn die Sonne am Himmel höher steigt, wird die Farbtemperatur höher und kühler und erreicht leicht bis zu 6000 Kelvin. Abends schenkt uns die untergehende Sonne und das warme, gemütliche Licht des Kaminfeuers +/- 1800 Kelvin erneut mehr Ruhe. Wir empfehlen unseren Kunden die Lichtfarbe einzuhalten, die zum Tagesverlauf passt und vor allem abends wärmere Lichtsphären zu wählen.

Lumen

LUMEN is de meetbare hoeveelheid zichtbaar licht die een lichtbron rondom verspreidt.

Le LUMEN est la quantité mesurable de lumière visible qui se répand autour d'une source lumineuse.

LUMEN is the measurable amount of visible light emitted by a light source.

LUMEN ist die messbare Menge sichtbares Licht, die eine Lichtquelle um sich verbreitet.

1 Candle	=	12 Lumen
1watt LED	=	50 Lumen
50 watt Halogen	=	720 Lumen

Halogen 50W

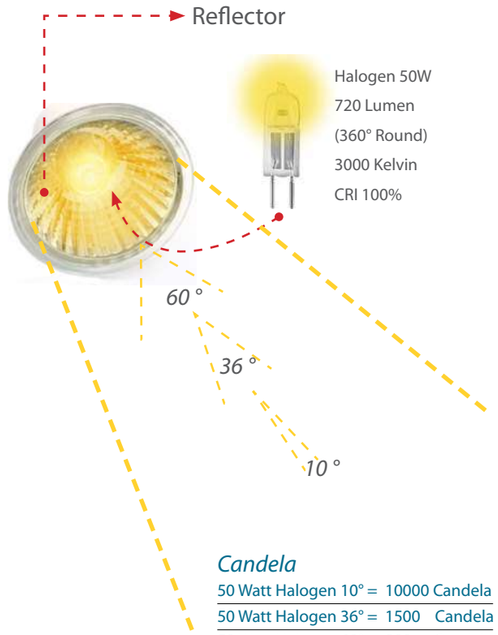

720 Lumen

(360° Round)

3000 Kelvin

CRI 100%

Candela

Candela

50 Watt Halogen 10°	=	10000 Candela
50 Watt Halogen 36°	=	1500 Candela
50 Watt Halogen 60°	=	800 Candela

Als we aan die lichtbron een reflector toevoegen zal het licht worden geprojecteerd naar een bepaalde richting. Afhankelijk van de hoek van het geprojecteerde licht zal de lichtstraal veranderen van sterkte. Deze lichtstraal is uitgedrukt in CANDELA.

Si nous ajoutons un réflecteur, la source de lumière est réfléchie dans une direction particulière. En fonction de l'angle de réflexion, le rayon de lumière changera de force. La force de ce rayon est exprimée en CANDELA.

If we add a reflector to the light source the light will be projected in a certain direction. Depending on the angle of the projected light, the beam of light will change in intensity.This beam of light is expressed in CANDELA.

Wenn man einen Reflektor zur Lichtquelle fügt, wird das Licht in eine bestimmte Richtung projektiert. Je nach dem Winkel des projektierten Lichts verändert der Lichtstrahl seine Stärke. Dieser Lichtstrahl wird in CANDELA ausgedrückt.

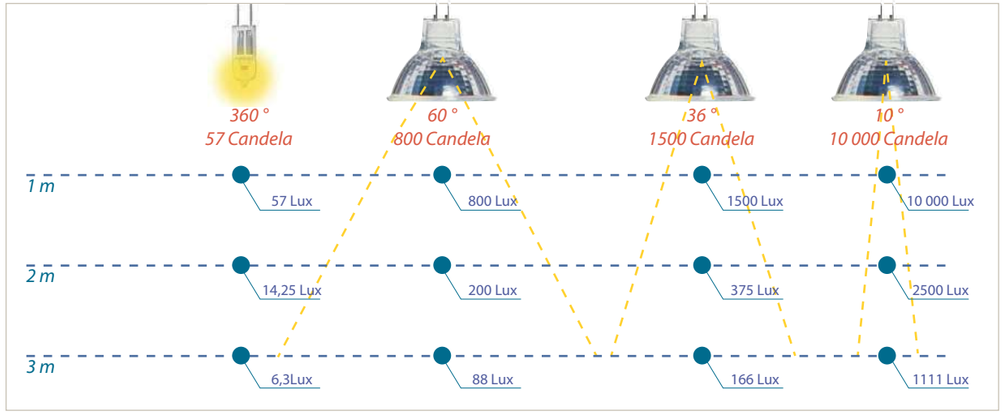

Lux

Het geprojecteerde licht van een lichtbron kan op een object worden gemeten. Maar hoe groter de afstand van de lichtbron ten opzichte van een tafel, hoe minder licht er op die tafel zal komen. De meetbare lichtsterkte op die tafel wordt uitgedrukt in LUX. Op een bureau waaraan we werken, hebben we ongeveer 500 LUX nodig, in de keuken loopt dat op tot 700 LUX.

La lumière projetée à partir d'une source de lumière peut être mesurée sur un objet. Plus la distance de la source de lumière à une table est grande, moins elle sera éclairée. L'intensité de la lumière mesurable sur cette table sera exprimée en termes de LUX. Sur une table de travail, nous aurons besoin d'environ 500 LUX. Dans la cuisine, il nous faudra 700 LUX.

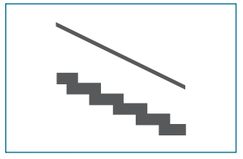

The light projected from a light source can be measured on an object. But the greater the distance between the light source and a table, the less amount of light will fall on that table. The measurable luminous intensity on that table is expressed in lux. We need about 500 lux for working at a desk, in the kitchen this rises to 700 lux.

Das projektierte Licht einer Lichtquelle kann auf einem Objekt gemessen werden. Aber je größer der Abstand von der Lichtquelle gegenüber einem Tisch, desto weniger Licht gelangt auf den Tisch. Die messbare Lichtstärke auf dem Tisch wird in LUX ausgedrückt. Auf einem Schreibtisch, an dem wir arbeiten, benötigen wir ungefähr 500 LUX, in der Küche kann das bis zu 700 LUX sein.

Kelvin Killer

Gezelligheid is een gevoel dat heel moeilijk meetbaar is met meettoestellen… Daarom hebben we onze sfeerscore AMB toegevoegd aan onze catalogus. Van nature vinden we plaatsen waar een warme sfeer heerst, aangenamer dan plekken met een koele sfeer. Als we gloei- of halogeenlampen dimmen, bekomen we een warmere gloed. Met LED-verlichting is die warme gloed moeilijk te realiseren zonder dat er een foute amberkleur ontstaat. Onze warmste LED's die nog mooi licht geven, zijn 2200 KELVIN. Om het licht nog warmer te maken, gebruiken we onze Kelvin Killer. Met deze speciale filter remmen we de kleur af met zo'n 400 KELVIN. Zo creëren we de perfecte benadering van echt vuur of kaarslicht. De Kelvin Killer zorgt er ook voor dat warme kleuren zoals rood of bruin nog meer worden geaccentueerd.

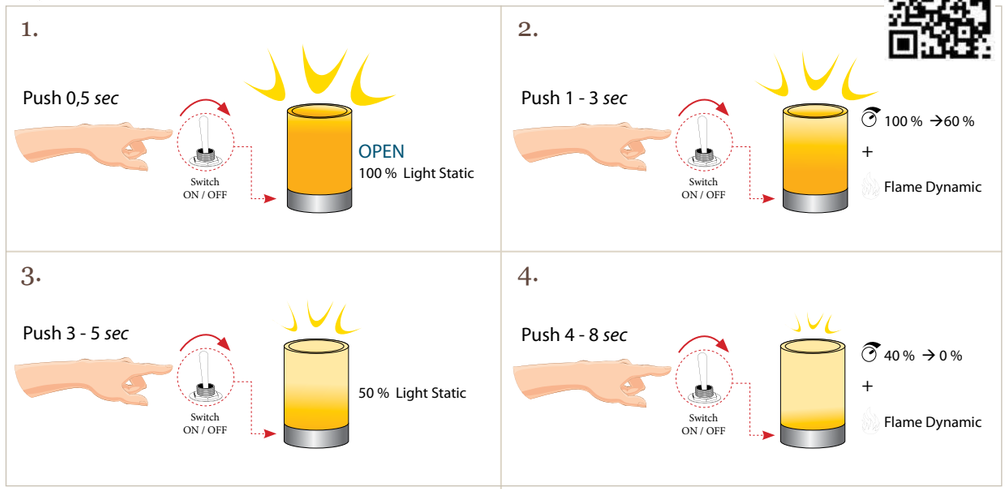

La sociabilité est un sentiment qu'il est très difficile de mesurer avec des appareils... Voilà pourquoi nous avons ajouté un score d'atmosphère AMB à notre catalogue. Nous trouvons naturellement certains lieux qui ont une ambiance chaleureuse plus agréable que les lieux dont l'ambiance est froide. Si nous diminuons l'intensité des lampes à incandescence ou halogène, nous obtenons une lueur chaude. Avec l'éclairage LED, une lumière chaude est difficile à obtenir, à moins de recréer une fausse couleur ambre. Nos LEDS les plus chauds, qui donnent une belle lumière, ont une température de 2200° Kelvin. Pour produire une lumière encore plus chaude, nous utilisons notre Kelvin Killer. Ce filtre spécial ramène la couleur à quelques 400° Kelvin. Ainsi, nous créons ce qui se rapproche le plus du feu ou des bougies. Kelvin Killer accentue également les couleurs chaudes comme le rouge ou le brun.

Cosiness is a feeling that is very difficult to measure with instruments… That is why we added our AMB atmosphere score to our catalogue. We instinctively enjoy places more if there is a warm atmosphere, compared to places with a cool atmosphere. If we dim glow or halogen lamps, we get a warmer glow. That warm glow is difficult to achieve without producing a wrong amber colour if you use LED lighting. Our warmest LEDs that still emit beautiful light, are 2,200 Kelvin. To make the light even warmer, we use our Kelvin Killer. With this special filter we decelerate the colour by about 400 Kelvin. And we create the perfect imitation of real fire or candle-light. The Kelvin Killer also ensures that warm colours such red or brown are even more accentuated.

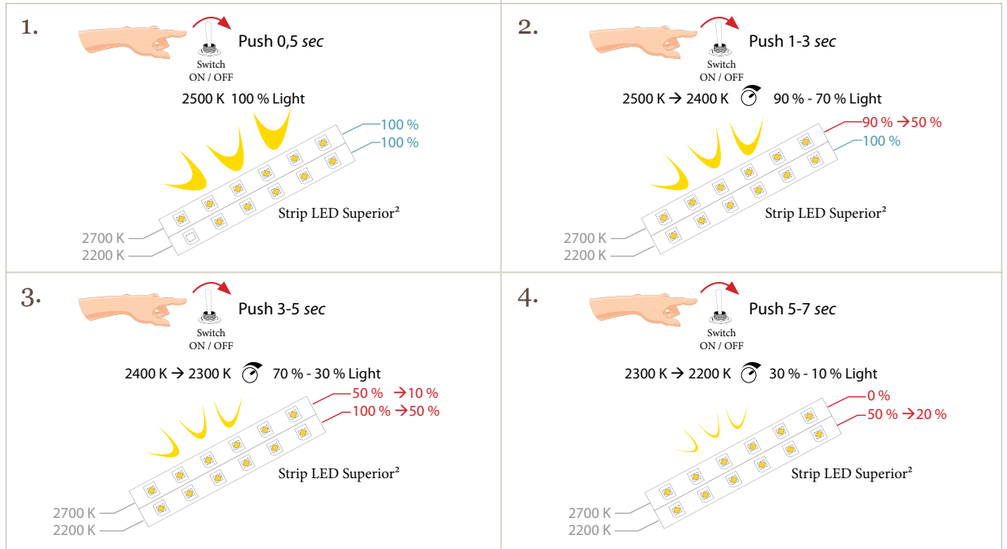

Gemütlichkeit ist ein Gefühl, dass mit Messgeräten nur schwer zu messen ist… Darum haben wir unseren Stimmungswert AMB in unseren Katalog aufgenommen. Von Natur aus finden wir Stellen, an denen eine warme Stimmung herrscht, angenehmer als Stellen mit einer kühlen Stimmung. Wenn wir Glüh- oder Halogenlampen dimmen, erhalten wir eine wärmere Glut. Mit LED-Beleuchtung ist die warme Glut schwierig realisierbar, ohne dass eine falsche Bernsteinfarbe entsteht. Unsere wärmsten LEDs, die noch schönes Licht geben, sind 2200 KELVIN. Um das Licht noch wärmer zu machen, verwenden wir unseren Kelvin Killer. Mit diesem speziellen Filter hemmen wir die Farbe um ca. 400 KELVIN. So erreichen wir die perfekte Annäherung an ein echtes Feuer oder Kerzenlicht. Der Kelvin Killer sorgt auch dafür, dass warme Farben, wie Rot oder Braun noch mehr betont werden.

Bestellingen plaatsen

U bestelt de orders bij Post Light International
Per telefoon: +32 (0) 3 283 63 20
Per Fax: +32 (0) 3 283 63 21
Per e-mail : info@authentage.be

Onder vermelding van

- Een referentie, bestelnummer of offertenummer
- De code van de lamp/omschrijving uit de prijslijst. (Let hierbij op de gewenste uitvoering: donkerbrons, mat nikkel, chroom of messing vermeldt u best apart.)
- De lichtbron is niet mee verrekend in de prijs, tenzij anders vermeld in de catalogus. Gelieve bij bestelling dus uitdrukkelijk te vermelden of u de lampen ook wenst te bestellen.
- Bij de bestelling van pendelarmaturen dient u ook de totale gewenste hoogte door te geven.

Leveringen

De standaard levertermijn ligt tussen 5 à 7 weken, uitgezonderd maatwerk.
Voor leveringen onder de 500 € netto, exclusief BTW wordt in België een transportkost aangerekend van 25 euro, exclusief BTW. Leveringen buiten Belgie zijn EX-Factory.
De transportvoorwaarden kunnen hiervoor apart worden besproken.

Speciale aanvragen

Het is mogelijk om afmetingen, fittingen, kleuren en zelfs ontwerpen van de armaturen aan te passen. Hiervoor kan u een offerte aanvragen. (U kan ons bereiken op de bovenstaande gegevens). U dient wel rekening te houden met een langere levertermijn bij maatwerk en met de technische mogelijkheden van de fabricatie.

Lichtbronnen

Bij armaturen met verwisselbare lampen zijn de lichtbronnen niet mee gerekend in de prijs. Ze worden bijgevolg niet standaard meegeleverd. Indien u de lichtbronnen er graag bij wenst, gelieve dit dan bij de bestelling duidelijk te vermelden.

Garantie

Op al onze armaturen geven wij een standaard fabrieksgarantie van 2 jaar op onderdelen, uitgezonderd glasbreuk. Door de ruwe afwerking en de gebruikte natuurlijke materialen is een kleurverschil en verschil in structuur niet uitgesloten.

Manuele assemblage

Het merk Authentage wordt manueel geassembleerd. De ruwe en brute afwerking, met mogelijke nuances in structuur en kleur, zijn eigen aan het merk. Dit past in de huidige trend van natuurlijke, eerlijke en herbruikbare materialen. Zij geven samen met de geadviseerde lampen, een warme uitstraling en charme.
Uiteraard kan deze manuele afwerking geen aanleiding geven tot klachten of omruilingen.

Commander

Vous pouvez adresser vos commandes à Post Light International
Par téléphone: +32 (0) 3283 63 20
Par fax: +32 (0) 3283 63 21
Par e-mail: info@authentage.be

En mentionnant

- Une référence, un numéro de commande ou de devis
- Le code de la lampe / Description, tels que repris sur la liste de prix. (Notez bien la finition souhaitée: bronze foncé, nickel satiné ou chromé, cuivre, à préciser quand il y a lieu.)
- L'ampoule n'est pas incluse dans le prix, sauf mention contraire dans le catalogue. Merci de bien vouloir préciser, lors de la commande, si vous souhaitez commander aussi les ampoules.
- En cas de commande de luminaires suspendus, merci de préciser la hauteur totale souhaitée.

Livraisons

Le délai de livraison moyen est de 5 à 7 semaines, sauf commandes personnalisées.
Pour les commandes de moins de 500 € HTVA, le coût de transport en Belgique est facturé, à partir de 25 euros HTVA. Les livraisons hors Belgique sont ex-factory. Les conditions de transport peuvent être discutées séparément.

Demandes spéciales

Il est possible d'ajuster les dimensions, les soquets, les couleurs et même la conception des dispositifs. À ces fins, un devis peut être demandé. (Vous pouvez nous joindre aux coordonnées reprises plus haut). Prévoyez un délai de livraison plus long pour un travail sur mesure, et tenez compte des possibilités techniques de fabrication.

Les ampoules

Dans les luminaires à ampoules remplaçables, ces dernières ne sont pas incluses dans le prix. Elles ne sont donc pas livrées. Si vous souhaitez des ampoules, merci de l'indiquer clairement lors de la commande.

Garantie

Pour tous nos dispositifs, nous offrons une garantie-fabricant standard de 2 ans sur les pièces, sauf bris de verre. En cas de finition brute ou lorsque des matériaux naturels sont utilisés, une différence de couleur ou dans la structure peuvent apparaître de façon normale.

Assemblage manuel

La marque Authentage est assemblée à la main. La finition brute, qui peut présenter, d'un modèle à l'autre, des nuances dans la texture et la couleur, est typique de la marque, conformément à la tendance actuelle consistant à utiliser des matériaux naturels, fair-trade et recyclables. Ils donnent ainsi, avec l'éclairage approprié, un supplément de charme et une atmosphère chaleureuse.
Naturellement, cette finition faite main ne peut pas donner lieu à des plaintes ou à des échanges.

Orders
You can order through Post Light International
By telephone: +32 (0) 3 283 63 20
By fax: +32 (0) 3 283 63 21
By e-mail: info@authentage.be

Indicating
- A reference, order or quotation number
- The code/description from the price list. (Note the required finish: it is best if you make a separate mention of dark bronze, brushed nickel, chrome or brass)
- The light source is not included in the price, unless stated otherwise in the catalogue. When ordering, please mention explicitly if you also wish to order the lamps.
- When ordering pendant fittings, you should also state the total height required.

Deliveries
The standard delivery period is between 5 and 7 weeks, with the exception of customised work. For deliveries under EUR 500 net, excluding VAT in Belgium transport costs of EUR 25 will be charged, excluding VAT. Deliveries outside Belgium are ex-factory. The transport terms and conditions for these can be arranged separately.

Special Requests
It is possible to adapt the dimensions, fittings, colours and even design of the fixtures. You can request a quote for this. (You can contact us at the above address). You need to bear in mind a longer delivery period with customised items and with the technical capacity of the manufacture.

Light sources
For fixtures with exchangeable lamps, the light sources are not included in the price. Accordingly they are not delivered as standard. If you would like to have light sources as well, please state this clearly on the order.

Guarantee
For all our fixtures we give a standard factory guarantee of 2 years on parts, with the exception of glass breakage. On account of the rough finishing and use of natural materials, a difference in colour and structure is not excluded.

Manual assembly
The brand Authentage is assembled manually. The rough and severe finish, with possible nuances in structure and colour, are brand-specific. This matches the current trend in natural, honest and reuseable materials. Together with the recommended lamps, they radiate warmth and charm.. This manual finish cannot of course give rise to complaints or exchanges

Bestellungen
Sie bestellen die Aufträge bei Post Light International
Telefonisch: +32 (0) 3 283 63 20
Per Fax: +32 (0) 3 283 63 21
Per E-Mail: info@authentage.be

Unter Angabe
- ein Aktenzeichen, Bestellnummer oder Auftragsnummer
- den Code der Lampe/Beschreibung aus der Preisliste (Achten Sie dabei auf die gewünschte Ausführung: Dunkelbronze, mattes Nickel, Chrom oder Messing geben Sie am besten getrennt an.)
- Wenn im Katalog nichts anderes angegeben ist, wurde die Lichtquelle im Preis nicht mit verrechnet. Geben Sie bei Bestellung bitte ausdrücklich an, ob Sie die Lampen auch bestellen möchten.
- Bei der Bestellung von Pendelarmaturen müssen Sie auch die gewünschte Gesamthöhe angeben..

Liefrungen
Die Standardlieferfrist liegt zwischen 5 und 7 Wochen, Maßarbeit ausgenommen. Für Lieferungen unter 500€ Netto exkl. MwSt. werden in Belgien Transportkosten in Höhe von 25 Euro exkl. MwSt. in Rechnung gestellt. Lieferungen außerhalb Belgiens sind ex-Werk. Die Transportbedingungen dafür können separat besprochen werden.

Sonderanfragen
Man kann Abmessungen, Fassungen, Farben und sogar Entwürfe der Armaturen anpassen. Dafür können Sie ein Angebot anfordern. (Sie erreichen uns unter den oben angegebenen Nummern und Adressen). Beachten Sie jedoch eine längere Lieferfrist bei Maßarbeiten und die technischen Möglichkeiten der Herstellung.

Lichtquellen
Bei Armaturen mit austauschbaren Lampen sind die Lichtquellen im Preis nicht enthalten. Sie werden also nicht serienmäßig mitgeliefert. Wenn Sie die Lichtquellen gern mitgeliefert bekommen möchten, geben Sie dies bitte bei der Bestellung deutlich an.

Garantie
Wir geben für alle Armaturen eine Standardwerksgarantie von 2 Jahren auf Teile, außer Glasbruch. Aufgrund der rauen Verarbeitung und der verwendeten natürlichen Materialien ist ein Farbunterschied und ein Unterschied bei der Struktur nicht ausgeschlossen.

Manuelle Montage
Die Marke Authentage wird manuell montiert. Die raue und grobe Verarbeitung mit möglichen Abweichungen in Struktur und Farbe sind der Marke eigen. Das passt zum heutigen Trend der natürlichen, ehrlichen und wiederverwendbaren Materialien. In Kombination mit den empfohlenen Lampen strahlen sie Wärme und Charme aus. Selbstverständlich berechtigt diese manuelle Verarbeitung nicht zu Beschwerden oder Umtausch.

Inleiding
Deze catalogus is de vernieuwde van het vervolg op onze bestaande catalogus van 2016 – 2017. U kan hierin onze nieuwe collecties en addendum vinden op reeds bestaande collecties. De prijzen van 2016 – 2017 blijven gehandhaafd. dus de vorige catalogus is nog volledig actueel.

Verder kan u in deze catalogus nieuwe lichtbronnen vinden met nog mooier licht aan prijzen. Het loont dus zeker de moeite om onze nieuwe catalogus eens rustig door te nemen. Wij wensen u alvast veel leesplezier.

Introduction
This catalog is the continuation of our existing catalog from 2016 - 2017. You can find our new collections or addendum from existing collections. Prices from 2016 - 2017 are maintained, so the previous catalog is still up to date.

In addition, you can find newer light sources with more beautiful light and better features and prices. So it's worth the effort to review our new catalog and to discover the latest new light possibilities. We already wish you a lot of reading pleasure.

Einleitung
Dieser Katalog ist die Fortsetzung unserer bestehenden Katalog von 2016 - 2017. Sie können unsere neuen Kollektionen hier oder Ergänzung zu bestehenden Sammlungenfinden. Die Preise für 2016 - 2017 werden beibehalten, so dass der vorherige Katalog ist auf dem neuesten Stand.

Darüber hinaus können Sie neuere Quellen hier mit einem besseren Beleuchtung und besseren Eigenschaften und Preisen finden. So sicherlich lohnt auch unseren neuen Katalog zu nehmen und neueste Entdeckung neue Beleuchtungsmöglichkeiten . Wir wünschen Ihnen eine angenehme Lektüre.

Introduction
Ce catalogue est la continuation de notre catalogue existant à partir de 2016 - 2017. Vous pouvez trouver nos nouvelles collections présentes ou addendum collections existantes. Les prix pour 2016 - 2017 seront maintenus, de sorte que le catalogue précédent est complètement à jour.

En outre, vous pouvez trouver des sources nouvelles ici avec un meilleur éclairage et de meilleures caractéristiques et les prix. Donc, certainement la peine de prendre encore notre nouveau catalogue et les dernières nouvelles possibilités découvrir d'éclairage. Nous vous souhaitons une agréable lecture.

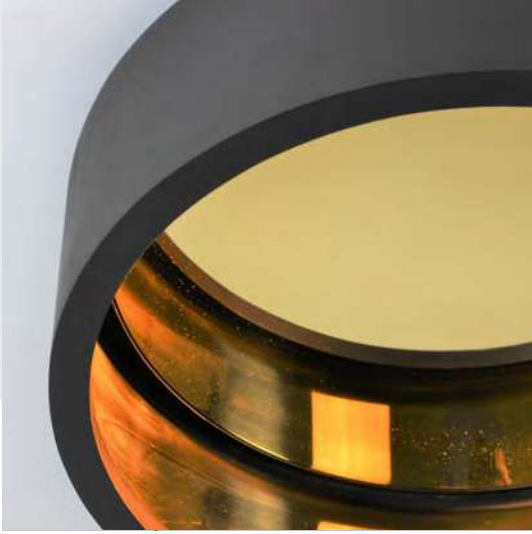

Eclips

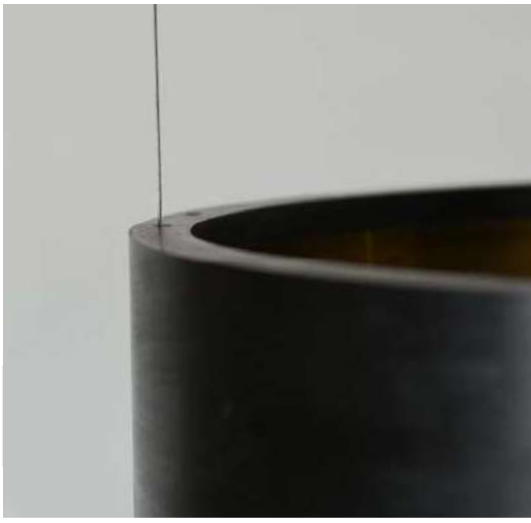

[NL]
Onze Eclips collectie is de meer dan geslaagde samensmelting van een modern minimalistisch design uitgevoerd met de klassieke materialen bronsantiek en gepolierde messing. De modernste LED technieken reflecteren in de warme goudkleurige binnenkant en zorgen zo voor een fantastisch spel van licht, schaduw en sfeer.

[EN]
Our Eclips collection is the more than successful fusion of a modern minimalistic design with classic materials bronze and polished brass. The most modern LED techniques reflect in the warm gold-colored interior and create a great game of light, shadow and atmosphere.

[FR]
Notre collection Eclips est une composition réussie d'un design moderne et minimaliste, réalisée avec les matériaux de base classiques et laiton poli antique. La dernière technologie LED donne des reflets d'or à l'intérieure ce qui crée un merveilleux jeu de lumière, d'atmosphère et d'ombre.

[DE]
Unsere Eclips Kollektion ist eine mehr als gelungene Kombination aus einem modernen minimalistischen Design mit den klassischen Ausgangssto en und antikem, poliertem Messing. Die neueste LED-Technologie reflektieren im Inneren in einem warmen Gold und erzeugen damit ein wunderbares Spiel von Licht, Schatten und Atmosphäre.

[NL]
Verlichting of decoratie? Waarom niet beide? Een tijdloze glazen stolp in vele maten is de basis waarop een mooie lamphouder een lampenkap naar keuze vasthoudt. Het licht van de lamp wordt door de lamphouder mooi naar beneden gereflecteerd waardoor het onder de stolp geplaatste decoratieve object prachtig zal worden uitgelicht. Afhankelijk van het seizoen kan u herfst, kerst, paas, lente of zomer decoratie gebruiken. Er is intern zelfs een haakje voorzien waaraan u uw decoratie kan ophangen. Maar ook zonder voorwerp is het toestel prachtig door zijn eenvoud. Afhankelijk van de ruimte kan u een kleine, brede of hoge Décorna lamp kiezen. De lampenkap is niet inbegrepen wegens de oneindige variatie in maten stoffen en kleuren hierin. Mooi licht, tijdloos ontwerp, en oneindige decoratieve mogelijkheden. Weet u al wat u er zoal zou kunnen insteken?
(Lichtbron, lampenkappen & decoratie niet inbegrepen)

[FR]
Éclairage ou décoration? Pourquoi pas les deux? Une barre de verre intemporelle dans de nombreuses tailles est la base sur laquelle une belle lampe porte un abat-jour de votre choix. La lumière de la lampe est reflétée par le support de la lampe, de sorte que l'objet décoratif placé sous la poste donnera magnifique son plein effet. Selon la saison, vous pouvez utiliser des décorations d'automne, de noël, de pâques, de printemps ou d'été. On a aussi prévu des crochets pour les décorations . Dans sa simplicité, le dispositif est beau. Selon l'espace, vous pouvez choisir une lampe Décorna petite, large ou haute. Les abat-jours ne sont pas inclus en raison de la variation infinie des tailles et des couleurs des tissus. Beau design léger, intemporel et possibilités décoratives infinies. Savez-vous déjà ce que vous pourrez y mettre? (Ampoule, abat-jour et décoration non inclus)

[EN]
Illumination or decoration? Why not both? A timeless glass bar in many sizes is the basis on which a beautiful lampholder holds a lampshade of your choice. The light of the lamp is reflected by the lamp holder beautifully, so that the decorative object placed under the post will be beautifully highlighted. Depending on the season, you can use autumn, christmas, easter, spring or summer decorations, or even a bracket for hanging your decoration. But simply empty, the device is beautiful as well because of its simplicity. Depending on the space, you can choose a small, wide or high Décorna lamp. The hoods are not included due to the in nite variation in fabric sizes and colors. Beautiful light, timeless design, and infinite decorative possibilities. Do you already know what you could do?
(Lamp, lampshades & decoration not included)

[DE]
Beleuchtung oder Dekoration? Warum nicht beides? Eine zeitlose Glasleiste in vielen Größen ist die Basis, auf der eine schöne Lampenfassung einen Lampenschirm Ihrer Wahl hält. Das Licht der Lampe wird vom Lampenhalter schön reflektiert, sodass das dekorative Objekt, welches unter dem Ständer steht, schön hervorgehoben wird. Je nach Jahreszeit können Sie Herbst-, Weihnachts-, Ostern-, Frühlings- oder Sommerdekorationen oder sogar eine Halterung zum Aufhängen Ihrer Dekoration verwenden. Aber auch ohne Dekoration ist das Gerät ist wegen seiner Einfachheit schön. Je nach Platz können Sie eine kleine, breite oder hohe Décorna Lampe wählen. Die Hauben sind wegen der unendlichen Variation der Stoffgrößen und -farben nicht enthalten. Schönes Licht, zeitloses Design und unendliche dekorative Möglichkeiten. Wissen Sie schon was Sie damit alles tun könnten?
(Lampe, Lampenschirme und Dekorationen sind nicht enthalten)

Tubelum

[NL]

Sobere stoere pendel in bronzen uitvoering. Verschillende lengtes mogelijk en verkrijgbaar aan zware ketting of gewoon aan de mooie zwarte stoffen kabel. De binnenkant van de Tubelum is gepolierde messing om de reflectie in het toestel zo warm mogelijk te maken. De lichtbron is een GU10 led lamp naar keuze (liefst dim to warm). Het toestel is voorzien van onze gepatenteerde Kelvin Killer voor een nog warmere sfeer. De lichtbron kan dieper in het toestel worden geplaatst, zodat het licht bijna onzichtbaar wordt en de lichtbundel naar het onderliggende object extra gericht wordt. Prachtig boven een bar, eettafel, ... maar ook leuk boven bijvoorbeeld een nachtkastje.

[FR]

Pendentif trempé en bronze. Différentes longueurs possibles et disponibles à la chaîne lourde ou simplement le beau câble en tissu noir. L'intérieur du Tubelum est poli pour rendre la réflexion dans l'appareil le plus chaude que possible. La source lumineuse est une lampe led GU10 de choix (de préférence diminuer l'éclairage à chaud). L'appareil est équipé de notre Kelvin Killer breveté pour une atmosphère encore plus chaleureuse. La source de lumière peut être placée plus profondément dans l'appareille, de sorte que la lumière devient presque invisible et le rayon de lumière encore plus concentré. Magnifique au-dessus d'un bar, table à manger, ... mais aussi agréable, par exemple au-dessus d'une table de nuit.

[EN]

Sober tough pendant in bronze version. Different lengths possible and available with heavy chain or just with the beautiful black fabric cable. The inside of the Tubelum is a polished brass to make the reflection in the device as warm as possible. The light source is a GU10 led lamp of choice (preferably dim to warm). The device is equipped with our patented Kelvin Killer for an even more warm atmosphere. The light source can be placed deeper into the device, so that the light becomes almost invisible and the beam on the underlying object is even more focused. Beautiful above a bar, dining table, ... but also nice, for example above a bedside table.

[DE]

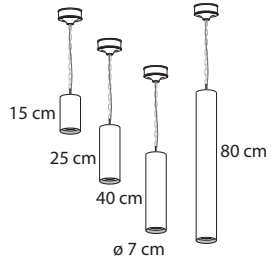

Schlichte, robuste Hängelampe in Bronze-Version. Verschiedene Längen möglich und verfügbar für schwere Ketten oder einfach nur das schöne schwarze Stoffkabel. Das Innere des Tubelums ist ein poliertes Messing, um die Reflektion im Gerät so warm wie möglich zu machen. Die Lichtquelle ist eine GU10 LED Lampe der Wahl (vorzugsweise dämmrig bis warm). Das Gerät ist mit unserem patentierten Kelvin-Killer für eine noch warmere Atmosphäre ausgestattet. Die Lichtquelle kann tiefer im Gerät platziert werden, sodass das Licht fast unsichtbar wird und der Strahl auf dem darunter liegenden Objekt noch mehr fokussiert wird. Schön über einer Bar, einem Esstisch, ... aber auch zum Beispiel für den Nachttisch wunderschön.

Track-System

[NL]
Een Track-Systeem in chroom, brushed nickel, polished brass of brons. Aangezien de vraag voor dit product bleef komen hebben we een 230V track systeem ontwikkeld in deze materialen. Flexibiliteit staat voorop, kies uw spot of pendel, klik erin en klaar. Langere tafel, aanpassingen in uw winkel, ander seizoen... u past uw samenstelling aan naar uw wensen. Alles op 230V uit onze catalogus kan hierop worden aangesloten, maar ook alle 12V spots op V70 voet kunnen hierop worden gemonteerd... Aan u om een samenstelling te maken naar keuze.

[FR]
Un Système de Track en chrome, nickel brossé, laiton poli ou bronze. Vue que la demande pour ce produit continuait, nous avons développé un Système de Track de 230 V dans ces matériaux. La flexibilité a la priorité, choisissez votre lieu ou votre trajet, cliquez et c'est fait. Une table plus longue, des ajustements dans votre magasin, une autre saison ... vous adaptez votre composition à vos souhaits. Tous les lamps/spots sur 230V de notre catalogue peut y être connecté, mais aussi tous les spots de 12V sur base V70 peuvent y être montés ... A vous de faire votre composition.

[EN]
A Track System in chrome, brushed nickel, polished brass or bronze. As the demand for this product continued, we have developed a 230V track system in these materials. Flexibility is at the top, choose your spot or commute, click in and finish. Longer table, adjustments in your store, other season ... you adapt your composition to your wishes. Everything on 230V from our catalog can be connected to it, but also all 12V spots on V70 foot can be mounted on it ... To make a composition of your choice.

[DE]
Ein Schienensystem aus Chrom, gebürstetem Nickel und poliertem Messing oder Bronze. Aufgrund der anhaltenden Nachfrage nach diesem Produkt haben wir ein 230V-Schienensystem mit diesen Materialien entwickelt. Flexibilität ist wichtig, wählen Sie Ihren Platz oder Weg, klicken Sie diesen an und Sie sind fertig. Längerer Tisch, Anpassungen in Ihrem Laden, andere Jahreszeit ... Sie passen Ihre Komposition Ihren Wünschen an. Allef 230V Produkte aus unserem Katalog können damit kombiniert werden, aber auch alle 12V Spots auf V70 Fuß können darauf montiert werden ... Um eine Komposition Ihrer Wahl zu kreieren.

Aureole White Gold Reflector and standard eye cover (eye cover included)

Aureole

[NL]

Wegens het grote succes van onze uiterst functionele en zeer betaalbare Aureole spot die kan toegepast worden in zowel beton als gipsplaat, hebben we deze collectie sterk uitgebreid met meerdere varianten. Het is ook mogelijk om de reeds aangekochte spot te upgraden naar de meer luxueuze variant later. Dat zorgt ervoor dat mensen met een beperkt bouwbudget, later stapsgewijs meer opties kunnen toevoegen. Hou dus zeker contact met uw klanten om hen deze opties later bijkomend te kunnen aanbieden.

[FR]

En raison du grand succès de notre spot Aureole super-fonctionnel et très abordable qui peut être appliqué à la fois dans le béton et dans le plâtre, nous avons élargi cette collection avec de multiples variantes. Il est également possible de mettre à niveau les spots déjà achetés plus tard. Cela garantit que les personnes ayant un budget de construction limité peuvent ajouter petit à petit plus d'options. Donc n'oubliez pas de contacter vos clients à nouveau pour leur proposer ces options.

[EN]

Due to the great success of our super-functional and highly affordable Aureole spot that can be applied in both concrete and plasterboard, we have expanded this collection with multiple variants. It is also possible to upgrade the already purchased spots to the more luxurious version later. This ensures that people with a limited construction budget can add more options later. So be sure to contact your customers again to offer them these options later.

[DE]

Durch den großen Erfolg unseres super-funktionalen und äußerst erschwinglichen Aureol- Spots, der sowohl im Beton- als auch im Gipskarton eingesetzt werden kann, haben wir diese Kollektion um einige weitere Varianten erweitert. Es ist auch möglich, die bereits gekauften Spots nachträglich auf die luxuriösere Version zu verbessern. Dies stellt sicher, dass Menschen mit einem begrenzten Bau Budget später weitere Optionen hinzufügen können. So vergessen Sie nicht Ihre Kunden nochmals zu kontaktieren, um ihnen diese Optionen nachträglich anzubieten.

Centonze LED Reflector

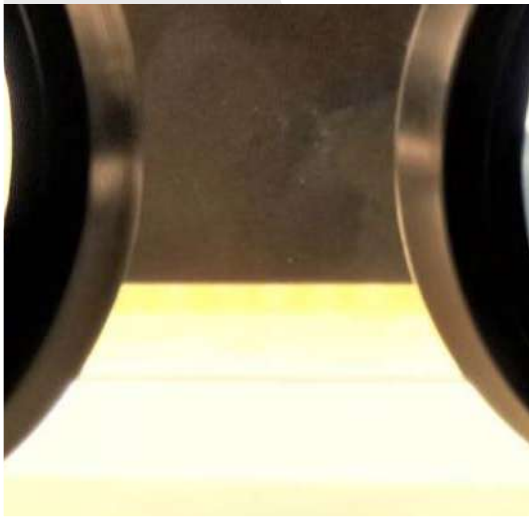

[NL]
Functioneel spotlicht of zachte indirecte sfeer is maar een druk op uw lichtschakelaar. In uitbereiding op onze Phantome Centonze collectie (Catalogus 2017 Pag 181), kan u nu een bijkomende indirecte led reflectie krijgen in de box. Stel u voor dat u door uw dressing naar de badkamer loopt en dat met een aparte bewegingsmelder enkel uw zachte 2100 Kelvin warme indirecte led licht aangaat. Wenst u meer licht voor iets uit uw kast te nemen, dan kan u de tweede kring met schakelaar of dimmer bijkomend aanschakelen. Handig toch! De randloze ingebouwde spotbox in vuurvast en overschilderbaar Fermacell materiaal is inbegrepen. (Led reflection in optie ook apart te verkrijgen om uw bestaande systeem uit te breiden)

[FR]
Le spot fonctionnel ou l'atmosphère douce et indirecte est une simple pression sur votre interrupteur. En surplus de notre collection Phantome Centonze (Catalogue 2017 Pag 181), vous pouvez maintenant obtenir une réflexion indirecte supplémentaire dans la boîte de plafond. Imaginez vous, vous allez à la salle de bain en traversant votre pansement et avec un détecteur de mouvement séparé votre douce lumière directe LED 2100 Kelvin s'allume automatiquement. Quand vous voulez prendre quelque chose de votre armoire, vous pouvez allumer le deuxième circuit ou utiliser le dimmer. Très facile! La boîte sans bordure intégrée dans le matériau Fermacell ininflammable et paintable est incluse. (Led réflexion en option également disponible séparément pour étendre votre système existant)

[EN]
Functional spot or soft indirect atmosphere is just a push on your light switch. In addition for our Phantome Centonze collection (Catalog 2017 Pag 181), you can now get an additional indirect led re ection in the ceilingbox. Imagine that you are going to the bathroom through your dressing and that with a separate motion detector only your soft 2100Kelvin warm indirect led light lights up. If you want more light to take something out of your cabinet, you can also turn on the second circuit with switch or dimmer. Very comfortable!. The borderless built-in spot box in non-combustible and overcoatable Fermacell material is included. (Led re ection in option also available separately for expanding your existing system)

[DE]
Für Funktionsscheinwerfer oder weiche indirekte Atmosphäre müssen Sie nur einmal auf Ihren Lichtschalte drückenr. In Vorbereitung auf unsere Phantome Centonze Kollektion (Katalog 2017 Seite 181), können Sie jetzt eine zusätzliche indirekte LED-Re ektion in der Deckenbox erhalten. Stellen Sie sich vor, dass Sie durch das Bad in ihr Ankleidezimmergehen gehen und dass mit einem separaten Bewegungsmelder nur Ihr weiches, 2100 Kelvin warmes indirektes LED-Licht au euchtet. Wenn Sie mehr Licht in Ihrem Schrank möchten, können Sie auch den zweiten Kreis mit Schalter oder Dimmer einschalten. Sehr praktisch! Die randlose, eingebaute Spotbox aus feuerfestem und überlackierbarem Fermacell Material ist im Lieferumfang enthalten. (Led Re ektion optional, auch separat erhältlich für

Macro & Centonze CDMR

[NL]

De CDMR lamp blijft een superkrachtige hoog kwalitatieve lichtbron en is uiterst geschikt om bomen, gevels, winkelruimtes of etalages stevig te verlichten. Ter uitbreiding van onze Macro en Centonze collectie is de M10/13 en wall versie er nu bij gekomen. Kijk zeker even terug voor de specificaties van verlichting voor grote bomen op pagina 379 in onze catalogus 2017.

[FR]

La lampe CDMR reste une source de lumière super puissante de haute qualité qui convient à éclairer des arbres, des façades, des zones commerciales ou des fenêtres. Pour l'expansion de notre collection Macro et Centonze, la version M10 / 13 et la version murale sont devenues réalité. Jetez un oeil aux spécifications de l'éclairage pour les grands arbres à la page 379 de notre catalogue 2017.

[EN]

The CDMR lamp remains a super powerful high-quality light source and is highly suitable for powerful lighting of trees, facades, shopping areas or windows. To expand our Macro and Centonze collection, the M10 / 13 and wall version has now come true. Take a look back at the specifications of lighting for big trees on page 379 in our catalog 2017.

[DE]

Die CDMR-Lampe bleibt eine super leistungsstarke, hochwertige Lichtquelle und eignet sich hervorragend für die kraftvolle Beleuchtung von Bäumen, Fassaden, Einkaufszentren oder Fenstern. Um unsere Makro- und Centonze-Kollektion zu erweitern, wurde die M10 / 13- Wandversion entworfen. Gehen Sie zurück auf Seite 379 in unserem Katalog um eine Übersicht über die Vorgaben der Beleuchtung für große Bäume zu erhalten.

Matisse

[NL]
Een fijne leeslamp die een warm en zacht licht geeft over uw leesboek of object. Maar onze Matisse is meer dan een schilderijverlichting of leeslampje. Met deze collectie kunnen we ongelofelijk veel architecturaal maatwerk aanbieden die de handige elektricien weet om te toveren tot een schitterende lichtcompositie. Op pagina 50 vindt u een voorbeeld van maatwerk. Zo kan u met onze hulpstukken op pagina 215 van catalogus 2017 onbeperkt samenstellingen bedenken. U tekent het uit, kiest de materialen en bepaalt de lichtkleur. En wij leveren al de onderdelen die u ter plaatse verder op maat kan afwerken. Welke manier kan u bedenken om hiermee iets origineel te verlichten?

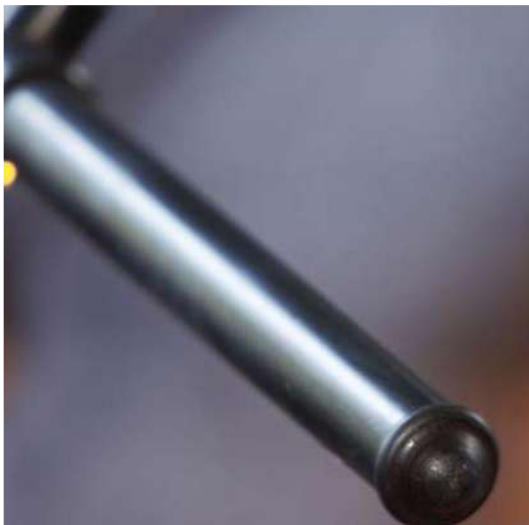

[FR]
Une belle lampe de lecture qui donne une lumière douce et chaud sur vos lectures ou votre objet. Mais notre Matisse est plus qu'une lampe de peinture ou de lecture. Avec cette collection, nous pouvons offrir des caractéristiques architecturales nombreuses que l'électricien adroit sait transformer en une composition lumineuse exceptionnelle . Voir à la page 50 pour un exemple d'un tel travail personnalisé. Par exemple, avec nos accessoires à la page 215 du catalogue 2017, vous pouvez composer des possibilités infinis. Vous créez, choisissez les matériaux et vous choisissez la couleur claire, et nous fournirons toutes les pièces que vous pouvez personnaliser sur place. Imaginez-vous les multi-possibilités d'éclairage.

[EN]
A nice reading lamp that gives a warm and soft light above your reading book or object. But our Matisse is more than a painting or reading lamp. With this collection we can offer incredibly many architectural features that the handy electrician knows to transform into a brilliant light composition. See on page 49 an example of such a custom work. For example, with our accessories on page 215 of catalog 2017 you can use unlimited compositions. You draw it out, choose the materials and determine the light color, and we will provide all the parts that you can customize on-site. What kind of way can you imagine to light up something original?

[DE]
Eine schöne Leselampe, die ein warmes und weiches Licht über Ihr Lesebuch oder Objekt gibt. Aber unsere Matisse ist mehr als ein Gemälde oder Leselampe. Mit dieser Kollektion können wir unglaublich viele architektonische Besonderheiten anbieten, die der handliche Elektriker in eine brillante Lichtkomposition verwandelt. Siehe Seite 49 auf einem Beispiel einer solchen Sitte. Zum Beispiel können Sie mit unserem Zubehör auf Seite 215 des Katalogs 2017 unbegrenzte Kompositionen entwerfen. Sie ziehen es heraus, wählen die Materialien und bestimmen die helle Farbe, und wir liefern alle Teile, die Sie vor Ort anpassen können. Welche Art von Weg können Sie sich vorstellen, etwas Ursprüngliches zu entlasten?

Q-bri & Eligne

[NL]
De Q-bri en Eligne wall kunnen nu ook outdoor! Vele nieuwe toepassingen zijn mogelijk. Ook is de Q-bri pole een leuke en zeer robuuste oplossing voor paden, opritten en tuintoepassingen. De vele beschikbare maten zorgen dat u telkens weer origineel kan afwisselen. De zandsteen kleurige beton is ietwat ruw afgewerkt (eigenschap van beton), maar dit zorgt juist voor het stoere en stevige karakter van de tuinpaal. De pin is zeer gemakkelijk in de grond te monteren. De Eligne is als superstrakke vloerlamp een oplossing voor zowel klassieke als moderne en strakke interieurs. De Outdoor Wall versie kan met de hulpstukken van catalogus 2017 onbeperkt worden aaneengekoppeld. Uiteraard kan deze ook binnen worden toegepast...

[FR]
Le Q-bri et Eligne Wall peut également être utilisé à l'extérieur! Beaucoup de nouvelles applications sont possibles. Le pôle Q-bri est également une solution amusante et très solide pour les allées, les rues et les applications de jardin. Les nombreuses tailles disponibles vous permettent d'alterner à chaque fois. Le béton coloré au grès est légèrement rugueux (propriété de béton), mais cela crée le caractère dur et robuste du poteau du jardin. Le pin est très facile à monter dans le sol. L'Eligne est une solution de lampe de sol super minimaliste pour les intérieurs classiques ainsi que modernes. La version murale extérieure peut être élargi illimitée avec les accessoires du catalogue 2017. Bien sûr, elle peut également être appliqué à l'intérieur de la maison ...

[EN]
The Q-bri and Eligne wall can now also be used outdoor! Many new applications are possible. The Q-bri pole is also a fun and very solid solution for paths, ramps and garden applications. The many available sizes make it possible for you to alternate each time. The sandstone colored concrete is somewhat roughened (because it is concrete), but this just makes for the tough and sturdy character of the garden pole. The pen is very easy to mount in the ground. The Eligne is a super minimalistic floorlamp solution for both classical and modern interiors. The outdoor wall version can be expanded unlimited with the accessories of Catalog 2017. Of course, this can also be applied inside the house ...

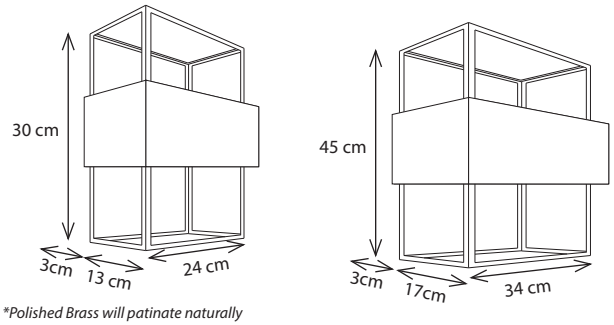

[DE]
Die Q-bri und Eligne Wand-Edition kann jetzt auch draußen genutzt werden! Viele neue Einsatzzwecke möglich. Der Q-Bri-Pole ist auch eine spannende und sehr solide Lösung für Wege, Straßen und für die Verwendung im Garten. Die vielen verfügbaren Größen ermöglichen es, dass Sie jedes Mal wechseln können. Der sandsteinfarbene Beton ist etwas aufgerauht (weil es Beton ist), aber nur so kann der harte und kräftige Charakter eines Gartenpfosten erzeugt werden. Der Stift ist sehr leicht im Boden zu befestigen. Die Eligne ist eine super minimalistische Stehlampe für klassisches und modernes Interieur. Die Außenwandversion kann mit dem Zubehör von Katalog 2017 unbegrenzt erweitert werden. Natürlich kann das alles auch im Haus angewendet werden ...

Bestellingen plaatsen

U bestelt de orders bij Post Light International
Per telefoon: +32 (0) 3 283 63 20
Per Fax: +32 (0) 3 283 63 21
Per e-mail : info@authentage.be

Onder vermelding van

de code van de lamp / omschrijving uit de prijslijst (let hierbij op de gewenste uitvoering Donkerbrons, Mat nikkel, Chroom of Messing ; vermeldt u deze evt. apart)
De lichtbron is niet mee verrekend in de prijs, gelieve bij bestelling dus uitdrukkelijk te vermelden indien u de lampen ook wil bestellen.
Een referentie, bestelnummer of offertenummer
Betreft Vitrine pendellampen: gelieve ook de totale gewenste hoogte door te geven.

Leveringen

De betalingen dienen voor de levering op de bankrekening te zijn overgeschreven, 1 à 2 weken voor de levering wordt hierover bericht gegeven.
De standaard levertermijn ligt tussen de 6 tot 8 weken, uitgezonderd maatwerk.
Voor leveringen onder de 500 € netto, exclusief Btw wordt IN BELGIE een transportkost aangerekend van 15 euro exclusief BTW.
Leveringen buiten Belgie zijn EX-Factory. De transport voorwaarden kunnen hiervoor apart besproken worden.

Speciale aanvragen

Het is mogelijk om afmetingen, fittingen, kleuren en zelfs ontwerpen van de armaturen aan te passen. Hiervoor kan een offerte aangevraagd worden (u kan ons bereiken op de bovenstaande gegevens). Er dient steeds rekening gehouden te worden met een langere levertermijn bij maatwerk.

Lichtbronnen

Bij al onze producten zijn de lichtbronnen niet mee gerekend in de prijs. Ze worden bijgevolg niet standaard meegeleverd, indien de lichtbronnen gewenst zijn, gelieve dit bij bestelling duidelijk te vermelden.

Garantie

Op al onze armaturen geven wij een standaard fabrieksgarantie van 2 jaar op onderdelen, uitgezonderd glasbreuk. Door de ruwe afwerking en de gebruikte natuurlijke materialen is een kleurverschil en verschil in structuur niet uitgesloten.

Manuele assemblage

Het merk Authentage wordt grotendeels manueel geassembleerd. De ruwe en brute afwerking, met mogelijke structuur en kleurnuances, zijn eigen aan het merk. Dit past in de huidige trend van, gebruiken en herbruiken, van natuurlijke en eerlijke materialen. Zij geven samen met de geadviseerde lampen, charme en een warme uitstraling. Dientengevolge kan dat geen aanleiding geven tot klachten of omruilingen.

Placer une commande

Vous pouvez commander auprès de Post Light International
Par téléphone : +32 (0) 3 283 63 20
Par Fax : +32 (0) 3 283 63 21
Par E-mail : info@authentage.be

En mentionnant

Le code de la lampe / la description (via la liste de prix en précisant la couleur : bronze foncé, nickel mat, chrome ou laiton ; éventuellement le mentionner à part).
La source lumineuse n'est pas incluse dans le prix. Veuillez mentionner lors de votre commande si vous désirez des ampoules supplémentaires avec leur référence, le numéro de commande et de l'offre.
Concernant les suspensions, veuillez nous indiquer la hauteur souhaitée.

Livraisons

Le paiement doit être effectué avant livraison par virement bancaire ;
1 à 2 semaines avant la livraison, vous serez averti du paiement à effectuer.
Les délais de livraison sont de 6 à 8 semaines, sauf pour les réalisations sur-mesure.
Pour les livraisons inférieures à 5OO € net, HTVA, les frais de transport s'élèvent à 15 € HTVA.
Les livraisons en dehors de la Belgique sont EX-WORK.
Les conditions de transport sont déterminées au cas par cas.

Demande particulière

Sur demande, nous avons la possibilité d'adapter les mesures, les conceptions, les couleurs et le style des armatures. Veuillez nous envoyer votre demande pour une offre individualisée. Dans ce cas, nous prévoyons des délais de livraison plus longs pour toute réalisation sur-mesure (en fonction de la faisabilité technique).

Source de lumière

Dans toute la gamme, les sources de lumière ne sont pas incluses dans le prix. Par conséquent elles ne sont pas livrées systématiquement sauf si précisé lors de la commande.

Garantie

Nous offrons une garantie de 2 ans sur les pièces pour tout défaut de fabrication. Le bri de glace n'est pas pris en compte.
En raison de certaines finitions brutes et du caractère naturel des matériaux, une variation de couleur, voire de structure, n'est pas exclue.

Assemblage manuel

Authentage réalise l'assemblage des éléments principalement à la main. La marque se distingue par des produits aux finitions brutes avec des nuances de couleur et de structure. Ceci est le signe des tendances actuelles qui allient l'usage et la recupération de matériaux naturels et nobles. Utilisés avec les lampes que nous conseillons, ce concept diffuse une lumière chaleureuse et envoûtante. C'est la raison pour laquelle, aucune plainte ou échange ne sera accepté.

Orders
All orders should be placed at Post Light International
By telephone: +32 (0) 3 283 63 20
By Fax: +32 (0) 3 283 63 21
By e-mail: info@authentage.be

Indicating
The code of the fixture / correct description (ensure that the desired execution Dark Bronze, Brushed Nickel, Chrome or Brass is pronounced clearly , possibly state this separately)
The light source is not included in the price, so when ordering please state clearly if you also want to order lamps.
A reference, quotation or order number
Glass pendant lamps : please add the total height all together.

Deliveries
The payments for delivery need to be transferred to our bank account, 1 or 2 weeks before the planned delivery.
The standard delivery time is between 6 to 8 weeks, except for customised work.
For deliveries under 500 € net of VAT in Belgium there is a transportation fee of 15 euros excluding VAT.
Deliveries outside Belgium are EX-Factory. The transport conditions can be discussed separately.

Special Request
It is possible to adjust the size, fittings, Colours and even design of the luminaires. This can be applied for a job (you can reach us on the above data).
It should be remembered that there is.

Light sources
All our products are provided without any light sources. They are therefore not included in the cost and if the light sources are required, please look under accessories and order those clearly.

Warranty
For all our fixtures we give a standard warranty of 2 years on parts, except glass breakage. Due to the rough finish and used natural materials, a colour difference and differences in structure are possible. Complaints concering the natural change of colour of our products will not be accepted.

Manual assembly
The Authentage brand is largely manually assembled. The rough and brutal finish with possible structure and Colour nuances are unique to the brand. This fits the current trend to use and reuse natural materials. They give, together with the recommended lamps charm and a warm atmosphere. Consequently, it does not give a reason complaint or exchanges .

Bestellungen
Alle Bestellungen sollten bei Post Light International erteilt werden
Per Telefon: +32 (0) 3 283 63 20
Per Fax: +32 (0) 3 283 63 21
Per E-Mail : info@authentage.be

Unter Angabe
Des Codes der Lampe/der Beschreibung aus der Preisliste (achten Sie bitte hierbei auf die gewünschte Ausführung Dunkelbronze, Nickel matt, Chrom oder Messing; geben Sie diese eventuell gesondert an). Die Lichtquelle ist nicht im Preis inbegriffen; bitte geben bei Ihrer Bestellung ausdrücklich an, wenn Sie auch die Lampen bestellen möchten. Einer Referenz, Bestellnummer oder Auftragsnummer. Bei Pendellampen: Bitte geben Sie hier auch die gewünschte Gesamthöhe an.

Liefrungen
Die Rechnungen sind vor der Lieferung auf das jeweilige Konto zu überweisen, 1 bis 2 Wochen vor der Lieferung erhalten Sie hierzu eine Mitteilung. Die Standard-Lieferzeit liegt bei 6 bis 8 Wochen, ausgenommen Sonderanfertigungen. Für Lieferungen unter 500 € netto, zzgl. MwSt., werden IN BELGIEN Transportkosten in Höhe von 15 € zzgl. MwSt. berechnet. Lieferungen außerhalb von Belgien erfolgen ab Werk. In diesen Fällen können die Versandbedingungen separat besprochen werden.

Sonderanfertigungen
Es besteht die Möglichkeit, Maße, Fassungen, Farben und sogar Entwürfe der Leuchten anzupassen. Bitte setzen Sie sich mit uns unter den oben angegebenen Kontaktdaten in Verbindung und wir senden Ihnen gerne ein Angebot. Bitte beachten Sie jedoch, dass Sie aufgrund der Sonderanfertigung mit längeren Lieferzeiten rechnen müssen.

Lichtquellen
Bei all unseren Produkten sind die Lichtquellen nicht im Preis inbegriffen. Sie werden also nicht standardmäßig mitgeliefert. Falls Sie die Lichtquellen bestellen möchten, geben Sie dies bitte bei Ihrer Bestellung deutlich an.

Garantie
Wir geben auf all unsere Halterungen eine Standardgarantie von 2 Jahren auf Teile, mit Ausnahme von Glasbruch. Durch die raue Oberfläche und die natürlichen Materialien sind Unterschiede in Farbe und Struktur nicht ausgeschlossen. Beschwerden hinsichtlich der natürlichen Veränderung der Farbe unserer Produkte werden nicht akzeptiert.

Manuelle Herstellung
Die Produkte der Marke "Authentage" werden größtenteils manuell hergestellt. Die raue Oberfläche mit möglicher Struktur und die Farbtöne sind das Markenzeichen unserer Marke. Dies passt zum aktuellen Trend, natürliche Materialien zu verwenden und wiederzuverwenden. Unsere Produkte verleihen Charme und schaffen gemeinsam mit den empfohlenen Lampen eine warme Atmosphäre. Daher können wir keine Beschwerden oder Anfragen nach Umtausch aus diesem Grund akzeptieren.

Custom-made Macro on wooden pole Bronze
