

THE FRENCH TOUCH

THE FRENCH TOUCH

The French Touch is a state of mind. Rooted in French *savoir-vivre*, it reflects a desire to make each product unique. Particular attention is given to design to ensure the elegance, technicality, ergonomics and practicality which characterize French products. The importance given to reducing the ecological footprint is another of the core values of the French Touch.

If you are looking to give meaning, offer a warm welcome, surprise and enchant through your difference and good taste, this catalogue is a gold mine of new ideas, developed by the women and men of our teams in France to captivate your guests.

And if you are looking to give meaning whilst being more responsible, we have designed our products in an eco-responsible way, all the way through to transport, and including strong reforestation initiatives.

Meaning also signifies products which are easy to clean for the well-being of your teams: in developing sustainable accessories, we obviously considered their maintenance conditions.

You will discover products here but beyond that, we hope to enter into a dialogue with you. So please don't hesitate to call us or send us a message. Wherever you are in the world, we have someone nearby, and we are always here to talk and listen... Together, we can move forward.

Oh, and if you're wondering who the "we" of JVD actually are, we are a modestly sized team of people who share the same enthusiasm, know-how and taste for innovation. Each of the professionals at JVD and myself are proud to usher you into your perusal of this catalogue.

See you soon!

Thierry Launois
Managing Director

INNOVATION IN THE SERVICE OF WELL-BEING

The strength of JVD resides in our provision of accessories adorning hotel rooms around the world for more than 30 years. JVD accessories help to personalize hotel rooms, giving them the final touch to ensure guests' well-being. Accessories are what truly make a difference.

VALUES AND TALENT

SMART

Our products are designed to be used by anyone, from children to maintenance personnel to people with reduced mobility. Not only are they suited to their environments but they are also safe, practical and ergonomic.

THE JVD GROUP HAS OPERATIONS AROUND THE WORLD THANKS TO LOCATIONS IN EUROPE, ASIA AND THE AMERICAS.

ECO-DESIGN

Beginning with the design phase, JVD products are made to minimize their impact on the planet. From packaging to power consumption, each detail is carefully conceived to preserve the environment.

RESPONSIBLE ENGINEERING

With paper and energy usage reduced as much as possible, fewer components and a low wattage required to switch them on, our products are eco-responsibly designed and produced.

SERVICE ORIENTATION

Customer satisfaction is part of JVD's DNA. And so our teams work hard to guarantee impeccable quality, short turnaround times and flawless customer service.

DESIGN

10 years ago, JVD created its own Design Department. Our teams devise products which embody the spirit of the French Touch.

RESEARCH & DEVELOPMENT

Managed internally by our R&D Centre, each of our products is designed in accordance with our ongoing strategy of pursuing innovative solutions. Elegance, design and ergonomics are the keys to a successful product.

OUR HISTORY

1984	1988	1991	1997	1999	2006	2007	2015	2018
Creation of JVD	JVD develops its first hand dryer and becomes a manufacturer	JVD develops its first hair dryer	JVD creates its own Engineering Department	Creation of JVD Asia subsidiary in Singapore	JVD creates its own integrated design service	Creation of JVD España subsidiary in Spain	Creation of JVD Americas in Mexico	Launch of HygiaConnect, the world's first connected hygiene platform

COMMITMENT TO RESPONSIBILITY

Eco-responsibility has been one of JVD's pillars from the very beginning. The company's commitment on this subject only grows stronger every day and now concerns each of its different levels. JVD is dedicated to the idea of transmission and makes it a point of honour to play an active role in an ecological transition which looks out for everyone's well-being.

BORN TO BE GREEN

You might think we're mad but, if our products lasted 20 years without you having to replace them, we would be thrilled! At JVD, we design quality products meant to withstand the test of time.

1

WORKING AND PRESERVING

We have always been convinced that the strategy of today should be to improve the future of tomorrow. All the teams at JVD strive actively to think of everything and to make a real difference. From design to manufacturing, transport to use and customer service to recycling, we know that each detail counts.

2

ECO-DESIGN

Whether we're talking about our next-gen jet air hand dryers which reduce energy consumption and eliminate the use of any consumables, our flow-reducing soap dispensers or our foaming soap which drops consumptions levels by four, our R&D Department endeavours to design our products to be eco-responsible.

3

RAW MATERIALS AND PARTNERS

Eco-responsibility also concerns our choice of raw materials and partners. Whenever possible, we prioritize partners located as close as possible to our production unit so as to reduce the environmental impact of our transport. For years, we have been striving to ensure that expertise endures and so encourage our suppliers' capacity for innovation. Out of concern for our social impact, we work with associations from the social and solidarity economy.

6

COMBATING PLANNED OBSOLESCENCE

At JVD, our products are designed and tested to be repairable and to repair them. Our appliances' spare parts are available for 10 years. Quality products meant to be used and to run for the long term.

4

MANUFACTURING

All our waste is sorted and collected before being sent to a treatment and recycling centre. For example, we reuse our suppliers' cardboard boxes for our shipments, and we grind used paper and then use it as wedges for our shipped products. What about the rest? It is recycled or reused by other companies in the region!

5

LOGISTICS

Our packaging is designed with a twofold objective: to protect the integrity of the transported goods and to serve as an installation diagram. These simple, sensible optimizations further reduce our carbon footprint.

GOING EVEN FURTHER TOGETHER

PRESERVING IS GREAT, BUT REBUILDING IS EVEN BETTER!

Although we had always worked to preserve the environment and reduce our footprint as much as possible, it was time for us to move on to the next step and become a real actor for ecological restoration. We also wanted to help spread our values by engaging our clients in this shared outlook. This is why we reached out to the association Planète Urgence and established a partnership with them to fight deforestation in Indonesia.

A VERY SIMPLE MECHANISM

It couldn't be any simpler: for each hand dryer purchased from the Air range (Exp'air, Stell'air, Copt'air and Sup'air), a tree is planted!

INDONESIAN MANGROVES

Indonesia is home to the largest expanse of mangroves in the world, but it has been on the decline for decades and its gradual disappearance is hurting not only coastal species but also populations whose livelihoods come primarily from fishing. A whole ecosystem is in danger and needs to be protected.

16 000

THE NUMBER OF TREES PLANTED
SINCE WE LAUNCHED THE OPERATION,
1 HAND DRYER = 1 TREE.

RANGES

JVD offers a broad selection of equipment, lines and colours to adapt to your environment and make it unique. Thanks to our mastery of product design to production, JVD is the only manufacturer able to offer matching sets ranging from hand dryers to toilet roll dispensers by way of soap dispensers.

BLACK COLLECTION RANGE

Black has the virtue of endowing an object with a more qualitative value. Whatever the ambience of the place, black products can fit in easily (and can be either discreet or highly visible). The matte aspect amplifies the qualitative side of the product and makes the solution less dirty and more scratch resistant. Ever in pursuit of solutions which can minimize our environmental impact, the black color has given us the opportunity to use recycled plastic.

METAL RANGE

The use of stainless steel and simple lines for this range gives it a robust appearance. Conversely, the opening for a more carefully worked view of the levels adds a touch of refinement to the design. The final solution is a perfect match for heavy traffic locations.

YALISS RANGE

The more pronounced character of the Yaliss range seeks to give your washrooms a new image between gentleness and liveliness. The products provide new responses to broader requirements: larger capacities, universal or removable cores and improved hygiene, whilst retaining all the qualities of the Cleanline range (ease of use, personalization, etc.). To date, this is the most complete range for fitting out your washrooms.

CLEANLINE RANGE METAL GREY

The metallic finish is essential, classic and highly valued. This range personalizes and enhances anywhere it is installed. It's truly the finishing touch! Rarely discreet, the use of light and sheen serves to underscore the careful design of the products.

CLEANLINE RANGE WHITE

The Cleanline range was designed to be both classic and timeless. Its rounded shapes and straight sides allow it to fit seamlessly and discreetly into any type of washroom. Its bevelled edges endow it with modernity and character. Its charcoal grey base seems to lighten up the volume. The range's success hinges on the possibility of personalizing the appliances with our clients' logos, as well as their simplicity and practicality.

KIDS RANGE

**SEE
P.12**

THE KIDS RANGE

The purpose of our Kids range is to help children to learn the basics of hygiene from a very young age. By making the experience of washing and drying their hands more enjoyable, JVD provides a comprehensive solution, suitable for environments visited by children. Thanks to our powerful yet quiet hand dryers, JVD also helps to keep washrooms clean, with no wet paper roll on the floor and no clogged pipes. By limiting their use of paper products, kids can also participate in the creation of a greener, more sustainable future by reducing the carbon footprint associated with using paper.

A WORD FROM THE DESIGNER

The Kids range has long been a part of the JVD portfolio. What could be more obvious than to bring a little fun into areas where children spend time. Two ingredients are needed: colour and a sense of escape... No need to explain the choices: the kids get on board straight away if the spirit is cheerful! The world of the savannah is exotic and makes for a great way to inject a playful, entertaining spirit into a place. "Disguising" our products helps to forge a relationship with the object. Each child can now just enthusiastically ask for water from the sink, soap from the dispenser and air from the hand dryer... By adding an educational sign, you can push the concept of animals helping kids to wash their hands. The savannah is also a world which is conducive to creating new characters and so can continue to bring life into our washrooms in the future...

HAND DRYERS

HAND DRYERS

A hand dryer should not be chosen at random. Whether your constraints relate to usage, maintenance, noise or vandalism resistance, we have a large array of equipment suited to your environment.

VANDALISM RESISTANCE

In some places, special attention needs to be given to vandalism resistance. Standard NF EN 62262 provides a clear interpretation of this level of resistance with the IK index. IK10 is the highest level of resistance. A device of this type is able to tolerate at least a blow from a 5 kg sledgehammer. Devices with an aluminium or steel cover are even more resistant.

MAINTENANCE

Paper rolls require flawless logistics to prevent them from running out. Some hand dryers require no maintenance while others have a water recovery tray which needs to be emptied regularly and air filters which need to be replaced or cleaned periodically.

ECOLOGICAL FOOTPRINT

It takes 17 trees to produce one tonne of paper. Its manufacturing and transport then generate significant amounts of CO². For example, the French leader in paper consumables generates 30,000 tonnes of CO² annually, just to transport its paper within France. In this respect, hand dryers are the ideal solution for reducing your ecological footprint. Next-gen jet air hand dryers consume very little energy, and the absence of consumables renders the impact of transport anecdotal at best.

HOT OR COLD AIR

If the washroom in question has little to no heating, a cold sensation during hand drying can be unpleasant. And so we recommend opting for a hand dryer which uses evaporation or pulsed air with a heating element.

NOISE

The sound of a hand dryer can become a nuisance if located nearby an office or restaurant dining room. Most hot air hand dryers are relatively quiet. Some jet air hand dryers also manage to combine power with a low noise level.

USAGE LEVEL

A hand dryer should provide a solution which is compatible with the level of usage of the washroom. For places with little usage (< 50 visits daily), all three solutions are possible. For places with normal usage (50-250 visits daily), the cost of paper becomes prohibitive. For places with high usage (250-400 visits daily), jet air hand dryers are the only solution capable of guaranteeing cost control and a fast drying time. Lastly, for places with intensive usage (> 400 visits daily), the chosen hand dryer should have a brushless motor or an induction motor.

HAND DRYERS

ZEPHYR HOT AIR

MADE IN FRANCE

A WORD FROM THE DESIGNER

"A colourful finish is now essential, classic and highly valued. This new range personalizes and enhances any place where it is installed. It's truly the finishing touch! Rarely discreet, the use of light and sheen serves to underscore the careful design of the products."

Jean-Guy de Russé

PRODUCT ADVANTAGES

- Personalizable with our clients' names
- Cost-effective
- Anti-vandalism
- 6 Colour choices

CHARACTERISTICS

- Drying time: 20-30 seconds
- Usage: average
- Noise level: 69 dB
- Illuminated drying zone
- Rated power: 2100 W
- Anti-vandalism: IK10 ABS cover
- Power supply: 220-240 V - 50 Hz
- CE - Class II - IP23
- 3 year warranty
- Dim.: 214 (L) x 243 (H) x 194 (D) mm

HAND DRYERS

INTEGRATED SOLUTIONS

For more than 30 years now, we have been imagining and building built-in solutions to meet complex technical constraints. Backed by our expertise in hand dryers, particularly for railway applications, we can scale any form of solution for our clients around blown air: drying for industrial parts, space heaters, use in severe, restricted or confined environments, and so on. Our mastery of simulations of systems' air flow behaviours allows us to very quickly reach perfectly effective, personalized solutions.

Olivier de Barbeyrac
Technical Manager

EXPERTISE

Having dealt with the most varied constraints over more than 30 years, we put our know-how at your disposal to provide you with fast responses and effective solutions.

DESIGN & ERGONOMICS

Between design, efficiency and footprint limitations, you undoubtedly have multiple expectations. We can take all those demands into account to devise a completely personalized solution for you.

Fluid mechanics

PUSHING THE LIMITS OF INNOVATION

- Space constraints
- Aesthetic constraints
- Normative constraints
- Acoustical constraints
- Meteorological constraints
- User behavioural constraints

BESPOKE DEVELOPMENT & PRODUCTION

Our R&D Department designs and develops each bespoke built-in system for some of the most complex and difficult environments: railway, industry, communities, high altitude, etc. Based at the same site in Nantes, our R&D and manufacturing teams work closely together to ensure flexibility and agility in the development and implementation of our clients' projects.

An aerial, high-angle photograph of a swimming pool. The water is dark and textured with ripples and reflections. Several people are visible in the pool, some swimming and some standing. The lighting creates a dramatic, almost abstract pattern of light and shadow on the water's surface. A vertical teal-colored bar is positioned on the right side of the image.

HAIR DRYERS **FOR POOLS & GROUPS**

COMMUNAL HAIR DRYERS

Whether installed at a swimming pool, a gym or a spa, our hair dryers will adapt to any environment.

GUARANTEED QUIET

At just 70 dB, the Neptune hair dryer is fitted with an extremely efficient, smart motor. It is so quiet that its presence may even be forgotten, wherever you install it.

ERGONOMIC USE

When they are optimized to adapt to all ages thanks to their adjustable height and 180° rotation, hair dryers become much easier to use.

Rethink your users' comfort by offering them the only communal hair dryer that moves for you!

“ The Neptune guarantees the "wow" factor amongst our users! The adjustable height and above all the 180° rotation make for a highly innovative concept. Aesthetically pleasing and much quieter than the competitors, it is also very convenient for cleaning. With nearly 300,000 visitors annually, we needed equipment which would be fast and easy to install and maintain. The on/off switch is a real plus, because it allows us to isolate the hair dryers, one by one. Pleasant to use and easy to maintain: we've received nothing but positive feedback. ”

Serge Lucas
Water Complex Director
Town of Cesson-Sévigné

ROBUSTNESS

Corrosion resistant in chlorinated atmospheres, fitted with an IK10 ABS cover and an induction motor to handle intensive use: choosing Neptune also means opting for performance.

DID YOU KNOW?

The choice of name for our new hair dryer was no matter of chance. *Favet Neptunus Eunti* is the motto of the city of Nantes. The Latin phrase means "Neptune favours those who dare" or "May Neptune favour the traveller". Created by our own Engineering Department, our hair dryers are made in France, in Nantes!

PAPER **DISPENSERS**

PAPER DISPENSERS

With their optimized design and ergonomics, our paper dispensers are conceived and developed to be easy to use and to maintain.

DISPOSABLE PAPER

Disposable paper rolls without cores are compatible with centre pull devices.

Disposable paper rolls with cores are compatible with auto cut devices. They come in the form of spools of different diameters and different lengths. Please note that some spools are only compatible with proprietary solutions.

PAPER TOWEL FORMATS

Disposable folded paper is compatible with zig-zag devices. They are classified according to the way the sheets are folded:
 Interleaved paper: W or Z
 Zig zag paper: V
 Folder paper: C

NEW

JUMBO MOBILE SUPPORT

Perfectly suited to JVD products and easy to install, it allows users to place their mobile phones on top without risk.

REF 8 99 1625
 Mobile Holder for Jumbo 400

Brushed 304 stainless steel.
 Compatible with Cleanline Jumbo 200-400 and Yaliss Jumbo 400.
 Dim.: 99 (L) x 190 (D) x 144 (H) mm

2 POSSIBLE SOLUTIONS

Two solutions coexist on the market today. For proprietary solutions, the equipment is usually free or sold at a reduced price. The equipment then only works with that brand's consumables which tend to be more expensive. Conversely, the open solutions from JVD's product range are invoiced in the beginning but allow you to use any brand of consumable (including brands which offer proprietary equipment).

CLEANLINE RANGE PAPER DISPENSERS

THE BENEFITS OF THE CLEANLINE RANGE

MADE IN FRANCE

Our products are backed by JVD's 30 years of experience and are 100% designed and manufactured in France.

SECURE LOCK

The Cleanline range is fitted with a removable key. A permanent key is also available (optional).

EASY TO CHANGE OUT CONSUMABLES

The Cleanline range is compatible with most consumables on the market, their levels are always visible, and they are easy to access.

PERSONALIZABLE

The Cleanline range is completely personalizable and can bear the client's brand name or logo.

- Dim. (wall-mounted): 360 (L) x 360 (H) x 405 (D) mm

A black and white photograph of two men in white lab coats standing at a sink. The man in the foreground is washing his hands under a running faucet. The man behind him is also washing his hands. The background is blurred, suggesting a clinical or laboratory setting. A teal-colored rectangular overlay is present in the top right corner of the image.

SOAP **DISPENSERS**

SOAP DISPENSERS

AUTOMATIC SOAP DISPENSERS

Automatic soap dispensers are becoming increasingly common in washrooms. They are more hygienic as no contact with the device is required. They can also be more economical by limiting the flow.

SOAP IN BULK OR A CARTRIDGE

Two solutions coexist on the professional soap dispenser market. Proprietary soap dispensers with cartridges need to be replaced whenever the cartridge is empty. Solutions with an integrated container make it possible to use bulk soap (from a container). This solution is more economical and more ecological (less packaging).

GEL OR FOAMING SOAP

Soap is available in two forms. Gel soap is the most common one on the market.

Soap also comes in a foaming version. With a suitable dispenser, this solution can cut soap consumption by four and water consumption by 50%.

THE PUMP: A KEY COMPONENT OF THE DISPENSER

Inside the dispenser, the pump is the part which manages the delivery of the soap. A pump's performance can be measured based on two criteria: its capacity to limit the flow and its longevity.

ECONOMICAL
THE FLOW REDUCER CAN CUT THE CONSUMPTION OF GEL SOAP IN HALF

ECOLABEL IS A EUROPEAN ECOLOGICAL LABEL

Based on the principle of a "global approach" which "considers the product's life cycle from the extraction of raw materials to manufacturing, distribution and use, all the way to its recycling or disposal after use". Quality and uses are also taken into account.

1/4

A foaming soap dispenser can cut consumption by up to 4 times

WASTE SORTING

Sorting recyclable waste at the source has been an obligation since 1 July 2016 (French Decree 2016-288 of 10 March 2016 implementing the Energy Transition for Green Growth Act).

SORTING FLOWS OF PAPER, METAL, PLASTIC, GLASS AND WOOD IS COMPULSORY

For whom?
For companies, shops and administrations which entrust their waste to a private company or which generate more than 1,100 litres of waste per week and which use a public waste collection service.

SORTING OFFICE PAPER AT THE SOURCE IS COMPULSORY.

1 JULY 2016

For organizations with 100 or more administrative jobs

1 JANUARY 2017

For organizations with 50 or more administrative jobs

1 JANUARY 2018

For organizations with 20 or more administrative jobs

OFFICE BINS

SORTING BIN WITH 2 CONTAINERS

REF 8 99 1229
Round Recycling Bin

NEW

10 LITRES

PRODUCT ADVANTAGES

- 10 L capacity
- Rubber protection at base
- Water and rust resistant inner containers

CHARACTERISTICS

- Material: painted metal or stainless steel
- Capacity: 10 L
- 2 compartments of 5 L each

Dimensions and capacity:

- Round: 225 (Ø) x 270 (H) mm / 10 L

ASHTRAYS

ASHTRAYS

JVD's ashtrays are **robust** thanks to their thick walls, treated for **outdoor use** and UV resistant. They are **practical** and easy to empty as they are fitted with inner containers as well as an **anti-vandalism** lock. Each ashtray comes with a **kit to install it** on the wall or in the ground.

WALL-MOUNTED ASHTRAYS

Wall-mounted ashtrays are to be fixed to the wall. Made of painted steel or stainless steel, they are very discreet and work great anywhere thanks to their compact size.

STANDING ASHTRAYS

Standing ashtrays are set up directly on the ground, where they can be fixed or not so they can be moved. Whether made of painted steel or stainless steel, their delicacy adds a touch of elegance to your smoking areas.

FRENCH DECREE 2015-337

In Paris and most other cities and towns in France, the fight for cleanliness has become a priority. As a result, people who drop litter on public roads may receive a €68 ticket. Establishments which are open to the public are therefore motivated to provide solutions: ashtrays, bins and combinations of the two can help contribute to meeting this policy. Additionally, regulations on sidewalk cafés have become stricter. Because of this, many sidewalk café charters have been put in place or updated to compel owners to provide ashtrays to their customers.

ASHTRAYS WITH BINS

Ashtrays with bins can save space while keeping your outdoor areas clean. They allow employees and visitors to throw out waste like cups and packaging.

MOUNTING KIT INCLUDED

PRODUCT ADVANTAGES

- Designed for outdoor use
- Protected against the rain
- Fast and easy to empty
- Easy to clean smooth surface

CHARACTERISTICS

- Inner container of galvanized steel
- Galvanized steel and epoxy exterior for better corrosion resistance
- UV-treated coating
- Grained texture to prevent scratching
- Stubbing area made of stainless steel
- Key locking system
- Mounting kit included

Capacities and dimensions:

8 99 501:

- 1.5 L (150 butts with a 0.5 L container)
- 150 (L) x 255 (H) x 60 (D) mm

8 99 502:

- 3 L (300 butts with a 0.5 L container)
- 191 (L) x 355 (H) x 60 (D) mm

8 99 1170:

- 3 L (900 butts) + collector: 14 L
- 300 (L) x 670 (H) x 140 (D) mm

A black and white photograph of a chef in a kitchen, looking down at his work. He is wearing a white chef's coat and a dark hat. The background is blurred, showing kitchen equipment and lights. A teal-colored rectangular overlay is present on the right side of the image.

***FLYING INSECT
KILLERS***

FLYING INSECT KILLERS

For areas where food is prepared and/or handed over to consumers, Article 3 of the French order of 28 May 1997 and Article 3 of the order of 9 May 1995 specify that those areas must be free from any risk of contamination and define the obligation for protection against the presence of insect pests.

WHICH INSECTS?

Flying insect killers are designed to attract and kill flying insects, particularly flies and mosquitoes but also midges, wasps, hornets, horseflies and more.

WHERE SHOULD YOU INSTALL IT?

For optimal operation, your flying insect killer must be placed in a warm, dark place, sheltered from draughts and up in the air (whether mounted or hanging).

OPERATING PRINCIPLE

A flying insect killer is an illuminated electrical device which attracts flying insects with ultraviolet A rays (harmless to people) and then either electrocutes them, traps them with glue or aspirates them.

GLUE OR ZAPPER?

Bug zappers are non-polluting (no chemicals and no odours). They are safe (the high-voltage grids are always protected). Their recovery trays need to be emptied.

Glue traps are non-polluting (no chemicals and no odours). They are safe. They do not cause any crackling or throw off any insect parts. They are perfectly suited to places with significant hygiene constraints. Their glue strips need to be replaced on a regular basis.

IP54 INDEX DEVICES?

IP54 devices are suitable for **very humid environments**. They are protected against sprays of water.

FRAGMENT RETENTION TUBES?

Unlike standard tubes, fragment retention tubes are covered with a **protective film** which avoids broken glass in the case of a blow. Fragment retention tubes are recommended for the agrifood industry in particular.
