FROM BELGIUM WITH LOVE

LIGHT UP YOUR LIFE

Delicious fries prepared with love – that's what Belgium is famous for, right? Not exactly. For a while now, Belgium has also become known for trendy lights that not only look great, but also have compelling inner values. State-of-the-art LEDs, that feel equally at home in a cosy attic apartment or in the hippest club in the city. Because they save space, preserve resources and offer a greater quality of life. And that is exactly what we at Wever & Ducré want. Where do we get our inspiration? From people like you, who share our passion for beautiful things and who pay as much attention to great design as to high-quality products. Sounds good? Then keep reading. The newest highlights are waiting for you.

NOUS VOUS AMENONS À RAYONNER

Les délicieuses frites préparées avec amour : voilà ce qui fait la renommée de la Belgique. Est-ce toujours le cas ? Pas tout à fait. Depuis quelque temps, la Belgique se démarque également par ses luminaires tendance, élégants et présentant des avantages considérables. Les LED de dernière génération s'intègrent aussi bien dans un petit appartement mansardé que dans la dernière boîte à la mode. Car elles prennent peu de place, permettent de réaliser des économies et assurent ainsi une meilleure qualité de vie. Et c'est justement ce que nous voulons chez Wever & Ducré. Où puisons-nous notre inspiration ? Auprès de personnes comme vous, qui partagent notre enthousiasme pour les belles choses et qui tiennent autant à un design élégant, qu'à une finition de qualité. Cela vous semble intéressant ? Continuez à feuilleter. Les nouveaux Hotspots vous attendent.

JUST COME OVER

HOMETOWN GLORY KORTRIJK

The moving boxes are unpacked, all the luminaires are mounted, and the coffee machine is running. The only thing still missing is you. Where? At our new headquarters in Kortrijk, of course, which are now open and ready for your visit. So save the address and head right over. This is the place where you can experience the latest collections up close and personal. And not just in our brand new showroom – you'll also find them in the best restaurants, cafés, and bars in town. No wonder the Broel Towers are trembling. After all, Kortrijk's famous attraction is now facing some fierce competition. The latest Wever & Ducré lighting trends easily outshine even the most beautiful medieval façade.

Les cartons de déménagement sont déballés, tous les luminaires sont montés et la machine à café est en marche. Le seul qui manque à l'appel, c'est vous. Où cela ? Dans notre nouveau quartier général de Courtrai qui vous ouvre dès à présent ses portes. Alors, mémorisez l'adresse et prenez la route. Vous pourrez enfin découvrir les actuelles collections au plus près. Et l'expérience ne se fait pas uniquement dans notre salle d'exposition flambant neuve, mais aussi dans les meilleurs restaurants, cafés et bars de la ville. Pas étonnant que les Tours du Broel tremblent. Le célèbre site touristique a désormais un sérieux concurrent. À savoir, les luminaires tendances de toute dernière génération de Wever & Ducré qui irradient même la plus belle des façades moyenâgeuses.

THE WAY OF LIGHT

UP AND DOWN AND STRAIGHT AHEAD

“Light permeates everything in a way that is ethereal and invisible,” says Steffen Seeger, surveying his well-lit studio in Berlin. The artist from Berlin, best known for his multiple line drawings, was immediately intrigued by the idea of rendering this intangible aspect visually. So we invited him to Kortrijk to create a mural for us. Flowing, intuitively arranged lines that emanate like rays and waves form an energy field on the wall. “I wanted to capture the universal and all-enlivening energy of light with this landscape of overlapping oscillations,” says the artist. The image thereby leaves ample room for interpretation. There’s no better way to put light in the limelight.

EN HAUT, EN BAS ET TOUT DROIT

« La lumière traverse tout de manière invisible et subtile », explique Steffen Seeger en regardant autour de lui, dans son studio lumineux de Berlin. C’est pourquoi l’artiste berlinois, connu pour ses dessins aux traits multiples, a tout de suite été fasciné par l’idée de visualiser cet aspect intangible. Nous l’avons donc invité à Courtrai pour qu’il nous réalise une fresque. Des lignes fluides au tracé intuitif qui se propagent en rayonnant et en ondulant sur le mur, formant ainsi un champ d’énergie. « Avec ce décor aux courbes qui se chevauchent, j’ai voulu rendre l’énergie universelle et vivifiante de la lumière présente en toute chose », explique l’artiste. De ce fait, le dessin se prête à bon nombre d’interprétations. Personne n’aurait pu mettre la lumière en scène d’une plus belle façon.

“The power of intuition leads to enlightenment.”

STEFFEN SEEGER

SIGNED, SEALED, AND DELIVERED

YOU'VE BEEN EXPECTING ME

… SO WHAT NOW?

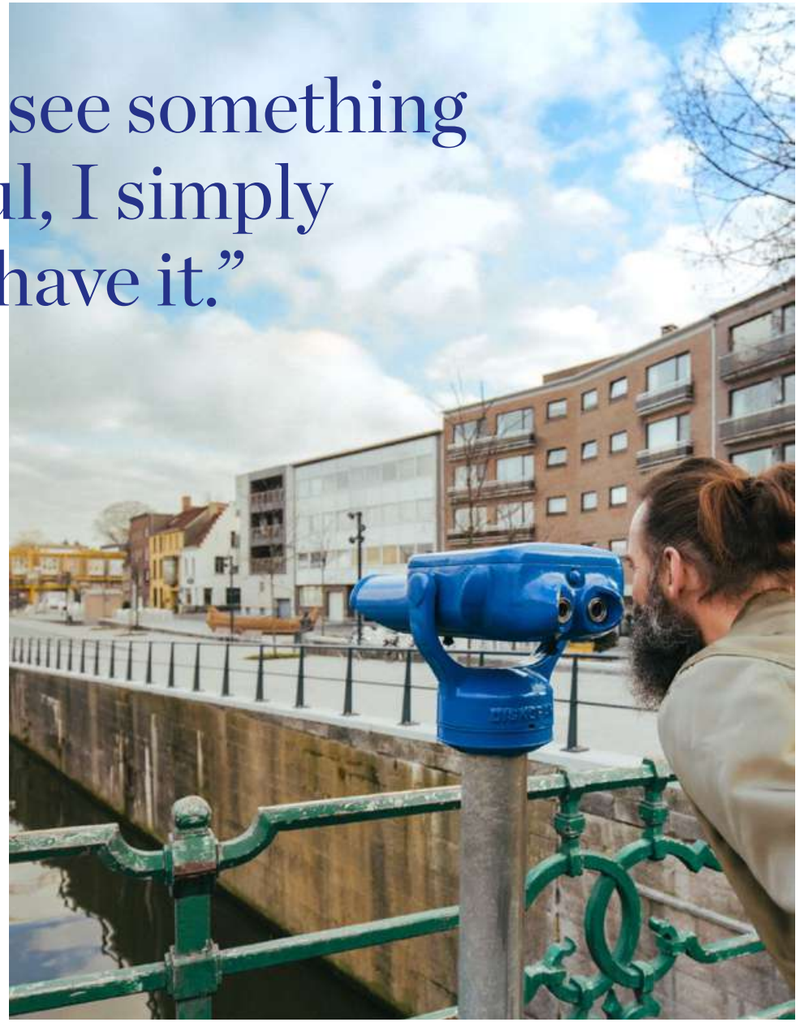

Now that you've fallen head over heels in love with one of our luminaires, there's only one last thing you want – and that's to have it as soon as possible. We understand that all too well. That's why we do everything we can to ensure that your new treasure arrives in record time. Here's an example. If we receive an order by 2:30 pm, we can ship it the very next day, since we have nearly all our luminaires in stock. That way, nothing stands in the way of your first evening together.

… TOUT DE SUITE ENVOYÉ

Vous êtes tombé éperdument amoureux de l'un de nos luminaires et vous ne souhaitez maintenant savoir qu'une seule chose : quel est le moyen le plus rapide de vous le procurer ? Nous comprenons parfaitement. C'est pourquoi nous faisons le maximum pour vous livrer en un temps record votre nouveau chouchou à votre domicile. Un petit exemple vous plairait-il ? Si une commande nous parvient avant 14 h 30, nous pouvons l'expédier dès le lendemain, car nous avons pratiquement tous nos luminaires en stock. Plus rien ne fait ainsi obstacle à votre première soirée en tête à tête.

"When I see something beautiful, I simply have to have it."

YVES MARGINET
SALES AREA MANAGER

FROM DUSK TILL DAWN

RIGHT ATMOSPHERE AND MOOD

TURN IT HOWEVER YOU WANT

You can now set the right light for any mood with a simple twist. Do you want a chipper morning at 3000 K, or a romantic evening with a candlelight atmosphere at 1800 K? Either way, we have it covered! And the best thing is, the Ambient White Dim is available for nearly all of our lights. So you don't have to compromise on design. All you need is a three-wire cable, a phase cut dimmer, and one of our lights. Keep shining!

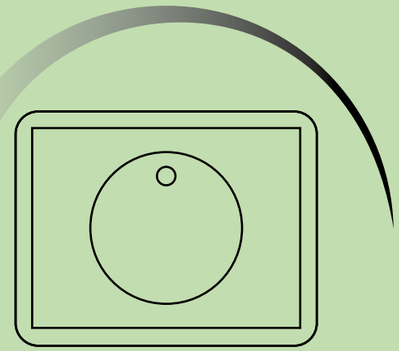

TOURNEZ COMME VOUS VOULEZ

Vous pouvez désormais modifier l'ambiance lumineuse d'un tour de main, comme vous le souhaitez. Envie d'une matinée dynamique à 3 000 K ou plutôt d'une soirée romantique avec une ambiance de lumière de bougie à 1 800 K ? Aucun problème ! Cerise sur le gâteau : la technologie Ambient White Dim est disponible pour presque tous nos luminaires. Vous n'avez donc aucune limite en termes de design. Tout ce dont vous avez besoin, c'est d'un câble tripolaire, d'un variateur d'intensité par paliers, et de l'un de nos luminaires. Continuez de briller !

A TRUE ALL-ROUNDER

ROOMOR HAS IT

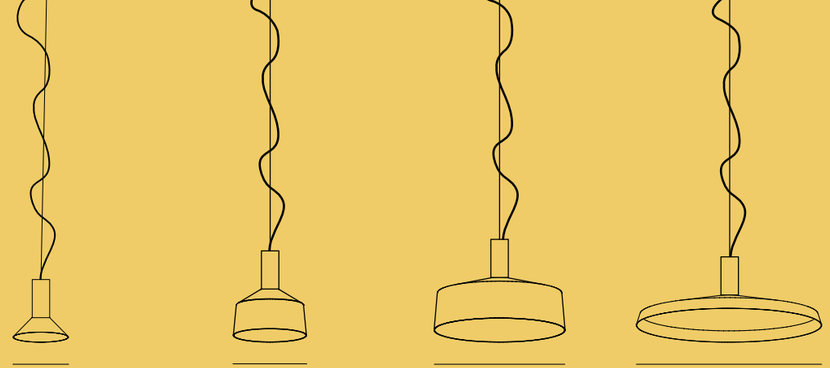

MIX AND MATCH
weverducre.com/roomor

It's safe to believe the rumours: ROOMOR is a lamp that can change its appearance faster than a chameleon. And all it takes is a few simple steps. Just choose the shape and colour and combine them to your heart's content. As a result, ROOMOR can be transformed into everything from a minimalistic floor lamp to an opulent suspended luminaire to a discreet table lamp that can be used to create exceptional design accents at the office and beyond. And because ROOMOR is entirely adaptable to its surroundings when it comes to materials, all of the shade designs are offered in either brushed aluminium or finely textured felt. Nothing could be more flexible.

Vous pouvez tranquillement vous fier aux rumeurs : ROOMOR est un luminaire qui transforme son aspect plus rapidement qu'un caméléon. Et ce, en quelques tours de main. Il suffit de choisir la forme et la couleur, puis de les combiner. De cette façon, ROOMOR est parfois un lampadaire minimaliste, une suspension opulente ou encore une lampe de table discrète qui ne se contente pas d'apporter de jolies touches design dans le bureau. Et comme ROOMOR s'adapte aussi parfaitement à son environnement sur le plan des matériaux, toutes les formes d'abat-jour sont disponibles soit en aluminium brossé soit dans un feutre finement structuré. Il n'y a pas plus flexible.

DESIGNER

“Design is good if it brings something new and timeless to the world.”

BERND STEINHUBER

And with WIRO, Bernd Steinhuber has accomplished exactly that. What inspires the Austrian designer the most? Plainly said: Everything. Therefore, his little sketchbook is his constant companion. “Ideas are fleeting,” he says, “and they don’t stick to office hours.” That’s an attitude we truly admire. After all, the most beautiful things are often found when you are not looking for them.
So keep your eyes open ...

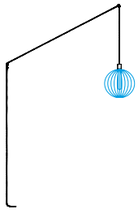

Et c’est ce qu’a réussi à faire Bernd Steinhuber avec WIRO. De quoi le designer, né en 1972, tire-t-il de préférence son inspiration ? De tout ce qu’il rencontre. Voilà pourquoi il ne quitte jamais son carnet d’esquisses. Parce que « les idées sont fugaces », dit-il « et ne se cantonnent pas aux heures de bureau ». Une approche qui nous plait. Car les plus belles choses, sont généralement celles que l’on trouve lorsqu’on ne les cherche pas. Alors : gardez les yeux ouverts !

DESIGNER

“We want to instill soul, to imbue products with emotional added value.”

ANASTASIA SU & MARTIN LESJAK, 13&9 DESIGN

Anastasia Su and Martin Lesjak from the studio 13&9 are completely focused on “transferring the creative energy of a brand to the product itself”. This approach is also reflected in the three collections that the Austrian design team has created exclusively for Wever & Ducré.
First and foremost: the natural shale veneer of ROCK with its expressive character and varying degrees of transparency, which makes every luminaire completely unique. And DRO, for which the two designers have succeeded in permanently capturing the fleeting beauty of a dewdrop. “We dealt intensively with the so-called hydrophobic effect when designing this luminaire,” explains Anastasia Su. “It causes water to bead off or adhere to the surface, thus creating nestling or upright shapes – an aesthetic that made a special impression on us.”
Besides finding inspiration in nature, 13&9 also draws upon an abundance of other creative realms such as art, fashion, and architecture – a transdisciplinary approach that is articulated so eloquently in the MIRRO collection designed by Sabrina Stadlober. Both the beholder and the surroundings can be mirrored simultaneously in the reflective metallic surface of the luminaires. A masterful technique that 13&9 employs to create an intense connection between user and product. And that is exactly what makes all of the pieces designed by 13&9 so fascinating.

Anastasia Su et Martin Lesjak de Studio 13&9 se focalisent entièrement sur l’idée de « transmettre au produit l’énergie créative d’une marque ». Cette approche se reflète également sur l’ensemble des trois collections que l’équipe de designers autrichienne a conçu exclusivement pour Wever & Ducré.
En tête de liste : le très charismatique ROCK dont le placage en ardoise à la transparence variable fait de n’importe quel luminaire un modèle absolu unique. Citons également le DRO, modèle avec lequel les deux designers sont parvenus à capturer de manière durable la beauté fugace d’une goutte de rosée. « En élaborant ces luminaires, nous nous sommes penchés intensivement sur l’effet hydrophobe », explique Anastasia Su.
« Cet effet fait en sorte que l’eau perle ou adhère, permettant ainsi de créer des formes verticales ou enveloppantes. Une esthétique qui nous a particulièrement impressionnés. » La nature n’est pas l’unique source d’inspiration de 13&9, le studio trouve également ses idées dans les nombreux autres secteurs créatifs tels que l’art, la mode ou encore l’architecture. Une approche transdisciplinaire particulièrement bien mise en exergue dans la collection MIRRO élaborée par la designer Sabrina Stadlober. Les spectateurs comme l’environnement peuvent se refléter dans les surfaces aux reflets métalliques des luminaires. Un artifice habile grâce auquel 13&9 établit une connexion intense entre l’utilisateur et le produit. Et c’est précisément ce qui rend tous les objets conçus par 13&9 aussi fascinants.

DESIGNER

Designing luminaires is a very niche art.

MARCELLO ZILIANI

MORE INFOS
weverducre.com/rever

Wever & Ducré teamed up with renowned designer Marcello Ziliani, who created an eclectic collection of luminaires. The lapels of men's jackets served as a model for the diffusers' shape. The lamp body is composed of a single piece of injection-moulded polycarbonate. Inspired by delicate linens, the surface texture is achieved by a complex, cutting-edge laser technology. Available in a variety of colours and metal finishes, REVER provides every room with an elegant yet warm atmosphere.

Wever & Ducré s'est associé au célèbre créateur Marcello Ziliani, qui a créé une collection de luminaires éclectique. Les revers de vestes pour hommes ont servi de modèle pour la forme des diffuseurs. Le corps de lampe se compose d'une seule pièce de polycarbonate moulé par injection. Inspirée par du linge délicat, la texture de surface est obtenue grâce à une technologie laser complexe dernier cri. Disponible dans une palette de couleurs et de finitions de métaux, REVER confère à chaque pièce une atmosphère élégante et chaleureuse à la fois.

CURIOUS?
weverducre.com/jjw

DESIGNER

You can learn new things from old ones.

JULES WABBES

Jules Wabbes with one of his desks at the Royale Belge, Brussels, 1971, © Wabbes Sofam, Brussels, 2017.

Jules Wabbes (1919–1974), who had a penchant for finding new ideas at flea markets, must have had the same thought. It's no wonder people said that the Belgian architect and furniture designer had a unique eye for shapes and materials. And that is apparent in his countless designs even today. A primary example: The chandelier, developed in the 1970s, whose futuristic, floral form is as much at home in a modern bar as in a posh hotel lobby.

C'est comme cela ou à peu près comme cela qu'aurait pu penser Jules Wabbes (1919–1974), lui qui aimait fouiner sur les marchés aux puces à la recherche d'idées nouvelles. Pas étonnant que l'on dise de l'architecte et designer de meubles belge qu'il avait un regard tout à fait particulier sur les formes et les matériaux. Et on retrouve ceci dans ses innombrables projets jusqu'à ce jour. Un exemple frappant : le lustre développé dans les années 1970, dont la forme florale futuriste rendait aussi bien dans un bar moderne que dans un hall d'hôtel raffiné.

HOW DEEP IS YOUR DEEP?

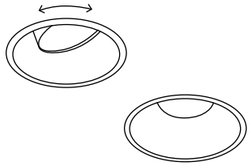

HAVE A LOOK
weverducre.com/deep

THE ALL-ROUNDER

The recessed luminaires in our DEEP series prefer a more understated approach. They prefer to stay out of sight, hidden deep in the ceiling. Their narrow edge makes that possible, allowing them to blend seamlessly with it. This trimless effect makes these space-saving multi-talents particularly popular. Thanks to the recessed installation in a round ceiling cut-out, the visible support is concealed. The result is a particularly attractive, sophisticated look which reduces glare to a minimum. All with minimal effort. Because DEEP is extremely easy to mount and – in contrast to conventional recessed luminaires – also creates a lot of fantastic effects. That's its speciality. With its three different beam options – BASIC, ADJUST, and ASYM – both individual objects and entire walls can be accentuated.

UN POUR TOUS

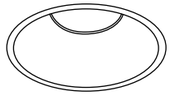

Les luminaires à encastrer de notre gamme DEEP sont plus adeptes de la discrétion. C'est pourquoi ils se dissimulent volontiers en profondeur dans le plafond. Cette particularité leur est rendue possible notamment grâce à leur étroit rebord qui leur permet de s'imbriquer parfaitement dans le plafond. Grâce à cet effet sans découpe, ce luminaire polyvalent et peu encombrant est bien évidemment très apprécié. La pose reculée permet au support visible de disparaître au profit d'une découpe de plafond ronde. Vous obtenez ainsi un visuel particulièrement beau et raffiné qui réduit au minimum l'éblouissement. Et tout cela sans grands efforts. DEEP est effectivement hyper simple à monter et crée, contrairement aux luminaires à encastrer classiques, une super ambiance aux effets multiples. Pour cela, DEEP est un expert. Grâce à ses 3 différentes variantes de rayonnement (BASIC, ADJUST et ASYM), cette gamme ne permet pas seulement d'accentuer les différents objets, elle rehausse également tous les murs.

PETIT

may be small, but it has a lot to offer. After all, it can be used as a fixed or as a pivoting spotlight. Very smart.

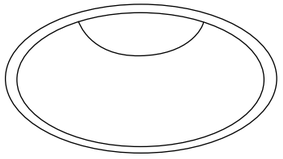

est certes petit, mais il n'est pas néanmoins dénué d'atouts. Ce modèle peut en effet être utilisé comme spot fixe ou pivotant. Véritablement ingénieux dans un salon.

BASIC

is a classic downlight whose light beam is directed straight downwards. Perfect for corridors or large ceilings.

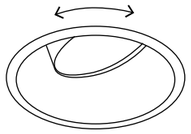

est un luminaire Downlight dont le rayonnement lumineux descend en ligne droite. Le modèle idéal pour un couloir ou un vaste plafond.

LED111

provides a great deal of light but has a very shallow installation depth. This translates into bright, friendly rooms with a glare-free light source.

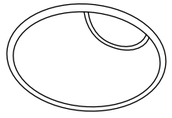

Fournit beaucoup de lumière tout en ayant une petite profondeur d'encastrement, cela donne des pièces claires et conviviales dotées d'une source lumineuse non éblouissante.

ADJUST

unlike BASIC, can be pivoted. This makes it easy to put individual objects in the right light.

contrairement au modèle BASIC, la variante ADJUST peut pivoter. Les différents objets peuvent ainsi être exposés dans la bonne lumière, en toute simplicité.

ASYM

is the artist among the recessed luminaires. It can be used to highlight surface structures on the wall.

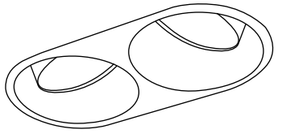

est l'artiste parmi les luminaires à encastrer. Avec lui, les structures superficielles peuvent être mises habilement en valeur au mur.

IP44

loves the water. That's because water can't do it any harm. So it is the perfect choice for providing brilliant illumination in the bathroom.

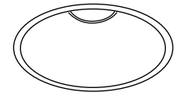

IP44 aime l'eau. Précisément parce que l'eau n'a pas d'emprise sur lui. Ce luminaire convient donc parfaitement aux salles de bain auxquelles il confère un éclairage brillant.

TWO LAMPS ADJUST

creates a magnificent ceiling visual. For elongated rooms, the light point can be reduced to a single source and lengthened.

crée un plafond à l'aspect magnifique. Dans les pièces tout en longueur, le point lumineux peut être réduit à une source et être étiré.

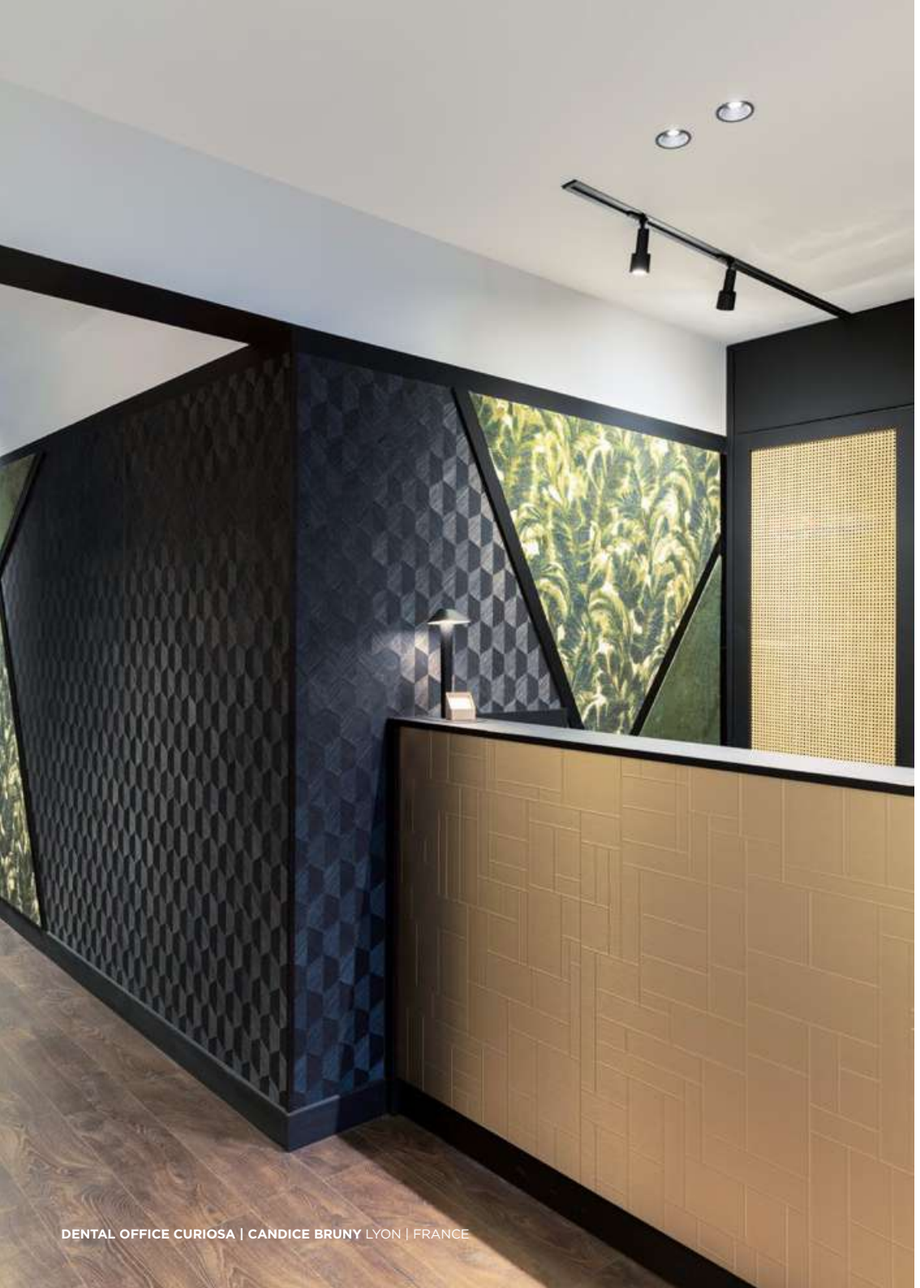

DEEPER

eliminates glare and provides optimum illumination for individual seating areas. Perfect for use in bars and restaurants.

n'éblouit pas et illumine parfaitement chaque coin salon. Ce luminaire est en effet profondément ancré dans le plafond. Idéal pour un coin bar ou un espace restaurant.

HIDDEN CHAMPIONS

FLAT'N'FANCY

Sleek built-in luminaires like CITY, RINI, LITO and LUNA are subtle, elegant and let every room shine in the brightest light. No wonder the space-saving allrounders are among the most popular lighting choices these days. Nevertheless: There are some requirements you'll need to consider when mounting recessed luminaires. Especially low ceilings in modern living spaces or too little space in the suspended ceilings can be really tricky – and every centimetre counts! The solution: extra low recessed ceiling luminaires by Wever & Ducré. The small, compact lights have been specifically designed for low ceilings with low installation depths and are not only true spacesavers, but also a design highlight – perfect for renovation projects and small city apartments.

SOYONS AMBITIEUX

De discrets luminaires encastrés, comme CITY, RINI, LITO et LUNA, sont invisibles et élégants et permettent à chaque espace de rayonner sous sa meilleure lumière. Rien de surprenant donc à ce que ces génies compacts soient tant appréciés. Cependant : certaines conditions doivent être remplies pour le montage. En effet, notamment en présence de faibles hauteurs sous plafond dans les séjours modernes ou d'un espace insuffisant dans les faux-plafonds, cette tâche peut parfois s'avérer ardue... Et chaque centimètre compte. La solution : les luminaires encastrés particulièrement plats de Wever & Ducré. Ces petits luminaires compacts ont été spécialement conçus pour les petits espaces avec une faible profondeur d'encastrement. Non seulement ils sont peu encombrants, mais ils sont aussi des prouesses de design : parfaits pour les projets de rénovation et les petits appartements de ville.

RESTAURANT GUST | INTERIOR DESIGN FREDERIC HOOFT KORTRIJK | BELGIUM

MULTI SUSPENSION

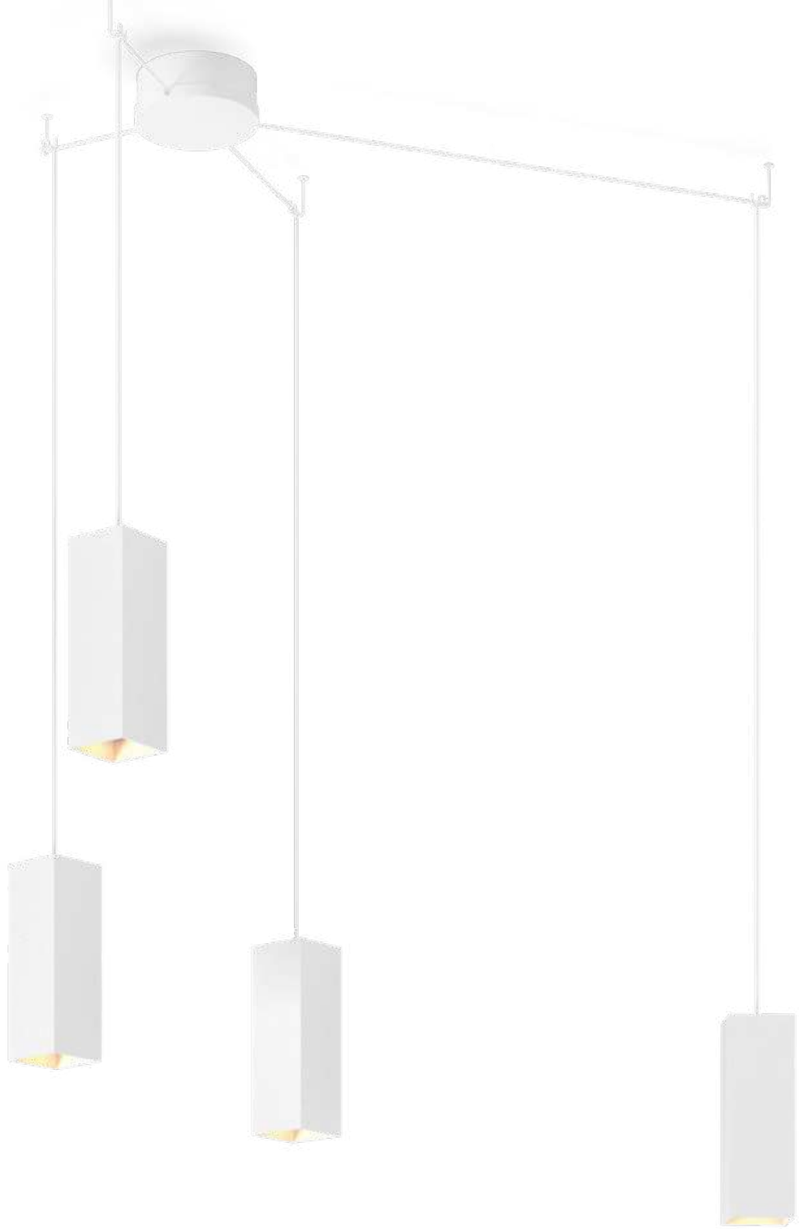

LET'S HANG OUT TOGETHER

RAY transforms every ceiling into a dance floor where it's at its best when swinging together with other Wever & Ducré luminaires. The trick: Up to eight luminaires can be suspended as a multi-baldachin in a round design and as many as five in a straight design. And all this from a single light outlet above which they can be individually arranged. As a straight line or in the shape of a spider's web, loosely suspended cables become a design element in their own right. Thus, not only the dining area, but also the room itself can be skilfully put into the spotlight. Which of our luminaires are best suited for the multi-baldachin team? In addition to WETRO and DOCUS, BOX, HEXO, SELO, and SHIEK also make for outstanding combination options. Try it out for yourself.

RAY transforme chaque plafond en une piste de danse sur laquelle il swingue de préférence avec d'autres luminaires de Wever & Ducré. L'astuce : il est possible de suspendre jusqu'à 8 luminaires de forme ronde, utilisés comme canopée multiple, et jusqu'à 5 luminaires de forme droite. Et le tout provenant d'une seule et unique sortie de lumière permettant de régler entièrement tous les luminaires de manière individuelle. En ligne droite ou sous forme de structure façon toile d'araignée où les câbles détendus constituent un véritable élément de design. De cette façon, vous ne mettrez pas seulement votre espace salle à manger en lumière, mais bien toute votre pièce à vivre. Quels sont nos luminaires parfaitement adaptés à une utilisation en canopée multiple ? Outre WETRO et DOCUS, les modèles BOX, HEXO, SELO ou encore SHIEK sont de véritables pros de la combinaison. Essayez-les.

UNIVERSAL STARS

SIMPLE FORMALITY

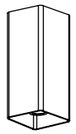

Even if maths wasn't your favourite subject: You'll love these four stunning geometric shapes. BOX, DOCUS, HEXO, and RAY are hard to beat when it comes to elegance and flexibility. That makes them ideal for virtually any space. No matter if they sparkle from the ceiling or shine from the walls. The sleek, narrow luminaires are available in six great colours, as well as in many different versions. Also for use outdoors. They'll elicit an admiring "wow" from your dear friends and relatives right in the entrance area. Who would have thought that geometry could be so enthralling?

Même si les mathématiques n'étaient pas votre fort : vous allez adorer ces quatre formes géométriques à couper le souffle. En termes d'élégance et de flexibilité, difficile en effet de faire mieux que les modèles BOX, DOCUS, HEXO et RAY. C'est pourquoi ils s'adaptent parfaitement à presque n'importe quel espace. Et ce, peu importe que vous les fassiez briller du plafond ou les fassiez rayonner sur les murs. Ces luminaires sobres et élancés n'existent pas uniquement en six magnifiques teintes, mais sont également disponibles dans de nombreux modèles divers et variés. Même pour l'extérieur. Vous pourrez obtenir un « waouh » étonné de vos amis et proches dès qu'ils franchiront le pas de votre porte. Qui aurait cru que la géométrie pouvait être aussi captivante ?

Musées, galeries, mets délicats et produits de qualité en magasin

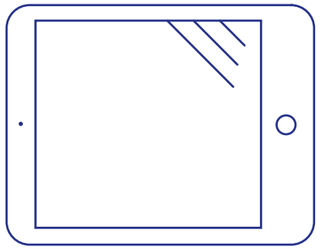

Why do our LEDs put things in the best light? Because they have a colour rendering index above 80. You're probably thinking "Okay…". But what exactly does that mean? The colour rendering index, the CRI, shows the quality of how colours are perceived under artificial light. The higher this value, and 100 CRI would be possible in theory, the more natural and appealing objects look in your home. So your bright red sofa will finally get the attention it deserves!

Pourquoi utiliser des DEL pour mettre en valeur nos objets ? Parce que leur valeur de rendu des couleurs est au moins > 80. D'accord, vous dites. Mais qu'est-ce que cela signifie ? La valeur du rendu des couleurs, ou l'indice IRC, indique la qualité de couleur émise avec une source lumineuse artificielle. Plus la valeur est élevée (en théorie, un IRC de 100 est possible), plus les objets auront l'air naturel et seront mis en valeur dans votre maison. Ainsi, votre canapé rouge intense recevra enfin l'attention qu'il mérite !

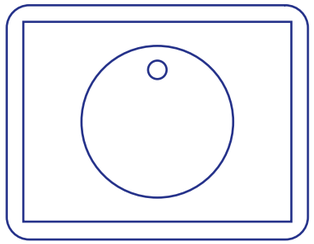

YOU HAD ME AT HELLO.

DIMMING

DIM DALI

Digital

PHASE-CUT DIM

Triac (Analog)

LET THERE BE LIGHT

Would you like to control your light digitally or through the building automation system? No problem! DALI lets you group different lights, dim lights separately, or even program different light ambiance scenarios. Sounds great? It is. Because all you need for this is a five-wire cable and the corresponding software. Then you can control all of your lighting conveniently on your iPad or iPhone. Almost like James Bond.

ET LA LUMIÈRE FUT

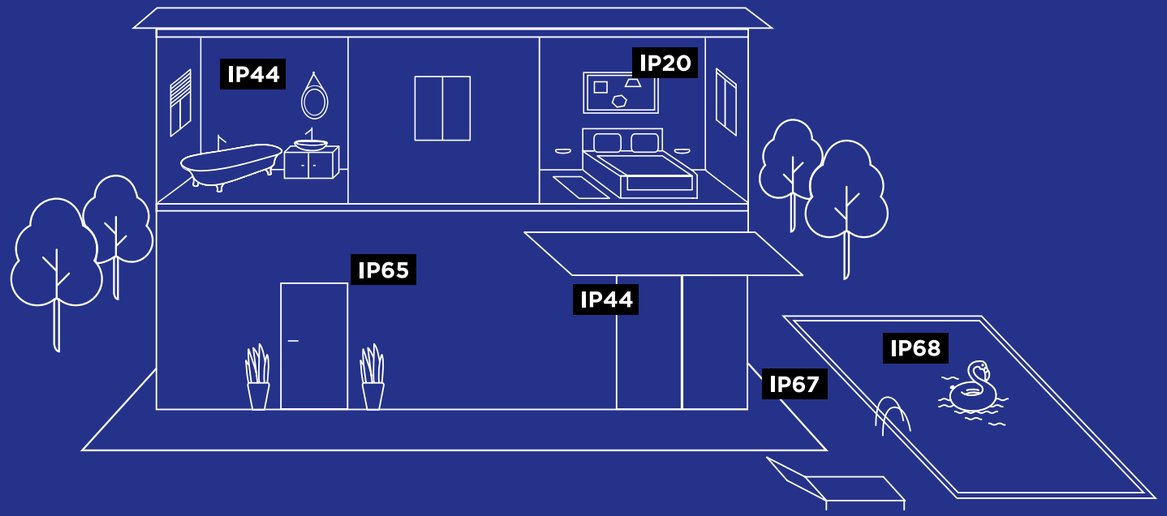

Avez-vous envie d'un éclairage numérique ou de pouvoir commander votre luminaire avec l'automatisation du bâtiment ? Aucun problème ! Avec DALI, vous pouvez regrouper différents luminaires, réduire ou augmenter l'éclairage des luminaires séparément et paramétrer à l'avance des ambiances lumineuses différentes. Cela vous intéresse ? C'est normal. Pour cela, vous n'avez besoin que d'un câble à 5 pôles et du logiciel correspondant. Vous pouvez ensuite contrôler tous les luminaires en un seul clic sur votre iPad et votre iPhone. Presque comme James Bond.

WHOA THAT'S BRIGHT …

You will never hear that phrase in your apartment. Because the analogue phase cut dimmer lets you set the light intensity in every room perfectly. What do you need? Normal wiring with a three-wire cable and a suitable dimmer. A solution that is especially perfect when you are renovating your apartment and don't want to change the wiring. And with the Ambient White Dim, you can even set the colour temperature with a simple phase-cut dimmer. Nothing could be easier.

LA LUMIÈRE EST TROP FORTE

C'est une phrase que vous n'entendrez jamais dans votre salon. Car avec le variateur analogue d'intensité par paliers, vous pouvez facilement paramétrer l'intensité lumineuse dans chaque pièce. De quoi avez-vous besoin ? D'un câblage normal avec un câble tripolaire et un variateur adapté. Une solution idéale, surtout si vous rénovez votre salon et que vous ne souhaitez pas changer le câblage. Avec la technology ambient white dim, vous pouvez également régler la couleur de la lumière, en utilisant un variateur d'intensité par paliers. Il n'y a pas plus pratique.

GENERAL REMARK

We advise to have the lighting devices installed only by a qualified electrician. In case the area is cleaned with water jets, then a minimum of IP65 is required.

REMARQUE GÉNÉRALE

Nous recommandons de faire installer les dispositifs d'éclairage par un électricien qualifié. Dans le cas où la zone est nettoyée avec des jets d'eau, un degré de protection minimum IP65 est requis.

DIM THE LIGHTS

IT CAN BE SO EASY

Never have your words and your touch been any more illuminating than with our new collection of ZigBee-compatible luminaires. All it takes to adjust and dim your lights is a simple swipe on your smartphone screen or a command to your voice-controlled device. Sounds easy? It is: Choose your favourite ZigBee products from our collection, connect them to your smart home system such as Amazon Echo or homee and you're good to go. Whether you want bright lights for breakfast, candle light atmosphere for dinner or anything in between – just kick up your feet and touch or talk to set your desired mood.

Il n'a jamais été aussi facile d'éclairer votre intérieur qu'avec notre collection de luminaires compatibles ZigBee. Il vous suffit de cliquer ou de donner un ordre à l'appareil à commande vocale. Cela vous semble aisé ? Ce n'est pas qu'une impression : sélectionnez les produits que vous préférez dans notre collection ZigBee, connectez-les à un système de maison intelligente comme Amazon Echo ou homee, puis lancez-vous. Peu importe que ce soit une lumière claire pour votre petit déjeuner, une atmosphère tamisée pour un dîner aux chandelles ou quelque chose entre les deux, détendez-vous et profitez de l'ambiance lumineuse que vous avez choisie.

1st edition, March 2019, ©Wever & Ducré® bvba.

All prices are non-binding recommended prices excluding VAT, lamps (bulbs) are not included. The prices and terms of payment stated in our order confirmation shall apply. To all prices and all extra expenses, we add the legally applicable value added taxes. Should our costs increase by the time of delivery, the prices can be recalculated on a pro rata basis. The prices stated shall apply net ex works. Information on availability as well as delivery terms and dates are provided as a point of reference only and are not binding. Prices are valid till the publication of a new price list. We expressively reserve the right to make changes in price, measurements and design. The details provided in this catalogue were correct at the time of publication. They do not constitute any kind of obligation on our part and are for information only. We shall not be held liable for any discrepancies between the illustrations or descriptions given and the actual product neither for any misprints and/or typing errors.
We reserve the right to make alterations or modifications to our products at any time. All mentioned RAL codes are indicative and approximative. We shall not be held liable for any discrepancies which may occur. All mentioned lumen values refer to white luminaires (in terms of finishing, covers or housings). Futher lumen values on request. The general terms and conditions of Wever & Ducré bvba shall apply to all purchases and orders. The applicable version of the general terms and conditions can be viewed at www.weverducre.com/en/downloads.

What's that? A whole new product range, and already several project references? See it this way: Inspiration is key to success in design, so what we care for most is inspiring you and showing you the potential of what we at Wever & Ducré do. Thus, we took the liberty of editing some original images to give you an impression of how our luminaires improve living, office, outdoor, and other spaces. These pictures are marked with an (V)
